LETTER OF TRANSMITTAL.

To His Excellency, FRIEND W. RICHARDSON,

Governor of California,

Sacramento, California.

In conformity with the provisions of section 12 of the Public Utilities Act, herewith is transmitted the report of the Railroad Commission of the State of California for the fiscal period beginning July 1, 1922, and ending June 30, 1923.

Due to the tremendous growth and development of the State of California, there has been a concurrent increase in the activities of every division of the Railroad Commission. This is reflected in the fact that the Commission rendered 1653 decisions during the last fiscal period, as against 1444 during the preceding fiscal year. Formal applications numbered 1170, as compared with 1034 the year before, and formal complaints numbered 148, against 146 the previous year.

In the matter of informal complaints, a sure index of the growth of the state, and increasing demands for service, the record showed a very marked increase, there being 5493, as against 4950 the year before. The Commission instituted 29 proceedings during the fiscal year, or one more than during the previous fiscal period. It held 1074 hearings and 248 meetings to dispose of this great volume of work.

The amount of work performed by the Reporting Department in reporting the matters heard by the Commission gives some conception of extent of these hearings. The transcripts covered 109,311 folios, or a total of 10,931,100 words transcribed.

The great increase in the number of both formal and informal proceedings imposed a corresponding burden upon the various departments of the Commission, especially the secretary's department, which receives and keeps an accurate record of all applications and complaints, and the action of the Commission thereon, and handles correspondence, publication of decisions and orders of the Commission, and the annual report.

During 1922-1923 the Department of Finance and Accounts reviewed 148 applications for permission to issue stocks, bonds, notes or other evidences of indebtedness. These applications involved securities amounting to \$151,046,555.91. Of the applications, eight were filed by steam railroads; three by electric railroads; seventeen by automobile, stage and truck operators; fifty-eight by gas and electric companies; twenty-eight by water companies; sixteen by telephone and telegraph companies; eight by carriers by water; and ten by warehouse companies.

The largest amount involved in any one application was the application of the Spring Valley Water Company for permission to issue and sell \$22,000,000 of bonds.

In addition to this work the Department of Finance and Accounts promulgated a new system of accounts for electric corporations having annual

revenues of \$250,000 or more, and undertook the revision of the uniform system of accounts for gas companies having annual revenues of \$250,000 or more. A uniform system of accounts for carriers on the inland waters of the state was also prepared and placed in operation.

The outstanding feature of the year so far as the Commission is concerned is the remarkable strength and vitality of all California public utilities, which in the face of a steadily maintained attitude by the Commission to reflect declining costs in the rates of all public utilities subject to its jurisdiction, showed an increase of more than \$4,000,000 in their net operating revenue over the previous year's income.

The importance of California in the public utility field is indicated by the fact that the gross revenue of these utilities for service within the state is estimated at in excess of \$453,000,000 for the period under review.

Rate reductions ordered by the Commission during the last fiscal period resulted in a reduction of the income of California utilities, based on 1922 revenues, of more than \$8,160,000. These consisted of gas and electric rate reductions aggregating \$5,100,000; freight and passenger rates, \$3,000,000; water rates, \$60,000.

In addition to these reductions by the Commission, the Interstate Commerce Commission placed in effect July 1, 1922, a 10 per cent reduction in all freight rates, amounting to a loss of revenue, based on 1922 income, of \$11,277,000, or one-half of the increase allowed on August 26, 1920. This action of the federal body contributed toward keeping down the number of applications by shippers to the Railroad Commission for rate reductions.

When it is taken into consideration that the cost of maintaining the Commission during the fiscal year under review was but \$516,706.78, it will be seen readily that this outlay was returned to the people of California many fold in reduced cost of public utility service, due to the regulation of those utilities in the public interest.

The Commission has taken a large part in a number of major proceedings involving transportation problems before the Interstate Commerce Commission, the importance of which to California can not be overestimated. Notable among these proceedings were the Southern Pacific-Central Pacific unmerger proceedings, which were finally determined in conformity with the stand taken by the Railroad Commission; the American Railway Express rate case, and federal proceedings for the consolidation of railroads, and the evaluation of railroads.

FINANCIAL CONDITION OF UTILITIES.

There has been a continued improvement during 1922 of the net earnings and credit of public utility corporations, taken as a whole. The increase in net earnings has been the result of increased business and increased investment, rather than rate increases authorized by the Commission during the year. Rates in general have during 1922 been revised downward.

Public utilities filing reports with the Railroad Commission rendered during the calendar year of 1922 service for which they charged \$818,244,-553.28 as compared with \$792,492,772.85 for 1921, the increase being \$25,751,780.43. The operating expenses, according to reports filed with the Commission, have increased only \$2,660,103.61, that is, from \$600,-316,356.69 in 1921 to \$602,976,460.30 in 1922. The net operating

revenues, as that term is used in the annual reports filed with the Commission, were \$23,092,676.82 greater in 1922 than in 1921. In 1922 the net operating revenue is reported at \$215,268,092.98; in 1921 at \$192,176,416.16. Tables showing the operating revenues, operating expenses, net operating revenues of the different classes of utilities appear elsewhere in the report.

The \$818,244,553.28 charged by utilities for service rendered was not all charged against California shippers or users of public utility service or products. The figure includes the total revenues of interstate railroads, interstate telephone and telegraph companies and interstate steamship companies filing reports with the Commission. The reports of steam railroads show gross revenues from business within California at \$173,932,697.33; operating expenses of \$127,210,188.76; and net operating revenues of \$46,722,508.57, as compared with \$42,199,000 in 1921 and \$29,945,000 in 1920. The revenues of the telephone and telegraph companies and steamship companies are not segregated to the various states in which these companies operate. From data on file we estimate that utilities operating in this state charged residents of this state for service rendered, approximately \$453,500,000.

During the year ending June 30, 1923, the Railroad Commission authorized the issue of \$144,860,030.91 of stocks, bonds, notes and other evidences of indebtedness, as compared with \$188,401,250.99 for the year ending June 30, 1922. The decrease amounts to \$43,541,220.08. The amount of securities authorized in any one year does not necessarily indicate the extent of the amount of money expended for construction purposes during that year. This, for the reason that the securities may be authorized to be issued for the purpose of financing construction expenditures incurred prior to the beginning of the year, or for the purpose of financing construction expenditures to be incurred subsequent to the close of the year. To illustrate—during 1922 public utilities added to their fixed capital the sum of \$142,819,036.79, while the Commission authorized the issue of only \$88,677,609 par value of stocks, bonds, notes and other evidences of indebtedness for the purpose of paying the cost of additions and betterments.

GAS AND ELECTRIC REDUCTIONS.

Rates of gas and electric utilities were reduced more than \$5,000,000 during the fiscal year by direct action of the Commission, and the level of these rates is now practically the same as before the war in most instances, and not to exceed 10 per cent above the pre-war level in others.

Several major rate proceedings were concluded during the fiscal year, including those of the Pacific Gas and Electric Company, and the Great Western Power Company. These two utilities serve approximately one-half of the public utility patrons of the state. Reductions were made in the rates of these two companies amounting to \$3,000,000 a year.

The Commission also extended to consumers of manufactured gas the benefits of two general reductions in the cost of fuel oil, amounting to 50 cents a barrel, with the result that 632,000 families received the benefit of automatic decreases in gas rates amounting to \$2,100,000 in their annual gas bills.

Patrons of public utilities within the state were saved many millions of dollars in potential charges for service by the reductions made in the rate bases allowed to various utilities. In one instance the reduction in valuation for rate-making purposes from the sum claimed by the utility was \$60,000,000; in another almost \$30,000,000. Such reductions in the last few years have amounted to the enormous sum of \$128,000,000. If a rate of eight per cent were allowed on this amount it would have added \$10,240,000 to the amount paid by ratepayers to those utilities.

Important work was done by the Commission in the matter of valuations of public utilities, in so far as the funds of the Commission would permit. The Commission's experts, when available, have checked over the valuations of California railroads made by the Interstate Commerce Commission, and such changes and modifications as they believed necessary were called to the attention of the federal body.

SPUR TRACK INCREASE.

An outstanding feature of the work of the Commission has been the tremendous increase in the number of applications for permits to construct, maintain and operate spur tracks, with the resultant increase in grade crossings. There were 280 such applications as against 155 during the previous year. This has been due, in a large part, to the tremendous industrial expansion of the state.

It is unfortunate that the limited funds of the Commission will not permit of a more active prosecution of the work of the Transportation Division in its survey of grade crossings, and the study of plans for the amelioration of hazards, existing at all grade crossings in the state.

This work, which was begun in 1916, and suspended during the war, was resumed in the last fiscal year. A total of 1709 grade crossings and separated grades were inspected, making a total of 8927 crossings inspected since this work was begun. All of the 446 grade crossings on the State highways were inspected, including 22 overgrade, and 32 undergrade crossings. It was estimated that the cost of separating the grades at these grade crossings would aggregate \$14,044,500.

WORK OF ENGINEERING DEPARTMENT.

The work of the Engineering Department has been molded along lines continually tending toward greater standardization of its methods for handling this branch of the Commission's work. This tendency has been both desirable and necessary because of the reduced personnel of the Commission and the need for meeting continually increasing demands, which has necessitated considerable reorganization of the department. There have been a number of resignations of members of the engineering force, during the year, including the chief engineer and two division heads.

The work of this department embraces the various phases of regulation of gas, electric, water and telephone companies, as well as steam and electric railways. There has, during the last year, been a marked development in the field of operations of these various utilities, together with a trend toward lowered operating costs, which conditions have brought before the Commission many proceedings wherein decisions have been rendered on rates, and orders made for improvement of service.

GAS AND ELECTRIC DIVISION.

In the field of rate fixing for electric utilities the cases of outstanding prominence have been those involving the rates for the Pacific Gas and Electric Company and the Great Western Power Company. Hearings have also been held in other cases before the Commission involving the redetermination of electric rates for nearly all of the other large utilities in this state. The trend of decisions so far issued by the Commission has been to restore these rates to approximately the pre-war level, this being possible largely because of extensive development of the utilities during the last few years, and the reduction in fuel oil prices.

Hydro-electric power developments have been actively continued by the large companies, and high voltage transmission lines of great length are now being put into operation, which make possible the utilization of vast sources of water power and the delivery of electrical energy through the interconnection of the various systems from the Mexican boundary line to the Columbia River.

The enforcement of proper and safe standards of electric line construction which has been delegated to the Commission has brought forth a very great amount of constructive work. General Order No. 64 has been prepared, and an extensive program of line inspection is now being carried out in order to assure proper safety for electrical workmen. Already over two hundred thousand infractions of this order have been reported by the Commission's inspectors, and remedial measures are now in progress.

In the Gas Division much effective work has been accomplished expeditiously, and without the necessity of formal hearings, through the operation of the automatic method of modification of artificial gas rates with change of oil prices. The abnormal development of petroleum in southern California has made available tremendous volumes of natural gas, together with cheap fuel oil. As a result, gas rates throughout the entire state are now approximately the same as in 1917 and 1918. A number of investigations of the cost of service have been made, and through informal negotiations with the utilities the Commission has been able to have put into effect material reductions of gas rates.

The policy of the Railroad Commission has always vigorously emphasized the matter of good service as a condition upon which compensatory rates should be based. In order that the highest possible standards for gas service might be maintained, and thereby provide the consumers the greatest values, the Commission has taken a leading action in the determination of operating standards for gas companies. The Joint Committee on Efficiency and Economy of Gas of the Railroad Commission was formed several years ago, and has now completed its investigations as to the determination of the most advantageous gas quality. However, in order to continue the valuable work, which was started by this committee, and to further investigate many important problems, which are of value alike to the consumer and the utility, the Railroad Commission has assumed supervision over a newly organized body known as the Gas Research Council, which will be carried on by the utilities of this state upon a cooperative basis.

TELEPHONE AND TELEGRAPH DIVISION.

Regulation and supervision of telephone companies of this state has presented to the Commission one of its most difficult problems. Because of the extreme rapidity of growth, particularly in the southern part of the state, and also because of the physical nature of telephone systems, the various companies have found it extremely difficult to keep pace with the demands upon them.

Particularly is this condition true in the city of Los Angeles and immediately surrounding district, where the number of consumers has increased most rapidly, and the extent of the use of the telephone is very great. In fact, the number of calls per telephone per day is higher in Los Angeles than in any other important city on the Pacific coast, and almost double the average for the United States.

The present telephone system in Los Angeles is the consolidation of two former companies, with the result that there are at present three distinct types of systems. When it is realized that during the last year more than 28,000 new telephones were installed in Los Angeles city, as compared with 84,000 in the whole state, it is easy to appreciate that many operating difficulties confront the utility. The Commission's Telephone Division has made decisions in more than 1100 informal complaints relative to telephone matters, and of these decisions nearly 90 per cent have been in favor of the complainant.

TRANSPORTATION DIVISION.

During the last fiscal year the Transportation Division has had before it a number of extremely large and important matters, chief among which were proceedings before the Interstate Commerce Commission relative to the unmerger of the Southern Pacific and the Central Pacific Railroads, valuation of railroads, and hearings in regard to the establishment of union terminal facilities in Los Angeles. The southern part of the state, particularly that adjacent to Los Angeles city, has required much attention from the Commission in regard to its transportation problems.

In an effort to improve conditions within that city the Commission has joined forces with the Board of Public Utilities, and the city has approved the making of a special investigation relative to consolidating the local lines of the Los Angeles and Pacific Electric Railways under the management of either one of these two roads, or by municipal operation. Detailed valuations of the properties are now being made under the Commission's supervision.

Because of the recent growth of the Los Angeles harbor the city of Los Angeles has also brought before the Railroad Commission the matter of improvement of transportation facilities in that district.

The matter of the establishment of union terminal facilities in Los Angeles has been before the Interstate Commerce Commission since the California Supreme Court issued its decision that the Railroad Commission did not have authority to order the unification of terminal facilities. Soon after this decision and pending an appeal to the United States Supreme Court on the question of jurisdiction, the city of Los Angeles instituted a proceeding before the Interstate Commerce Commission asking that an order be issued directing the establishment of a union terminal in Los Angeles in conformity with the plans contemplated

by the order of the Railroad Commission. A hearing covering several days was held before Commissioner Aitchison in Los Angeles and the matter was taken under advisement until the United States Supreme Court shall finally determine whether the jurisdiction to make such an order rests with the State Commission or the Interstate Commission.

A proceeding which has attracted widespread attention has been the matter of unmerger of the Southern Pacific and Central Pacific Railroads, as ordered by the United States Supreme Court, pursuant to action taken for the enforcement of the Sherman Anti-trust Act. The Southern Pacific Company made application to the Interstate Commerce Commission for an order authorizing the acquisition and control of the Central Pacific lines by lease under the provisions of the Transportation Act of 1920. Following the receipt of this application the California Railroad Commission made an extended investigation, with particular attention to the effect in this state of granting this application. The Commission's chief engineer and attorney appeared before the hearings of the Interstate Commerce Commission in Washington, D. C., in November, 1922, where evidence in behalf of the Commission was presented. After exhaustive hearings the Interstate Commerce Commission concluded that the unification of the Southern Pacific-Central Pacific lines into one operating system was in the interest of public convenience and ultimately rendered its decision granting the application, subject to certain conditions intended to eliminate the possibility of any future discriminations in the diversion of traffic over this unified system, instead of over competing lines, which normally would share in the flow of traffic eastward. The decision was in substantial accord with the position taken by the Railroad Commission.

HYDRAULIC DIVISION.

There are in excess of 550 public utility water systems in the state which have filed rates, rules and regulations with the Railroad Commission. These utilities range in size from those supplying a few persons to plants which serve approximately 90,000 consumers, the investment in the systems varying from a few thousand to in excess of \$40,000,000.

During the twelve months' period decisions were rendered in 205 formal proceedings, and 479 informal complaints involving water utilities were investigated and finally disposed of.

Many of the utilities during the last few years have come to the Commission with applications for increased rates, alleging that their revenues had not increased in proportion to the great increase which had occurred in operating cost due to high prices of labor and material prevailing throughout the country. A year or more ago the cost of both labor and material was declining to such an extent that it was believed that within a short time many rate schedules could be reduced without endangering the financial condition of the utilities.

Experience has, however, shown that the decline in prices was only temporary, and that the cost of operation and construction of water systems is now fully 75 per cent higher than the corresponding cost in 1914 and 1915. From present indications it is impossible to predict any material decreases in the water rates of public utilities for some time to come. In spite of the continuance of high costs, however, an investiga-

tion, which was conducted on the Commission's own motion into the reasonableness of the rates of one of the large water companies, resulted in a decrease of the former rates of approximately 10 per cent.

In the course of the Hydraulic Division's investigation of public utility affairs during the last fiscal year, 37 appraisals of property were made, ranging up to \$1,401,250, with a grand total of \$6,091,611.

During the fiscal year the Hydraulic Division was called upon to make investigations, inventories, appraisals and reports upon two public utility water systems which municipalities had desired to acquire under eminent domain proceedings or otherwise. These investigations required exceptional accuracy and care in order to avoid a reversal of the Commission's findings of compensation in the Supreme Court.

The rapid growth of the state and the difficulty in securing material have made it extremely difficult for the utilities to provide adequate facilities for supplying consumers. While these conditions will without doubt be remedied to a very large extent within another year, the result has been that the Hydraulic Division was called upon during the last fiscal year to investigate and recommend methods for improving conditions of service in 23 formal proceedings, besides a vast number of matters which were cared for through informal action.

Of late years there has been a decided tendency on the part of municipalities to acquire public utility water systems, and many such transfers have been authorized by the Commission. The rapid growth of the state, previously mentioned, has, however, resulted in the establishment of a large number of new plants to provide for the supplying of water to residents of new tracts and subdivisions.

RATE WORK IMPORTANT.

Extremely important work was performed by the Rate Department which has charge of all tariffs filed by the following ten utilities: Steam railroads, electric railroads, street railroads, water carriers, express companies, aeroplane companies, cold storage warehouses, miscellaneous warehouses, wharves and automobile carriers. There are 1353 of these utilities in the state and the filing and checking of the tariffs involve a tremendous volume of detail.

Under the provisions of the Public Utilities Act carriers must publish rates on thirty days' notice, unless authorized to make the same effective on less than the statutory notice. They must secure from this Commission authority for every rate increase and also secure authority to publish rates in exception to the long and short haul provision of the state constitution. During the fiscal year this department handled 1872 requests under these provisions of the law.

The railroads of the United States were under control of the federal government from December, 1917, until March 1, 1920, but from March 1, 1920, until September 1, 1920, the federal government granted the railroads the same rate of return as they had been receiving during the period December, 1918, to March 1, 1920. After March 1, 1920, the railroads were privately controlled, but no rates could be reduced prior to September 1, 1920, without the authority of the Interstate Commerce Commission. During the federal guaranty period the Interstate Commerce Commission conducted an investigation, and in order to comply

with the provisions of the Transportation Act of 1920, issued an order, in August, 1920, increasing within the United States all freight rates by 25 per cent and all passenger fares by 20 per cent, and these increases went into effect August 26, 1920.

Because of the prosperity due to the war conditions, which still existed at that time, the increases were not severely felt by the shipping and traveling public, but as the changes due to war conditions gradually relaxed it became apparent that some readjustment would have to be made in the transportation rates. Therefore, on July 1, 1922, all freight rates which had not been reduced by 10 per cent or more since August 26, 1920, were reduced 10 per cent. In other words, this reduction took from the carriers one-half of the increased freight revenue authorized in August, 1920.

In addition to this general decrease in the freight rates the Commission has made a large number of reductions both by formal and informal action. During the year ending June 30, 1923, consideration was given to 463 informal and 108 formal adjustments. The most important formal proceedings involved the class rates between Imperial Valley points and Los Angeles; commutation fares on the San Francisco, Napa and Calistoga Railway; the oil rates from producing points on the Sunset Railway; establishment of the weekly transferable pass on certain street railways in southern California; readjustment of the paddy rice rates; readjustment of the passenger fares on the Pacific Electric Railway; and the elimination of certain arbitrary refrigeration charges against meat and packinghouse products.

At this time there are on the docket of the Commission many important freight rate proceedings requiring a large amount of very careful investigation.

For almost a year a great amount of the time of the Rate Department has been devoted to the Express Rates case which involves a readjustment of the express charges of the American Railway Express Company, not only within the State of California, but throughout the United States. In order to assist in this work the Commission assigned its assistant rate expert to the case, who has been cooperating with the Interstate Commerce Commission, and in connection with that Commission has held hearings throughout the United States. This proceeding has not yet been finally submitted but it is one of vast importance to all patrons of the express service.

The Commission also, during the year, has taken an active part in the proceeding which involves the surcharge now being collected in connection with Pullman sleeping car transportation.

AUTO STAGES AID DEVELOPMENT.

Automotive transportation is proving a decided factor in the development of the state. Most significant are the figures compiled from records of its automobile department and filed with the Commission by the common carriers of the state over which the Commission obtained jurisdiction by the passage of the Auto Stage and Truck Transportation Act, which became effective May 1, 1917.

There are 713 of this type of carrier. They give service in all parts of the state, the snows of the mountains and the heat of the deserts

proving no barrier. Automotive transportation in many cases has preceded the modern road building program of the state; invariably it follows construction of the paved highway. Widened field of service has been followed by equipment changes and betterments on a par with the demands of the public. The big lumbering bus and the ordinary touring car doing duty as an auto stage, are giving way to specially constructed autos, fast, commodious, comfortable, and safe to a degree that is decidedly attractive to the traveling public.

During the calendar year 1922 the auto carriers of the state transported 21,221,928 passengers, approximately 1600 cars being used for passenger carrying. For freight carrying purposes a fleet of nearly 1500 motor cars and trailers was in use.

So rapid has been the development of transportation by auto that it is now possible to travel by auto in California from the Oregon line to the Mexican border, choice of valley or coast route being offered. Across-the-state service is given in the extreme north, it being possible to travel by auto (using several different stage lines) from Crescent City to Fort Bidwell, from Eureka to Red Bluff, to Nevada state line; from Oroville, Chico, Sacramento and Stockton to the Lake Tahoe and Feather River territory; from the center of population to the Yosemite Valley and contiguous territory; from Fresno and Bakersfield and other valley points to the coast and to the high Sierras.

Out of San Francisco and Oakland many auto stage lines operate. Southward, "Down the Peninsula" specially constructed cars give service to the great Santa Clara Valley and by connecting lines to the heart of San Joaquin Valley, the oil fields and the National Parks. The beach territory at Santa Cruz and along the shores of San Mateo County and the so-called "big-tree" section are also served by auto lines. San Francisco and Portland, Los Angeles and San Diego are connected by auto service. Stage lines connect San Francisco and other bay district cities with the Sacramento, Tahoe, the mines section, and along the north coast, auto lines skirting Tamalpais and the Valley of the Moon, reach the famous redwood groves of the north.

Out of Los Angeles and San Diego stage lines run in every direction, serving San Bernardino mountain territory, Imperial Valley, and the vast desert areas that spread over the southeastern part of the state. Many of the stage lines publish joint tariffs and so arrange their time schedules that the necessary change from one line to another is accompanied by a minimum of discomfort. As a result there are few places in California today that are inaccessible to the traveler.

LEGAL DEPARTMENT.

The work of the Legal Department has very greatly expanded during the last few years, and particularly during the year covered by this report.

In addition to advising the Commission and its staff upon matters involving the legality of the Commission's orders and practices, the legal department is charged with the task of conducting all legal proceedings in which the Commission is interested as a party, and of handling the Commission's activities in cases before the Interstate Commerce Commission which affect the interests of the people of this state.

At the end of the fiscal year the following litigation was pending: Four cases in the United States Supreme Court, seven in the California Supreme Court and one in the Superior Court of Los Angeles County. In addition, seven matters were pending before the Interstate Commerce Commission. During the year the State Supreme Court has decided thirteen cases involving the Commission, of which seven are pending on further proceedings either on rehearing in the state court or on appeal in the United States Supreme Court.

Since the reorganization of the Railroad Commission in 1911, it has made 12,297 formal orders and decisions. During that same period it has been a party to one hundred and twenty court proceedings, of which seven are still pending. Of these cases only eighteen have been decided against the Commission. Included in these eighteen cases are four which were reversed by later action of the State Supreme Court; four which were test cases and although nominally decided against the Commission in reality sustained the Commission in principle; and one which is now pending on appeal in the United States Supreme Court.

This leaves a net of nine cases actually lost during these twelve years, out of the 120 cases which have been handled. In other words, the formal action of this Commission in the regulation of public utilities in California as expressed in over 12,000 decisions, has been reversed in but nine cases, considerably less than one-tenth of one per cent.

SERVICE INSPECTION.

The scope of the work of the Service Department was increased during the year and many unsafe practices were ordered discontinued, and contributing factors in numerous accidents involving the various carriers of the state were ordered eliminated, as the result of the inspections and investigations made by this department.

It is the duty of the Service Department to investigate and report upon the safety of railroad operation, and the accidents caused by such operation, and to report the results thereof to the Commission, upon which the Commission may make recommendations to the carriers for the betterment of all conditions which it finds to be unsafe or deficient.

With the acquisition by this department of jurisdiction over auto stage and freight truck transportation a vast amount of work has been done in field inspection of condition of automobiles and trucks in compliance with the safety rules and operating regulations of the Commission. During the last year 1245 automobile inspections were made, and orders given for immediate correction of violations of the general orders of the Commission.

A close scrutiny was maintained over dispatching methods, and carriers were required to establish standard uniform methods of operation, and to maintain a high standard of physical fitness of employees in train and engine service. Due largely to work of this department the dispatching methods and operating practices of smaller railroad carriers in California have been brought up to a satisfactory standard of efficiency.

The department conducted 110 investigations into accidents on steam and electric railroads and made recommendations in many of these investigations for the elimination of faulty conditions which might cause a repetition of such accidents. This valuable work, which is

much in the nature of a trouble prevention bureau, has resulted in bringing up the standard of operation of steam and electric railroads and motor transportation in California to a high average as compared with the other states of the union, and has reduced accidents, and hazard of accident, due to faulty operation, on such lines to an extremely low minimum.

The report is in one volume of two parts. Part One is devoted to a description of the work of the Commission from a statistical and departmental standpoint. Part Two contains tables compiled from the annual reports of utilities filed with the Commission, in conformity with the provisions of the Public Utilities Act and the rules of the Commission.

Respectfully submitted.

C. L. SEAVEY,
H. W. BRUNDIGE,
IRVING MARTIN,
EGERTON SHORE,
J. T. WHITTLESEY,
Commissioners.

November 14, 1923.

PART ONE

THE BUSINESS OF THE YEAR

CHAPTER I.

JURISDICTION—HISTORY—LEGISLATION
ORGANIZATION.

Regulation of public utilities in California is entrusted to the Railroad Commission under constitutional provisions, the Public Utilities Act and other statutes supplemental and amendatory thereto.

The Commission has jurisdiction over the rates, service, finances, facilities and extensions of all public utilities within the state. This jurisdiction extends to accounts, transfers of property, the issuance of securities, and to safety of operation and construction. The utilities under the control of the Commission are steam and electric railroads, street railways, gas, electric, telephone, telegraph, water, warehouse, wharfinger, heat, auto stage, motor freight and inland water transportation companies.

The Commission has ample power and a broad discretion in the regulation of public service corporations. Through systematic reports and personal contact it is in close touch with the various utilities and the fields they serve, and a large part of its work consists of informal adjustments. Where informal adjustment can not be made or is deemed inexpedient, the Commission initiates on its own motion a formal investigation, hears witnesses and renders a decision. These proceedings often anticipate formal complaints by consumers by meeting changing conditions or remedying in their incipency situations likely to develop into abuses.

The Commission's aim is to see that the consumer receives adequate service at a reasonable cost; to give the utility protection and a fair return, where possible; to enable it to function properly and reasonably to anticipate the needs of an expanding field; and lastly, to give the investor a fair expectation of stability, both as to financial structure and operating efficiency of the institutions into which he is placing his money. Each of these four functions is regarded as of prime importance.

Regulation of public utilities had its inception in California by an act of the legislature April 3, 1876. The act provided for the appointment by the Governor of three Commissioners of Transportation, who were empowered to exercise supervision over steam railroads with reference to the security and accommodation of the public.

They had power on petition of property owners to establish stations, switches and side tracks. The railroads were directed to file with the Commissioners of Transportation copies of all their tariffs, rules, regulations and instructions to employees, but the Commissioners had no power over rates, except limited powers on complaint.

The act also defined extortion and unjust discrimination. The jurisdiction thus conferred upon the Commissioners of Transportation was confined to steam railroads, and consisted of limited powers, both as to rates and service.

The state legislature enacted a measure, approved April 1, 1878, repealing the act of April 3, 1876, and substituting a single Commissioner of Transportation, appointed by the Governor, whose powers relating to

service by steam railroads were similar to those conferred upon the three Commissioners of Transportation by the act of April 3, 1876.

The Commissioner's power in respect to rates was merely advisory, the act of April 1, 1878, providing that it should be his duty:

"To examine into all complaints made in writing as to unjust discrimination between persons and places, and to endeavor, by amicable interpretation to bring about such changes in tariffs or rules as shall, in his judgment, promote the public interest, and (he) shall report all such cases with the results of his investigation and interposition to the Governor."

The provisions of the new act with reference to extortions, discriminations, forfeitures and penalties remained the same as those contained in the act of April 3, 1876, but in addition there were certain police regulations relating to: the making up of trains; the period of confining animals in transportation; obstruction of highways; trespassing; intoxication of railroad employees and railroad policemen.

RAILROAD COMMISSION CREATED.

The Railroad Commission was created under the provisions of section 22 of article XII of the constitution of 1879.

The new constitution provided for the election of three Railroad Commissioners, one to a district, the state being divided into three districts for that purpose. Their terms of office were fixed at four years.

The Commission was given power over railroad and other transportation companies, to fix rates and to prescribe uniform systems of accounts.

The constitution failed, however, to include jurisdiction over service, which both the Commissioners of Transportation and the single Commissioner of Transportation had possessed.

Other sections of article XII of the constitution contained provisions concerning long and short hauls; grant of free passes or tickets at a discount; increases in freight rates after reductions made for the purpose of competing with other common carriers; discrimination in charges or facilities for transportation as between either persons or places; and other provisions applicable to railroad and other transportation companies.

The first legislature which convened after the adoption of the constitution of 1879 passed the act approved April 15, 1880, to organize and define the powers of the Board of Railroad Commissioners. Transportation companies were defined to include railroads other than street railroads, steamships plying from or to ports within this state, and steamboats plying upon the rivers or inland waters of this state. The act contained certain provisions as to procedure, but confined itself to the powers of the Railroad Commission as specified in the constitution. It did not specifically repeal the act of April 1, 1878, which probably remained in force in so far as the later act was not inconsistent with its provisions.

NEW LEGISLATION.

There was no further legislation affecting the Railroad Commission between 1880 and 1909. Finally, in 1909, the legislature passed the act approved March 19, 1909, known as the Wright Act. This act increased the salary of Railroad Commissioners from \$4,000 to \$6,000 per annum, and extended the definition of transportation companies to include express companies, car companies, and others. The jurisdiction of the Commission over rates was limited by this act to the authority to fix the

maximum rates to be collected. The act made certain changes in procedure and specified additional penalties, not, however, providing for imprisonment of the actual offender.

The next session of the legislature passed the act, approved February 9, 1911, Statutes of 1911, page 13, known as the Stetson-Eshleman Act. The Commission was authorized by this act to fix the actual moving rate and also to ascertain the value of the property, both real and personal, of every railroad or other transportation company in the state and to prescribe a uniform system of accounts. The act also prescribed penalties for violations of the provisions of the act and of the constitution with reference to railroad and other transportation companies.

The powers of the Commission were limited to those prescribed by the constitution as it then stood, to fix rates and to prescribe uniform accounts for railroad and other transportation companies.

The legislature of 1911 decided that the powers of the Railroad Commission should be increased to cover all classes of public utilities within the state, and that the scope of the Commission's powers over such utilities should be extended from rates and accounting to matters of service and finances. The legislature accordingly submitted to the electors of the state three constitutional amendments, as follows:

(a) Assembly Constitutional Amendment No. 50. This amendment altered sections 20 and 21 of article XII of the constitution to remove the rigid application of the long and short haul rules in cases in which the Commission might consider such deviations reasonable, and to give the Commission power over excursion and commutation tickets, and also power to award reparation to shippers in case of excessive or discriminatory rates.

(b) Assembly Constitutional Amendment No. 6. This amendment increased the members of the Railroad Commission from three to five, provided for their appointment by the Governor from the state at large instead of election from specified districts, increased the term of office from four to six years after January 1, 1915, gave single commissioners the power, when designated by the Commission, to hold hearings, and removed all possible doubt as to the Commission's power to fix the actual moving rate.

(c) Senate Constitutional Amendment No. 47. This amendment defined public utilities to include commercial railroads, interurban railroads, street railroads, canals, pipe lines, telephone and telegraph companies, heat, light, water and power companies and storage and wharfage companies, and gave to the legislature the right to confer upon the Railroad Commission power to supervise and regulate all public utilities. All powers over public utilities theretofore vested in any political subdivision of the state, except those vested in incorporated cities and towns, were vested in the Railroad Commission upon the passage by the legislature of an act conferring such powers upon the Commission.

These amendments were adopted at a special election on constitutional amendments, held on October 10, 1911.

PUBLIC UTILITIES ACT.

In the meantime, the Railroad Commission, foreseeing the passage of the amendments and the subsequent need for a carefully prepared Public Utilities Act, sent its attorney on a tour of inspection of the

leading railroad and public service commissions of the country. The attorney made a careful study of the statutes, and of the actual work done by ten of the leading railroad and public service commissions of the country, and on his return, the proposed Public Utilities Act was prepared by the attorney, the president of the Commission, and several other attorneys including members of the state legislature. The bill was introduced on November 28, 1911, at a special session of the legislature by Lester G. Burnett, in the Senate, and W. A. Sutherland, in the Assembly. It was passed by the legislature and was approved by Governor Johnson, December 23, 1911, to become effective March 23, 1912.

The Public Utilities Act as then enacted defined public utilities to include corporations or persons which own, control, operate or maintain railroads; street railroads; express companies; sleeping, dining, freight and other car companies; vessels regularly engaged in transportation over regular routes between points within this state; pipe lines; gas plants; electric plants; telegraph lines; water systems; public wharves; and warehouses used in connection with the transportation of property by a common carrier or vessel, or the loading or unloading of the same. The Railroad Commission was given power to regulate and control all the public utilities of the state, except that the incorporated cities and towns of the state, including the city and county of San Francisco, retained the powers over public utilities which they had on March 23, 1912, with the privilege, however, of voting those powers to the Railroad Commission. The powers of the Railroad Commission over public utilities were very broad, including jurisdiction over rates, service, equipment, facilities and finances. The act prescribed a simple and effective procedure before the Commission, and in the courts, on review of the Commission's acts, and specified adequate penalties for its violation.

HEWITT ELECTIONS ACT.

The legislature of 1911 in special session also passed what is known as the Hewitt Elections Act, approved January 2, 1912, providing for the method by which the electors of incorporated cities and towns may, if they so desire, vote to confer upon the Railroad Commission the powers of such incorporated cities or towns to regulate public utilities within their corporate limits.

This power was voted to the Commission by 58 cities in the state, and in those cities the Commission exercised jurisdiction over rates, but elsewhere the Commission had power over public utilities outside municipalities only.

PUBLIC UTILITIES ACT REVISED.

On November 3, 1914, section 23 of article XII of the constitution was amended so as to provide, in effect, that the legislature should have the power to confer upon the Railroad Commission jurisdiction over all the rates of all public utilities in the state, in incorporated cities and towns as well as in unincorporated territory. The authority thus conferred was exercised by the legislature when it passed the revised Public Utilities Act (enacted April 23, 1915, and effective August 8, 1915). The Hewitt Elections Act was likewise revised to meet the changed conditions (Stats. 1915, p. 1273).

The Railroad Commission's jurisdiction over public utilities, under the Public Utilities Act, as now in effect, is very extensive. In all unin-

corporated territory and in all incorporated cities and towns, with the exceptions hereinafter specified, the Railroad Commission now has complete jurisdiction over public utilities, with the exception of the usual local police powers and the initial granting of public utility franchises in certain cities or towns.

In cities which have special freeholders' charters, the Railroad Commission has complete jurisdiction over public utilities (other than as to the usual local police powers and the initial granting of public utility franchises in certain cities or towns) except to the extent that such cities (not having relinquished their powers to the Railroad Commission) have been granted in their charters special powers over public utilities, which powers are in conflict with the powers conferred on the Railroad Commission. However, even in cities having freeholders' charters, the Railroad Commission now has complete jurisdiction over all public utility rates.

MOTOR CARRIERS INCLUDED.

In 1917 the legislature brought motor busses and freight carrying trucks under the jurisdiction of the Commission, and it was empowered to grant such carriers certificates of public convenience and necessity, and to regulate the rates and service. In 1919 jurisdiction of the Commission was extended to cover food warehouses.

CONSTITUTIONAL AND STATUTORY POWERS.

In addition to the Public Utilities Act as it now stands, the following statutes confer powers and duties upon the Commission:

Chapter 80, Laws of 1913—Regulation of water companies.

Chapter 49, Laws of 1911, as amended by Chapter 168, Laws of 1913, and Chapter 501, Laws of 1915—Size of railroad train crews.

Chapter 284, Laws of 1913—Locomotive headlights.

Chapters 285, 286 and 327, Laws of 1913—Oil pipe lines.

Chapter 557, Laws of 1913—Construction of wharves, chutes and piers.

Chapter 494, Laws of 1915—Train dispatching by telephone.

Chapter 498, Laws of 1915—Derailing switches.

Chapter 499, Laws of 1915—Water glasses on steam locomotives.

Chapter 600, Laws of 1915—Construction of electric transmission and distribution systems to promote safety.

Chapter 667, Laws of 1915—Reports by public utilities rendering hospital service to employees for compensation.

Chapter 120, Laws of 1917—Amending section 50 of the Public Utilities Act by providing that electric railroads and telegraph companies shall secure certificates of public convenience and necessity and that the Commission shall have power to issue orders directing that public utilities shall hold construction work *in statu quo* pending investigation as to the necessity for securing a certificate of public convenience and necessity.

Chapter 176, Laws of 1917—Amending sections 47 and 70 of the Public Utilities Act by providing a more effective procedure for the determination by the Commission of the just compensation to be paid by public authorities for the property of public utilities in eminent domain proceedings.

Chapter 191, Laws of 1917—Permitting mutual water companies and the owners of private water supplies to furnish water to third parties

during the emergency created by the war, without thereby becoming public utilities; reports to be made to the Commission.

Chapter 201, Laws of 1917—Defining the respective jurisdictions of the Commission and the Industrial Accident Commission with reference to the safety of the employees of public utilities.

Chapter 209, Laws of 1917—Amending section 43 of the Public Utilities Act so as to make more effective the jurisdiction of the Commission over railroad crossings and giving to the Commission power to determine and apportion the expenses of separating railroad grade crossings and the damages to adjacent property, and to determine the just compensation to be paid for property taken or damaged in connection therewith.

Chapter 213, Laws of 1917—Providing for the regulation by the Commission of the owners and operators of all automobiles, jitney busses, auto trucks, stages and auto stages operated in the transportation of persons or property as common carriers for compensation over any public highway in this state between fixed termini or over a regular route and not operating exclusively within the limits of an incorporated city or town.

Chapter 575, Laws of 1917—Providing that the Commission shall enforce the provisions of Chapter 500, Laws of 1911, referring to the construction of subways, manholes, chambers or underground rooms, encasing electric wires or cables.

Chapter 707, Laws of 1917—Extending the jurisdiction of the Commission to so-called irregular water carriers operating vessels of specified carrying capacity on the inland waters of California.

Chapter 713, Laws of 1917—Referring to the issue by public utility corporations of capital stock without par value when and as permitted by the Commission.

Chapter 784, Laws of 1917—Requiring that railroad corporations operating by means of steam locomotives shall install automatic bell ringing apparatus in their locomotives within one year or within such additional time as may be prescribed by the Commission.

Chapter 215, Laws of 1919—Defining food commodities and food warehousemen, declaring food warehousemen to be public utilities and subject to control and regulation by the Railroad Commission as specifically provided.

Chapter 304, Laws of 1919—Amending sections 2, 17 and 46 of the Public Utilities Act, declaring heat corporations to be public utilities and giving the Commission jurisdiction over rates and regulations.

Chapter 840, Laws of 1921—Adding section 6a to Chapter 213, Statutes of 1917, regulating auto stage companies, giving the Commission authority to require transportation companies to file under oath monthly, periodical or special reports; section 6b, relating to passes.

Chapter 280, Laws of 1919—Amending Chapter 213, Statutes of 1917, giving the Commission jurisdiction over the rates, service and securities of automobile transportation companies and exclusive control over their routes, dispensing with the requirement of operators securing permits from counties and municipalities.

Chapter 396, Laws of 1921—Making it the duty of steam railroad companies operating within the state to provide first medical aid to injured

passengers, employees or other persons and requiring employees to report after the use of medical supplies required to be furnished under the provisions of the act.

Chapter 900, Laws of 1921—Requiring railroad companies to provide and equip certain engine cabs with handrails and footboards for the safety and protection of railroad employees.

Chapter 902, Laws of 1921—Requiring railroad companies to provide safe clearance between engines and tenders by cutting an opening in the overhanging roof of engine cab permitting enginemen to safely go from the cab of engine to the top of tender.

Chapter 172, Laws of 1923—Amending section 1 of Chapter 80, Laws of 1913 (Regulation of Water Companies), excepting from the jurisdiction of the Railroad Commission certain sales of water during emergency water shortage periods, or sales merely as a matter of accommodation, but preserving the Commission's jurisdiction to determine matters of fact under such amendment.

Chapter 310, Laws of 1923—Amending section 5 of Chapter 213, Laws of 1917 (Auto Stage and Truck Transportation Act), providing for a fee of fifty dollars (\$50) to accompany applications for certificates of public convenience and necessity and for the sale or lease of automobile stage or truck operative rights, and excepting from the jurisdiction of the Railroad Commission the movement of products of husbandry from or to farms under certain conditions.

Chapter 387, Laws of 1923—Amending section 50 of the Public Utilities Act by providing that vessels operating on inland waters shall procure certificates of public convenience and necessity from the Railroad Commission, and that, pending a decision, the Commission may order cessation of the operation in question.

Chapter 388, Laws of 1923—Amending section 32 of the Public Utilities Act by giving the Commission power to determine the just and sufficient rates where two or more common carriers are operating in competition, and to prescribe uniform rates and charges to be collected by all such carriers.

Chapters 284, Laws of 1913; 499, Laws of 1915; 784, Laws of 1917; 900 and 902, Laws of 1921, all contain provisions relative to safety devices and appliances on locomotives. The amendment to the federal enactment known as the "Boiler Inspection Act" (36 Statutes at large, p. 913) as adopted by congress on March 4, 1915 (38 Statutes at large, p. 119), has extended the jurisdiction of the Interstate Commerce Commission not only to locomotive boilers but also to the entire locomotive and tender and all parts and appurtenances thereof. The federal enactment places exclusive jurisdiction with the Interstate Commerce Commission of all regulation and supervision of locomotives used by common carriers engaged in interstate commerce.

DEPARTMENTS OF THE COMMISSION.

The work of the Commission is divided into eight departments, as follows:

Secretary's department, having charge of general administration, docket and process, issuance of subpoenas, and all process of Commission correspondence, purchasing, finance and accounting, general office work and attesting documents and general publicity. Besides the

secretary there are eighteen employees in this department and the Recorder, having charge of publication, library, statistics and annual report. This division consists of the recorder and one stenographer.

Legal department, consisting of an attorney, one assistant attorney, two full time examiners, and two stenographers. (Several department heads are designated as examiners in addition to their other duties).

Reporting department, which makes a record of the proceedings in all formal hearings. It consists of one official reporter, three assistant reporters, two transcribers and one clerk.

Department of Finance and Accounts, which has charge of all accounting records, and in addition gives technical advice to the Commission in all matters relating to the issuance of stocks, bonds and securities. It consists of one financial expert, one chief accountant, two accountants, four clerks and two stenographers.

Rate department, has charge of the rates, both passenger and freight, on steam and electric railroads, express lines, on automobile lines, and the rates of wharves, and cold storage plants and warehouses. It consists of one rate expert, two assistant rate experts, two rate clerks and two stenographers.

Service department, having charge of the regulation of freight and passenger service on steam and electric railroads and charged with the investigation of accidents. This department consists of one service expert, and one assistant inspector.

Engineering department, under a chief engineer. The engineering department is divided into five divisions as follows:

Transportation division, steam and electric, street railroads, vessels and pipe lines, service and valuation. It is in charge of a transportation engineer, three assistant engineers and one draughtsman.

Hydraulic division, having charge of water supply, irrigation, service, rates and valuation. It consists of one hydraulic engineer and seven assistant engineers, one clerk and one stenographer.

Gas and electric division, dealing with gas, electricity and steam heat and is in charge of the gas and electric engineer, and employs seven assistant engineers, one clerk and two stenographers.

Telephone and telegraph division, consisting of one telephone and telegraph engineer, two assistant engineers and one stenographer.

General staff section has charge of general valuation and special work and consists of one valuation engineer, four assistant engineers, one clerk and four stenographers.

Automobile department, has charge of automotive transportation matters and consists of chief of department, assistant chief and one stenographer.

CHAPTER II.

THE YEAR'S WORK—STATISTICAL REPORT.

Tremendous development of California was indicated by the increase of public utility matters handled by the Railroad Commission during the fiscal year, July 1, 1922, to June 30, 1923.

The docket and process division of the secretary's department furnishes evidence that the high records of the post-war years, when the embargo on utility expansion was raised, were exceeded in all departments of the Commission's work in the effort to keep abreast with the demands made upon the Commission by the public.

Although both formal and informal proceedings showed substantial increases over the previous year, the Commission was able to handle the work with fewer hearings. Due to steadily increasing demands upon the Commission for the regulation of both new and old types of utilities, there were a total of 1669 public utility companies filing reports under its jurisdiction during the last fiscal period, as against 1403 the previous year.

The decisions and orders of the Railroad Commission furnish a vital record of the development of California in all lines of public service, and also constitute an authoritative interpretation of the laws of regulation of California utilities in their most advanced and successful application.

FORMAL PROCEEDINGS.

Applications and complaints coming before the Commission are classified as either formal or informal. Formal complaints, consisting of those prepared in the regular legal form, and calling for formal action by the Commission, numbered 148, as against 146 for the previous year. Formal applications numbered 1170, as against 1034 during the year preceding. Informal complaints received during the fiscal period reached the large total of 5493, as compared with 4950 the year before.

These informal complaints were divided between the two offices of the Commission as follows: San Francisco office, 2760; Los Angeles office, 2732.

HEARINGS HELD.

The total number of hearings held by the Commission during the fiscal year were 1074, as against 1088 the previous year. This was largely due to the increase in the number of matters handled *ex parte* by the Commission, necessitated by the growing volume of the work. Of these hearings 194 original hearings were held in the courtrooms of the Commission at San Francisco, 230 in the courtrooms at the Los Angeles office, and 284 in other places scattered throughout the entire state. There were, in addition to the foregoing, 229 adjourned hearings, 23 further hearings, and 14 rehearings.

As provided by the Public Utilities Act, under which the Commission functions and draws its chief powers, a single commissioner or examiner of the Commission may hear a matter, or all may sit *en banc* in important cases, but a majority of the Commission must unite in all decisions. These decisions are reached after full discussion and investigation by members of the Commission and its experts, whose work has proved to be exceedingly valuable and impartial, and the decisions and orders are published in permanent form.

In addition to these hearings the Commission held 248 meetings in the office at San Francisco, besides many conferences and informal business sessions.

FORMAL COMPLAINTS.

Table No. 1 shows the number of formal complaints filed with the Commission each year since January 1, 1911, the date of the reorganization of the Commission:

TABLE NO. 1.

Formal Complaints Filed with the Railroad Commission During the Fiscal Years Ending
June 30, 1912, to June 30, 1923.

January 1, 1911, to June 30, 1912, inclusive.....	168
July 1, 1912, to June 30, 1913, inclusive.....	138
July 1, 1913, to June 30, 1914, inclusive.....	209
July 1, 1914, to June 30, 1915, inclusive.....	194
July 1, 1915, to June 30, 1916, inclusive.....	145
July 1, 1916, to June 30, 1917, inclusive.....	136
July 1, 1917, to June 30, 1918, inclusive.....	150
July 1, 1918, to June 30, 1919, inclusive.....	80
July 1, 1919, to June 30, 1920, inclusive.....	131
July 1, 1920, to June 30, 1921, inclusive.....	170
July 1, 1921, to June 30, 1922, inclusive.....	146
July 1, 1922, to June 30, 1923, inclusive.....	148

Formal complaints, segregated as to subject matter and utility, are shown in the following table:

TABLE NO. 2.

Formal Complaints.

	Steam railroads.....	Electric railroads.....	Water carrier.....	Electric companies.....	Gas companies.....	Telephone and telegraph companies.....	Water companies.....	Auto stage companies.....	Total.....

Through rates—joint rates.....								1	1
Totals.....	34	7	1	8	13	24	19	42	148

FORMAL APPLICATIONS.

Formal applications totaled 1170, the largest number ever received in one year by the Commission, and 136 more than were received during the previous fiscal year. The number of formal applications filed with the Commission by years is shown by Table No. 3, as follows:

TABLE NO. 3.

Formal Applications Filed with the Railroad Commission During the Fiscal Years Ending
June 30, 1912, to June 30, 1923.

March 23, 1912, to June 30, 1912, inclusive.....	126
July 1, 1912, to June 30, 1913, inclusive.....	501
July 1, 1913, to June 30, 1914, inclusive.....	583
July 1, 1914, to June 30, 1915, inclusive.....	544
July 1, 1915, to June 30, 1916, inclusive.....	632
July 1, 1916, to June 30, 1917, inclusive.....	632
July 1, 1917, to June 30, 1918, inclusive.....	853
July 1, 1918, to June 30, 1919, inclusive.....	803
July 1, 1919, to June 30, 1920, inclusive.....	1,159
July 1, 1920, to June 30, 1921, inclusive.....	1,099
July 1, 1921, to June 30, 1922, inclusive.....	1,034
July 1, 1922, to June 30, 1923, inclusive.....	1,170

Classified according to subject and utility, the year's applications are grouped in Table No. 4, as follows:

TABLE NO. 4.

ANNUAL REPORTS FILED.

The Department of Finance and Accounts reports that during the year ending December 31, 1922, annual reports were received from 1669 public utilities as compared with 1403 for the preceding year. Reports were filed for the first time by 326 utilities, while 60 utilities ceased filing them. Nineteen companies submitted reports concerning hospital service. The tables follow:

CHAPTER III.

INFORMAL COMPLAINTS—DISPUTED BILLS.

The Railroad Commission was able to be of direct assistance to thousands of patrons of public utilities through the agency of the informal complaint service, maintained by the various departments of the Commission.

The high water mark in the number of informal complaints received and disposed of was reached during the fiscal period, July 1, 1922, to June 30, 1923. A total of 5493 such complaints was received by all departments. More than 5000 were disposed of through careful and understanding handling by men expert in ascertaining the true status of affairs, and impartial in the administering of them with a maximum of justice, and a minimum of friction between the different parties at issue.

This was an increase of 543 informal complaints over the number received during the preceding fiscal period, when 4950 were received by the Commission. This increase was largely due to the abnormal conditions in southern California, where the phenomenal growth of the population in the last three years has been greater than has ever been recorded in this state, or any other.

The tremendous growth and development of southern California, and especially of Los Angeles, has resulted in a demand for public utility service that has called upon the full resources of all public and municipal utilities to meet it. The telephone system in Los Angeles has virtually been rebuilt and doubled in capacity, with incidental disturbance of existing services, and a constant piling up of complaints of interrupted or delayed installation of service. The same conditions in a lesser degree have prevailed in the gas and electric fields in outlying communities throughout the state, but more especially south of the Tehachapi. The public also has been showing a constantly increasing appreciation of the service rendered by the Railroad Commission in the handling of informal complaints, with the result that the number of persons availing themselves of the service has shown a marked increase.

This has found expression in the grateful acknowledgment of a satisfied complainant, who caused to be published in the press an appreciation of this service, in which he stated that the Railroad Commission is the "big brother of the little consumer," and is constantly on the alert to aid the latter when in need of the assistance of a strong disinterested agency to obtain relief demanded in the case of alleged excessive bills, or failure to obtain desired service.

The informal complaints also serve a useful purpose in keeping the Commission in close touch with the individual patrons of public utilities throughout the state. Many matters are adjusted through this agency which otherwise would entail the expense and delay of a formal proceeding. In the average informal complaint the patron, or would-be patron, has a real or fancied grievance against the utility out of proportion to the importance of the real issue, and it requires tact and careful handling on the part of the Commission and a willingness on the part of the company to arrive at a happy adjustment.

It may be stated to the credit of the utilities that they are showing a rapidly increasing readiness to more than meet the Commission half way in its efforts to bring about an adjustment satisfactory to the patron, and equitable to the utility company.

The informal complaint service of the Commission has frequently demonstrated to the companies that it is more important to the utility to have a satisfied clientele than to exact the last penny in settlement of a bill of dubious nature, or the arbitrary enforcement of a rule of service, or extension of its lines or mains.

A gratifying feature of the handling of these informal complaints by the experts of the Commission is the fact that 75 per cent of all complaints during the last fiscal year have been settled favorably to the complainants, and in the bulk of the remainder the patron cheerfully accepted the adjustments of the Commission, even though not favorable to his or her claim.

An account of the number of informal complaints handled by the various departments of the Commission will be found included in the respective chapters of this report.

METHOD OF PROCEDURE.

Informal complaints may be made by telephone, letter, postal card or personal interview, it being the design of the Commission to make this department readily accessible to the public and free of technical procedure. The procedure is defined as follows:

Whenever an informal or correspondence complaint is filed, the matter is at once referred to the appropriate department, which takes up the matter with the utility affected, either by letter or in person, to see whether an adjustment can not be made voluntarily. If necessary a representative of the Railroad Commission travels to the locality affected to secure first-hand information and an adjustment, if possible. While the Commission can not without the formal hearing, at which the public utility has its day in court, compel a public utility to take action on any complaint, the Commission has been successful in a large majority of informal complaints in securing an adjustment without the necessity of formal proceedings.

INFORMAL COMPLAINTS BY YEARS.

Since the handling of informal complaints was made a departmental function on January 1, 1912, such complaints, including 5493 for the year under review, reached a total of 35,739, distributed according to fiscal years, as follows:

January 1, 1912, to June 30, 1912, inclusive.....	245
July 1, 1912, to June 30, 1913, inclusive.....	1,381
July 1, 1913, to June 30, 1914, inclusive.....	2,288
July 1, 1914, to June 30, 1915, inclusive.....	2,382
July 1, 1915, to June 30, 1916, inclusive.....	3,039
July 1, 1916, to June 30, 1917, inclusive.....	2,644
July 1, 1917, to June 30, 1918, inclusive.....	2,423
July 1, 1918, to June 30, 1919, inclusive.....	2,342
July 1, 1919, to June 30, 1920, inclusive.....	2,663
July 1, 1920, to June 30, 1921, inclusive.....	4,888
July 1, 1921, to June 30, 1922, inclusive.....	4,950
July 1, 1922, to June 30, 1923, inclusive.....	5,493
Total.....	35,739

SEGREGATION OF COMPLAINTS.

Segregated according to subject and utility, complaints for the period from July 1, 1922, to June 30, 1923, are shown in the following tabulation:

INFORMAL COMPLAINTS FILED WITH THE RAILROAD COMMISSION, YEAR ENDING JUNE 30 1923.

	Telephone and telegraph companies	Electric companies	Steam railroad companies	Water companies	Gas companies	Auto stages and truck lines	Electric railroad companies	Water carriers	Warehouses	Express companies	Street car companies	Wharves	Cold storage companies	Steam heat companies	Total

DISPUTED BILLS.

The Railroad Commission performs another valuable service to public utility patrons through the adjustment of disputed bills. Since 1916 the Commission has discontinued the practice of public utilities of discontinuing service to a consumer on account of nonpayment of a disputed account for service rendered. Under the rules of the Railroad Commission the consumer may deposit the amount of the disputed bill with the Commission, pending an adjustment of the claim. The Commission's experts make a painstaking investigation into all such accounts, and after determining the equitable amount to which the utility is entitled, distributes the deposit in conformity with this finding. This prevents injustice to the consumer, and assures the public utility receiving proper remuneration for the service actually rendered. Since this procedure was inaugurated in 1916 many thousands of dollars have been refunded to consumers who were found by the Commission to be entitled to receive the same.

Following is a statement showing the number of deposits received for disputed bills by years since May 23, 1916:

May 23, 1916, to June 30, 1916, inclusive	76
July 1, 1916, to June 30, 1917, inclusive	173
July 1, 1917, to June 30, 1918, inclusive	157
July 1, 1918, to June 30, 1919, inclusive	347
July 1, 1919, to June 30, 1920, inclusive	253
July 1, 1920, to June 30, 1921, inclusive	330
July 1, 1921, to June 30, 1922, inclusive	496
July 1, 1922, to June 30, 1923, inclusive	340
Total	2,172

Deposits received for the period of July 1, 1922, to June 30, 1923, inclusive, tabulation as to class of utilities and amounts were as follows:

Class of utility	Number of Deposits	Amount
Electric.....	68	\$5,898 34
Gas.....	71	2,643 11
Gas and electric.....	14	470 67
Water.....	83	8,422 02
Telephone.....	102	3,187 52
Steam.....	1	12 50
Telegraph.....	1	71 00
Totals.....	340	\$20,705 16

INFORMAL COMPLAINTS.

The Commission receives hundreds of informal complaints concerning the rates and practices of public utilities and the Rate Department handled informal complaints for the last fiscal year as follows:

Railroads.....	322
Automotive.....	68
Warehouses.....	7
Wharves.....	1
Electric railways.....	28
Carriers by water.....	21
Express companies.....	14
Cold storage warehouses.....	2
Total.....	463

The Rate Department is the medium of communication between the public and the carriers in all informal matters, and a representative appears at formal hearings to examine witnesses of all litigants in order to bring out all of the facts regarding each individual case. The Rate Department is in daily conference with the public and the carriers in regard to matters coming within the purview of its jurisdiction and many complaints are thus satisfactorily and amicably settled which would otherwise reach a formal stage. In many instances, by a proper explanation to a complainant the complaint is withdrawn. On the other hand, where a meritorious complaint is made the carriers often remove the cause informally at the simple request of the Commission.

The total number of informal complaints handled by the gas and electric division continues to increase, but it is noticeable that complaints containing charges of a serious nature are diminishing. Gas, electric and steam utilities with few exceptions are now governed in their relations with consumers by uniform rules and regulations formulated in accord with the views of the Commission. The excellent spirit of co-operation now existing between these utilities, the Commission, and the many civic bodies interested in public welfare has also done much toward removing causes for serious complaint.

The number of informal complaints, and routine matters coming before this division during the fiscal year ending June 30, 1923, is as follows:

Number of informal complaints received.....	1,378
Number of informal complaints disposed of.....	1,012
Miscellaneous written inquiries.....	3,758
Persons calling at office of division relative to informal matters.....	4,128
Letters written by division on informal matters.....	5,670
Amount deposited by consumers pending adjustment of bills.....	\$8,912.12

The above figures do not include several hundred complaints made to the Commission by telephone, which, in turn, were handled with the companies by telephone.

Of the 1378 informal complaints received by the gas and electric division, nearly 75 per cent were decided in favor of the consumers, the balance being either withdrawn by the complainants or adjusted in favor of the utilities. The average time elapsing between receipt and settlement of a complaint was ten days. This short time is worthy of note, as many of the complaints involved personal investigation and some developed correspondence more voluminous than that of many formal matters.

The informal complaints received can be classified into those involving the quality of service, those attacking rate schedules, those protesting against the refusal of companies to extend gas or steam mains and electric lines, and those questioning the fairness of individual bills. This classification is as follows:

	Gas	Electric	Steam	Total
Service conditions.....	187	212	1	400
Rates.....	26	70	2	98
Extensions.....	240	305	2	547
Excessive bills.....	163	169	1	333
Totals.....	616	756	6	1,378

COMPLAINTS ON PERCENTAGE BASIS.

Below are shown the record of the larger companies in the matter of complaints. A comparison is drawn by reducing the total number of complaints to the number per thousand consumers.

TOTAL GAS, ELECTRIC AND STEAM COMPLAINTS.

COMPLAINTS AND OTHER MATTERS HANDLED INFORMALLY.

The informal complaint is the means whereby the consumer of small quantities of water may have his differences investigated by the Commission without the formality, expense and delay of a formal complaint. If it were necessary for the Commission to hold a public hearing in connection with an informal complaint, the average complainant would probably let the matter drop rather than go to this trouble, as most people have a natural aversion to anything in the nature of court procedure. Realizing this, the hydraulic division in handling informal complaints invariably endeavors to be of as much service as possible to the informal complainant. Investigations by the hydraulic engineers are frequently required, and extremely careful consideration is necessary in determining an equitable solution of the difficulties of the consumer who is not familiar with the practices of the Commission or the utilities.

Frequently complaints which at first appear small, later assume considerable proportions, and upon investigation it may be found that a large portion of the plant of the utility complained of is of insufficient capacity to render adequate service. In many instances, upon the recommendation of the investigating engineer, utilities have made improvements in their systems amounting to thousands of dollars.

In some cases a complaint will be made questioning the right of a utility to collect the cost of making extensions of mains, or of installing service connections and meters. Upon investigation it has frequently

been found that the utility in question has not been following the orders of the Commission, which prohibit the collection of such charges. In one instance recently, a utility was required to refund cash deposits to 412 consumers amounting to from \$2.50 to \$10 each.

The work of the division in settling informal complaints and in adjusting disputes which are constantly arising is of great benefit not only to the general public but also to the utilities.

Considerable work has been done recently by this division in standardizing rules and regulations of the water utilities of the state, and a set of rules has been worked out which in general meets the needs of the average domestic water company. On account of the local or peculiar conditions existing in the case of some utilities, special rules are necessary, but in the main the companies are adopting the standard rules almost without alteration.

Schedules of rates, rules and regulations of fifty utilities were filed with the Commission during the fiscal year and were analyzed, checked and accepted for filing by the hydraulic division.

The following classification shows the nature and number of informal complaints filed during the year:

Service.....	165
Extensions of mains.....	100
Rates.....	62
Bills.....	47
Deposits to guarantee payment of bills.....	9
Cash deposits made with the Commission on account of disputed bills.....	83
Miscellaneous.....	13
Totals.....	479

INFORMAL TELEPHONE COMPLAINTS.

The Commission has had before it an extremely large number of informal telephone complaints for decision. The rapid growth of the Pacific coast has created a large demand for telephone service and as a result some of the utilities have had difficulty in maintaining a construction program to keep pace with this growth. This condition to a large degree has been responsible for a large number of the complaints received. During the past fiscal year telephone and telegraph division has decided 1138 informal complaints which work, together with the formal work, has required of this division the writing of over 9700 letters. Over 89 per cent of the informal decisions made in these complaints has been favorable to the complainant.

A segregation of these complaints decided during the past year are shown in the table following:

Nature of complaints	Number of complaints
Service.....	216
Rates.....	47
Installation of service.....	723
Bills.....	25
Refunds.....	106
Loss.....	5
Competition.....	2
Deposits.....	11
Right of way franchises.....	3

CHAPTER IV.

SECURITY ISSUES.

During the twelve months ended June 30, 1923, the Railroad Commission passed upon applications involving the issue of \$151,045,555.91 of stock, bonds, notes and other evidences of indebtedness. It authorized the issue of \$144,860,030.91 of securities, as compared with \$188,401,250.99 for the year ending June 30, 1923. It denied applications for permission to issue \$206,150 of securities and dismissed applications involving the issue of \$5,979,375, as compared with \$570,253 and \$1,113,610 respectively, for the year ending June 30, 1922. The action of the Commission may be shown by the following tabulation:

	Year ending June 30, 1922	Year ending June 30, 1923
Applications granted.....	\$188,401,250 99	\$144,860,030 91
Applications denied.....	570,253 00	206,150 00
Applications dismissed.....	1,113,610 00	5,979,375 00
Totals.....	\$190,085,113 99	\$151,045,555 91

PERIOD OF SUPERVISION.

From July 1, 1922, to June 30, 1923, public utilities filed with the Commission applications for permission to issue \$148,059,405.91 of stock, bonds, notes and certificates, as compared with \$198,105,063.99 for the preceding twelve months' period.

From March 23, 1912, the effective date of the Public Utilities Act, to June 30, 1923, the Railroad Commission passed upon applications for permission to issue \$1,665,878,954.12 of securities, which were disposed of as follows:

Applications granted.....	\$1,503,279,895 08
Applications denied.....	81,663,220 04
Applications dismissed.....	80,935,839 00
Total.....	\$1,665,878,954 12

The securities authorized consist of the following:

Stock.....	\$585,339,748 39
Bonds.....	761,437,219 73
Notes.....	128,584,087 96
Certificates—equipment trust.....	27,918,839 00
Total.....	\$1,503,279,895 08

The amount of securities which different classes of utilities have been authorized to issue is shown in the following tabulation:

Steam railroad companies.....	\$347,227,214 89
Electric railways.....	135,799,557 00
Gas and electric companies.....	714,700,658 90
Water companies.....	140,214,056 47
Telephone and telegraph companies.....	79,902,185 82
Warehousemen.....	11,429,325 00
Car companies.....	160,000 00
Pipe line companies.....	59,753,433 00
Carriers by water.....	9,015,134 00
Automotive companies.....	5,078,330 00
Total.....	\$1,503,279,895 08

APPLICATIONS PENDING JUNE 30, 1923.

In the applications pending before the Commission on June 30, 1923, public utilities asked permission to issue \$6,840,109.79 of securities. The relation of the securities pending on June 30, 1923, to those pending on June 30, 1922, is as follows:

Pending June 30, 1922.....	\$9,826,259 79
Filed during the year ending June 30, 1923.....	148,059,405 91
Subtotal.....	\$157,885,665 70
Applications acted upon during the year.....	151,045,555 91
Applications pending on June 30, 1923.....	\$6,840,109 79

In amount, about 80 per cent of the applications pending on June 30, 1923, were filed during June of this year.

AUTHORIZATIONS DURING LAST TWO YEARS.

During the last two years the various classes of public utilities were authorized to issue stock, bonds, notes and other evidences of indebtedness as follows:

Class	Year ending June 30, 1922	Year ending June 30, 1923
Steam railroads.....	\$4,283,700 00	\$13,959,100 00
Electric railways.....	2,435,175 00	475,000 00
Gas and electric companies.....	114,517,429 97	95,935,157 91
Water companies.....	13,485,474 02	24,494,163 00
Telephone and telegraph companies.....	51,679,220 00	935,495 00
Warehousemen.....	480,700 00	5,714,010 00
Carriers by water.....	510,197 00	1,144,000 00
Automotive companies.....	1,009,355 00	2,203,105 00
Totals.....	\$188,401,250 99	\$144,860,030 91

The purposes for which the public utilities were authorized to issue securities and amounts for each purpose are shown by the following table:

Class	Year ending June 30, 1922	Year ending June 30, 1923
Additions and betterments.....	\$148,925,206 53	\$88,677,609 00
Refunding.....	19,075,793 06	39,796,618 00
Collateral.....	16,053,786 40	14,670,000 00
Reorganization.....	4,330,465 00	1,715,803 91
Miscellaneous.....	16,000 00	-----
Totals.....	\$188,401,250 99	\$144,860,030 91

Reducing the foregoing figures to a percentage basis, one arrives at the following:

Item	Year ending June 30, 1922, per cent	Year ending June 30, 1923, per cent
Additions and betterments.....	79.04	61.22
Refunding.....	10.00	27.47
Collateral.....	8.52	10.13
Reorganization.....	2.29	1.18
Miscellaneous.....	.03	-----
Totals.....	100.00	100.00

TABULATION OF ISSUE OF SECURITIES.

The tables following show the Commission's action during the year and the names of utilities which have been authorized to issue stock, bonds, notes and equipment trust certificates.

Table No. 1 shows the total amount of stock, bonds, notes and certificates of indebtedness applied for, authorized, denied and dismissed during the year ending June 30, 1923, and the amount pending on June 30, 1923, segregated as to classes of utilities.

Table No. 2 sets forth the same information segregated as to purpose of issue and class of utility.

Table No. 3 shows the amount of stock, bonds, notes and certificates of indebtedness of steam railroad companies applied for, authorized, denied and dismissed during the year ending June 30, 1923.

Table No. 4 shows the amount of stock, bonds and certificates of indebtedness of electric railway companies applied for, authorized, denied and dismissed during the year ending June 30, 1923.

Table No. 5 shows the amount of stock and notes of automotive companies applied for, authorized, denied and dismissed during the year ending June 30, 1923, and pending on June 30, 1923.

Table No. 6 shows the amount of stock, bonds and notes of gas and electric companies applied for, authorized, denied and dismissed during the year ending June 30, 1923, and the amount pending on June 30, 1923.

Table No. 7 shows the amount of stock, bonds and notes of water companies applied for, authorized, denied and dismissed during the year ending June 30, 1923, and the amount pending on June 30, 1923.

Table No. 8 shows the amount of stock, bonds and notes of telephone and telegraph companies applied for, authorized, denied and dismissed during the year ending June 30, 1923, and pending on June 30, 1923.

Table No. 9 shows the amount of stock, bonds and notes of carriers by water applied for, authorized, denied and dismissed during the year ending June 30, 1923.

Table No. 10 shows the amount of stock, bonds and notes of warehousemen applied for, authorized, denied and dismissed during the year ending June 30, 1923.

TABLE NO. 1.

SHOWING THE AMOUNT OF STOCK, BONDS, NOTES AND OTHER EVIDENCES OF INDEBTEDNESS APPLIED FOR, AUTHORIZED, DENIED AND DISMISSED BY THE RAILROAD COMMISSION OF THE STATE OF CALIFORNIA FROM JULY 1, 1922, TO JUNE 30, 1923, AND PENDING BEFORE THE RAILROAD COMMISSION ON JUNE 30, 1923.

PERCENTAGES.

Of the securities applied for, 33.50 per cent represented stock, 62.14 per cent bonds, .46 per cent notes and 3.90 per cent certificates of indebtedness.

Of the securities authorized, 29.11 per cent represented stock, 66.69 per cent bonds, 3.98 per cent notes and .22 per cent certificates.

Of the securities denied, 96.80 per cent represented stock and 3.20 per cent notes.

Of the securities dismissed, 92.26 per cent represented stock, .97 per cent bonds and 6.77 per cent notes.

Of the securities pending on June 30, 1923, 87.40 per cent represented stock, 12.31 per cent bonds and .29 per cent notes.

ADDITIONS AND BETTERMENTS.

During the year ending June 30, 1923, the Commission authorized \$88,677,609 of securities to be issued for the purpose of financing the cost of acquiring and constructing public utility properties. This amount is segregated to various classes of utilities as follows:

Steam railroads.....	\$13,860,000 00
Electric railways.....	375,000 00
Gas and electric companies.....	64,292,731 00
Water companies.....	826,600 00
Telephone and telegraph companies.....	859,295 00
Warehousemen.....	5,535,350 00
Water carriers.....	969,000 00
Automotive companies.....	1,959,633 00
Total.....	\$88,677,609 00

The construction of hydro-electric and gas plants and appurtenances and the enlargement and extension of existing facilities and services required the issue of approximately 73 per cent of the total amount of securities authorized. Every large electric and gas utility has been engaged in increasing its plant generating capacity. On December 31, 1922, the total electric generating plant capacity is reported at 1,180,985 kilovolt amperes as compared with 1,061,825 kilovolt amperes on December 31, 1921. At the close of 1922 the number of electric consumers are reported at 805,771 as compared with 716,191 on December 31, 1921. The number of kilowatt hours of electric energy sold during 1922 is reported at 3,371,676,792 and during 1921 at 3,115,053,316. The number of gas consumers are reported at 821,143 on December 31, 1922, and at 731,492 on December 31, 1921. During 1922 gas utilities report 93,551,956,517 cubic feet of gas sold as compared with 74,439,857,174 cubic feet during 1922.

In the extreme northern part of the state the California-Oregon Power Company during the last year has been engaged in installing an additional unit in its Copeo hydro-electric plant, in raising its Copeo Dam, in building its Link River Dam in Oregon and in constructing a transmission line from Prospect, Oregon, to Eugene, Oregon, to connect with the Mountain States Power Company. To finance a portion of this construction work, the company during the twelve months ending June 30, 1923, was authorized to issue and sell \$1,000,000 of 7 per cent preferred stock.

Pacific Gas and Electric Company was authorized to issue and sell \$7,500,000 of its 6 per cent preferred stock, \$693,231 of common stock and \$10,000,000 of bonds to finance the cost of construction work. The company and its subsidiary, Mount Shasta Power Corporation,

are expending large sums of money in developing additional hydro-electric generating plants along the Pit River in Shasta County. During the past year it has placed in operation its Pit River Plant No. 1 with an installed capacity of 93,834 horsepower. It has undertaken the construction of its Pit River Power House No. 3 which, when completed, will have an installed capacity of more than 100,000 horsepower.

Southern California Edison Company, during the year, was authorized to sell \$15,417,000 of bonds in addition to the amount of common stock heretofore authorized, which has been sold during the same time. The company has throughout the year continued work on its Big Creek development. Its Big Creek Power House No. 3 was placed in operation during the latter part of 1923. This plant has a generating capacity of 100,000 horsepower.

The Great Western Power Company of California, which during 1922 completed its initial Caribou development, was authorized to issue \$4,000,000 of 7 per cent preferred stock to take care of ordinary expenditures for additions and betterments and for paying in part the cost of its Valona-Golden Gate transmission line and its Golden Gate substation near Albany, Contra Costa County, and at a third unit to its Caribou plant.

Western States Gas and Electric Company was authorized to issue \$500,000 of preferred stock and \$267,000 of bonds to finance the cost of additions and betterments. The company through its subsidiary, El Dorado Power Company, is engaged in constructing a new hydro-electric plant on the American River, which, when completed, will have an ultimate capacity of 100,000 horsepower. Additional water reserves developed will also be available for the operation of the existing plant which may be enlarged to a capacity of approximately 56,000 horsepower.

Of the other large gas and electric utilities, San Joaquin Light and Power Corporation was authorized to issue \$2,433,000 of bonds; San Diego Consolidated Gas and Electric Company \$1,768,000 of stock and \$1,438,000 of bonds; Los Angeles Gas and Electric Corporation, \$3,000,000 of stock and \$4,000,000 of bonds; Southern California Gas Company, \$1,000,000 of stock and \$4,500,000 of bonds.

The Commission authorized The Western Pacific Railroad Company to issue \$5,500,000 of bonds to pay for additional properties. Subsequently it was decided not to issue these bonds and the Commission in a later proceeding authorized the company to issue in lieu of the bonds \$5,600,000 of 5½ per cent serial equipment trust certificates, to pay for 2000 30-ton steel refrigerator cars, 100 steel automobile cars, 6 freight locomotives, 100 logging cars, 20 passenger cars, 8 dining cars and 20 baggage cars.

Outer Harbor Dock and Wharf Company, which owns terminal properties in Los Angeles Harbor, was authorized to issue \$4,850,000 of stock for development purposes.

REFUNDING.

In the preceding annual report attention was called to the refunding of high interest-bearing securities through the issue of low interest-bearing securities. The amount of securities issued for refunding purposes during the twelve months ending June 30, 1922, amounted to \$19,075,793; for the twelve months ending June 30, 1923, the Commission authorized the issue of \$39,796,618 of securities for similar purposes. In the latter

year the Commission authorized Spring Valley Water Company to issue \$22,000,000 of 20-year 5 per cent bonds to refund \$750,000 of 5 per cent notes due February 1, 1923, \$2,500,000 of 6 per cent notes due March 1, 1923, and \$17,859,000 of 4 per cent general mortgage bonds due December 1, 1923.

The Commission also authorized Western States Gas and Electric Company to issue \$5,000,000 of 6 per cent notes due October 1, 1937, and to use the proceeds to refund \$1,199,000 of 6½ per cent collateral trust notes due August 1, 1923, and \$2,668,000 of 6 per cent notes due February 1, 1927.

Southern California Edison Company was authorized to issue \$9,500,000 of its new 7 per cent cumulative nonparticipating preferred stock for the purpose of refunding the outstanding second preferred stock amounting to \$12,059,000.

COLLATERAL.

Recent mortgages executed by some of the utilities contained provisions by which the companies covenant not to sell any more underlying bonds but to deposit such bonds when and as issued with the trustees under the new mortgages. This form of financing accounts for all of the \$14,670,000 of bonds authorized to be deposited as collateral during the year ending June 30, 1923.

REORGANIZATION.

As in the preceding year, there were no large public utility reorganizations. San Diego Electric Railway was authorized to acquire the properties of Point Loma Railroad; Coast Counties Gas and Electric Company to acquire the properties of Contra Costa Gas Company; Pacific Gas and Electric Company to purchase the outstanding stock of California Telephone and Light Company; Coast Valleys Gas and Electric Company to acquire the properties of Del Monte Power Company. The amounts of stock and bonds authorized by the Commission for these purposes aggregated \$1,715,803.91.

COMMISSION'S DECISIONS.

The Commission's decisions authorizing the issue of stock, bonds, notes and other evidences of indebtedness are published in pamphlet form and also in volumes entitled "Opinions and Orders of the Railroad Commission of California." Attention is called to a few of these decisions.

REIMBURSEMENT OF TREASURY.

In application No. 8452, Southern Counties Gas Company of California applied for permission to issue \$750,000 of its common capital stock to reimburse its treasury because of surplus earnings invested in properties. The order of the Commission in commenting upon this request contains the following language:

An order authorizing applicant to issue stock to reimburse its treasury requires a determination of the sources from which applicant has obtained the moneys expended. Applicant's balance sheet as of October 31, 1922, shows a surplus of \$938,740.37, an amount in excess of the \$750,000 of stock which it desires to issue. The \$938,740.37 has been invested in property. But an analysis of applicant's financial statements shows that the surplus was built up in part because prior to 1918 applicant included very small amounts in its operating expenses on account of depreciation. Had applicant made proper allowance in its operating expenses for depreciation, it would not

have the surplus reported on October 31, 1922. The Commission's engineering department has reviewed applicant's "Exhibit 4" and reports that applicant, as of December 31, 1921, should have had in its reserve for accrued depreciation \$1,160,682.01 instead of \$616,010.97 as reported by applicant. It therefore appears that applicant, assuming its depreciation allowance during 1922 to have been correct, had on October 31, 1922, really a surplus of only \$385,069.29 instead of \$938,740.37. Applicant should transfer from its surplus for accrued depreciation a sum sufficient to bring its reserve for accrued depreciation as of December 31, 1921, up to \$1,160,682.01. The reserve for accrued depreciation should be built up by the transfer of the necessary amount from applicant's accumulated surplus rather than from future earnings. On the condition that the transfer is made, the Commission will permit applicant to issue \$375,000 of stock to reimburse its treasury and distribute such stock as a dividend.

REFUNDING OF FUNDED DEBT THROUGH ISSUE OF STOCK.

By Decision No. 11061, dated October 5, 1922, the Commission authorized East Bay Water Company to issue and sell \$184,363 of Class "A" 6 per cent preferred stock and to use the proceeds to reimburse its treasury for monies used in making sinking fund payments. The Commission's decision, written by Commissioner Martin, recites that in a former decision the Commission declared that "there was no objection to the refunding of funded debt through the issue of stock, provided the company's properties were reasonably capitalized. If the capitalization is in excess of the reasonable value of the properties, surplus earnings should be used to pay funded debt and no stock issued to reimburse the treasury because such earnings were used to meet sinking fund requirements."

SELLING PRICE OF BONDS.

In Application No. 7942, Bay Transport Company, a corporation, operating steamers, barges and tugs as a common carrier on San Francisco Bay, applied for permission to issue and sell at 90 \$175,000 of 10-year 7 per cent bonds. The Commission's opinion comments on the proposed price as follows:

While a company operating under circumstances, such as applicant, may not be able to sell its bonds on a 6 per cent basis, nevertheless I do not believe that this Commission should, under present money market conditions, authorize the sale of a 10-year 7 per cent bond, callable at 110, at a price of not less than 90 and accrued interest. Unless applicant can sell its bonds on a basis of 8 per cent or better, I do not believe that its present indebtedness should be refunded through the sale of bonds. The order herein will require applicant to sell its 7 per cent bonds for cash at not less than 93.2 per cent of face value and accrued interest.

DEFERRED PAYMENTS ON SALE OF STOCK.

During the year Pittsburg-Sacramento Auto Ferry, a corporation, newly organized for the purpose of operating an auto ferry between Pittsburg and the shore of Solano County, applied for permission to issue and sell stock, it being the intention of the company to sell the stock upon the installment plan and accept notes for deferred payments. The Commission, however, did not look with favor upon the company accepting notes for such deferred payments and comment was made in the opinion and order as follows:

The company expects that a portion of its stock will be sold under stock subscription agreements providing for payment in installments. At the hearing reference was made of applicant accepting notes for deferred payments. The Commission does not look with favor on the company's requiring notes for balances due on stock subscriptions. If the subscriber is unable to make full cash payment, the subscription agreement will show the balance due and there should be no necessity to make him give a note for the remainder. It is, of course, understood that no stock shall be delivered until fully paid.

CAPITALIZATION OF NONPUBLIC UTILITY PROPERTIES.

The Commission in Application No. 8532 was asked to make an order authorizing Gray Warehouse Company to issue \$25,300 of stock for the purpose of acquiring nonpublic utility property and business. Although the record in the case showed that the company did not intend to engage in public utility business, there was a possibility that at some future time its operations might be extended and come under the jurisdiction of the Railroad Commission. For this reason an application was filed here. The Commission in making its order granted permission to issue the stock but required the company to file for approval a stipulation authorized by applicant's board of directors and declared that it, its successors and assigns would never urge or ask the Railroad Commission or other public body having jurisdiction to include in a rate base such an amount of the stock authorized as may be used to acquire or as may be represented by nonpublic utility properties.

CAPITALIZATION OF GOOD-WILL.

Upon several occasions during the past year the Commission has been called upon to authorize the issue of stock against good-will and other intangible values. The Commission, however, has firmly adhered to the policy of refusing to permit the issue of stock against good-will or going concern value.

In Application No. 8614 the Dillingham Transportation Company applied for permission to issue \$10,000 of stock to its incorporators for good-will and going concern value. In support of this request it alleged that its service was started during the early part of 1918 with one passenger stage, that patronage at first was small and the operations unprofitable. From time to time the lines and service were extended, new operative rights secured, extensive advertising was done, traffic arrangements were made with other carriers and the business was built up until at present there are in use twelve stages. While the Commission denied the request of applicant to issue stock against good-will it recognized that the company's incorporators incurred some expense in establishing the business and accordingly authorized the issue of \$3,000 of stock on account of promotion expenses.

ISSUE OF BONDS BY A UTILITY OPERATING IN NEVADA.

Winnemucca Water and Light Company, a public utility, supplying light, water and power in Winnemucca, Nevada, during the year filed an application with this Commission for permission to issue and sell \$115,000 of bonds. The reason for entertaining this application is shown in the following excerpt from the Commission's decision:

Applicant's plants and properties are all located in the State of Nevada. The Railroad Commission has made no appraisal of applicant's properties, and it has no jurisdiction over applicant's rates or service. The only reason why the Railroad Commission has received this application is the fact that applicant is organized under the laws of the State of California. Inasmuch as by section 52 of the Public Utilities Act of this state, all stocks, bonds, notes or other evidences of indebtedness issued "by any public utility * * * shall be void," unless authorized by this Commission, we have considered this application and in order to remove any possible doubt as to the validity of the bonds, we now enter an order authorizing their issue.

CHAPTER V.

FINANCIAL CONDITION OF UTILITIES.

During the year ending December 31, 1922, the operating revenues of steam railroads, electric railways, gas, electric, water, telephone and telegraph companies, carriers by water, wharfingers and warehousemen, and auto stages, filing annual reports with this Commission, totaled \$818,244,553.28, as compared with \$792,492,772.85, for the year ending December 31, 1921; the increase amounting to \$25,751,780.43. During the same period operating expenses increased \$2,660,103.61, being \$602,976,460.30 in 1922 and \$600,316,356.69 in 1921. The net operating revenues increased \$23,091,676.82, the total figure for the year 1922 being \$215,268,092.98. In 1920 the net operating revenues were reported as \$192,176,416.16; in 1919 \$165,276,767.74; in 1918 \$156,903,892.79. The operating revenues derived from auto stage lines in 1922 are reported at \$15,549,349.94, operating expenses as \$14,322,725.34 and net operating revenue as \$1,226,624.60. Of the gross revenues \$8,917,563.13 was obtained from passenger business, \$4,454,409.25 from freight business and \$2,177,377.56 from express, baggage, mail and other business. These figures are obtained from all the reports filed by auto stage companies with the Commission for the year 1922, whereas those obtained in the reports for the year 1921 were obtained from companies having operating revenues in excess of \$20,000 only.

Steam railroads for the calendar year 1922 report operating revenues of \$436,523,892.96 and operating expenses of \$317,780,349.57, leaving net operating revenue of \$118,743,543.39, as compared with net revenues in 1921 of \$115,496,439.67. These figures, however, include total earnings of The Atchison, Topeka and Santa Fe Railway Company, Los Angeles and Salt Lake Railway Company, Southern Pacific Company, The Western Pacific Railroad Company, Nevada-California-Oregon Railway Company and Tonopah and Tidewater Railroad Company, all of which companies are engaged in interstate as well as intrastate business. The reports show the gross revenues from business within California as \$173,932,697.33; expenses \$127,210,188.76; and net operating revenues \$46,722,508.57, as compared with \$42,199,000 in 1921 and \$29,945,000 in 1920.

Electric railway companies report operating revenues of \$55,238,182.57, operating expenses of \$41,037,553.27 and net operating revenues as \$14,200,269.30. Income from auxiliary and non-operating sources is reported at \$889,455.58. After paying taxes and interest and after making other deductions from income the companies report \$2,343,668.38 available for dividends and surplus.

Water companies for 1922 report operating revenues of \$14,867,147.17 in 1922 as compared with \$13,310,699.10 in 1921. Their net operating revenues for 1922 are reported at \$5,662,781.14 as compared to \$4,360,-

665.47 for 1921. Net profits, that is, the amount transferred to corporate surplus and available for dividends are reported as \$3,350,121.83 and \$2,295,448.05 for 1922 and 1921 respectively.

Electric light and power companies for 1922 report revenues of \$69,322,631.48, operating expenses of \$40,048,764.25 and net operating revenues of \$29,273,867.23 as compared with \$65,461,913.88, \$40,083,498.78 and \$25,378,415.10 respectively in 1921. Net profits available for dividends are reported as \$13,361,590.45 in 1922 and \$10,688,173.66 in 1921.

Gas companies for 1922 report operating revenues of \$39,963,480.27 as compared with \$35,664,937.75 for 1921. Their net operating revenues for 1922 are reported at \$9,201,570.73 and net profits available for distribution as dividends at \$6,406,396.64. In 1921 this class of utility reported net operating revenues of \$6,610,028.60 and net profits of \$4,558,707.16.

The gross revenues of telephone and telegraph companies filing annual reports with the Commission were reported at \$156,196,338.64 for 1922, as compared with \$148,708,212.09 for 1921. Net operating revenues were reported as \$34,290,421.92 and \$28,215,705.62 for 1922 and 1921, respectively. There are included in the above figures, however, the entire revenues of The Pacific Telephone and Telegraph Company and of the Western Union Telegraph Company, which companies do business outside of the state as well as within, and do not segregate in reports filed with the Commission their revenues to the several states in which they operate. The gross revenues of the former company for 1922 are reported at \$36,512,530.98, operating expenses at \$25,932,735.92 and net revenues at \$10,579,795.06. After paying taxes, interest and other deductions and after taking nonoperating income into consideration, the company reports net income for the period of \$5,648,530.23, of which amount \$2,670,000 was distributed as dividends and \$2,978,530.23 was carried to surplus. The Western Union Telegraph Company reports its gross revenues as \$105,447,748.43, net revenues as \$22,750,911.60 and net income available for dividends as \$13,205,351.90.

Carriers by water, wharfingers and warehousemen in their reports filed with the Commission show gross revenues of \$30,583,530.25 for 1922 and net revenues as \$2,668,654.67. For 1921 these accounts are reported as \$24,078,026.63 and \$335,682.41 respectively.

OPERATING REVENUES OF UTILITIES.

Table No. 12, which follows, contains a summary of the operating revenues, operating expenses and net operating revenues of public utilities filing reports with the Railroad Commission for the year 1922. Part two of this report contains detailed information relating to the operating revenues, other income, operating expenses and other disbursements. The tables show the amount of interest accrued and dividends declared during 1922.

TABLE NO. 12.

SUMMARY OF OPERATING REVENUES AND EXPENSES AND NET OPERATING REVENUES OF PUBLIC UTILITIES REPORTING TO THE RAILROAD COMMISSION, 1921-1922.

	1921	1922
Water companies:		
Operating revenues.....	\$13,310,699 10	\$14,867,147 17
Operating expenses.....	8,950,043 63	9,204,366 03
Net operating revenue.....	\$4,360,655 47	\$5,662,781 14
Electric companies:		
Operating revenues.....	\$65,461,913 88	\$69,322,631 48
Operating expenses.....	40,083,498 78	40,048,764 25
Net operating revenue.....	\$25,378,415 10	\$29,273,867 23
Gas companies:		
Operating revenues.....	\$35,664,937 75	\$39,963,480 27
Operating expenses.....	29,054,909 15	30,761,909 54
Net operating revenue.....	\$6,610,028 60	\$9,201,570 73
Telephone and telegraph companies:		
Operating revenues.....	\$148,708,212 09	\$156,196,338 64
Operating expenses.....	120,492,506 47	121,905,916 72
Net operating revenue.....	\$28,215,705 62	\$34,290,421 92
Steam railroads:		
Operating revenues.....	\$437,377,800 74	\$436,523,892 96
Operating expenses.....	321,881,361 07	317,780,349 57
Net operating revenue.....	\$115,496,439 67	\$118,743,543 39
Electric railways:		
Operating revenues.....	\$53,073,401 01	\$55,238,182 57
Operating expenses.....	41,750,074 36	41,037,553 27
Net operating revenue.....	\$11,323,326 65	\$14,200,629 30
Warehouse companies, wharfingers and carriers by water:		
Operating revenues.....	\$24,078,026 63	\$30,583,530 25
Operating expenses.....	23,742,344 22	27,914,875 58
Net operating revenue.....	\$335,682 41	\$2,668,654 67
Auto stages and auto trucks:		
Operating revenues.....	\$14,817,781 65	\$15,549,349 94
Operating expenses.....	14,361,619 01	14,322,725 34
Net operating revenue.....	\$456,162 64	\$1,226,624 60
Totals:		
Operating revenues.....	\$792,492,772 85	\$818,244,553 28
Operating expenses.....	600,316,356 69	602,976,460 30
Total net operating revenue.....	\$192,176,416 16	\$215,268,092 98

NOTE.—Taxes not included in operating expenses of steam railroads, electric railways, and telephone and telegraph companies.

TABLE NO. 13.

NET OPERATING REVENUES OF PUBLIC UTILITIES OPERATING IN CALIFORNIA, 1921-1922.

	1921	1922
Water companies.....	\$4,360,655 47	\$5,662,781 14
Electric companies.....	25,378,415 10	29,273,867 23
Gas companies.....	6,610,028 60	9,201,570 73

Totals.....	\$192,176,416 16	\$215,268,092 98

*Includes interstate business of companies operating in more than one state.

EXTENSIONS AND IMPROVEMENTS.

Steam and electric railroads, gas, electric, water, telephone and telegraph companies report additions to fixed capital during 1922 in the amount of \$142,819,036.79. This figure, of course, includes the total additions to capital accounts made by interstate carriers and other companies doing interstate business. Table No. 14 following shows the total additions segregated to the various classes of utilities.

TABLE NO. 14.

FIXED CAPITAL INSTALLED BY CERTAIN CALIFORNIA PUBLIC UTILITIES AS SHOWN IN ANNUAL REPORTS FILED WITH THE RAILROAD COMMISSION, 1913 TO 1922, INCLUSIVE.

	1913 to 1921, inclusive	1922	Total
Steam railroads.....	\$285,118,820 51	\$14,372,588 72	\$299,491,409 23

CHAPTER VI.

**SERVICE DEPARTMENT—RAILROAD, STAGE, AND
AUTO TRUCK OPERATION—SAFETY.**

The Railroad Commission maintains a service department whose duty it is, among other things, to investigate and report upon the safety of railroad operation and the accidents caused by such operation, and to report and make recommendations for the betterment of all other conditions which it finds to be unsafe or deficient. Since the acquisition by the Railroad Commission of jurisdiction over automobile stage and freight truck transportation, field inspection of condition of automobiles and trucks and compliance with the safety rules and operating regulations prescribed by the Commission, are cared for by the inspectors of the service department and during the year 1245 automobile inspections were made by such department and violations of the general orders of the Commission, when found, were required to be immediately corrected.

Among the more important things undertaken by the service department may be mentioned the inspection of dispatching methods, establishment of standard and uniform methods of operation and requiring carriers properly to examine the qualifications and physical fitness of employees in train and engine service.

UNSAFE PRACTICES CORRECTED.

As a result of such inspections, which have continued over a series of years, many unsafe practices have been corrected and standard and uniform methods of operation have been prescribed for the smaller roads, thereby placing their general operation on a parity with the standard rules and methods which have been found to be safe by the larger systems, and the dispatching methods and operating practices of the smaller railroad carriers in the State of California are now on a satisfactory basis. The work of the department also includes inspection as required by the statutes and rules of the Railroad Commission as to compliance by carriers with such laws and regulations.

INDUSTRIAL CLEARANCES IMPROVED.

The matter of industrial clearances continues to receive attention and each year results in an added number of clearances being corrected to the standards as prescribed by the Commission under its General Order No. 26; new construction is required to be done in accordance with the standards prescribed and as repair and renewal of old structures are undertaken, any inadequate clearances existing are adjusted to standard, resulting in elimination of hazard of accident to trainmen and others.

ACCIDENT INVESTIGATION.

Every train accident resulting in the loss of life or of serious injury to passengers or employees is investigated by the Railroad Commission. When a fatal accident occurs, the company's investigation and coroner's inquest are attended and an independent investigation made at the scene of the accident by the Commission's inspectors that all possible

information may be available regarding the accident. Upon the receipt of these reports such orders or recommendations are issued by the Commission as appear to be necessary in the circumstances. Inspectors cover not only accidents due to conditions which may indicate unsafe operation, but also grade crossing accidents. As a result of the latter investigations, railroads have been required to afford additional protection at grade crossings which have been found to be unsafe or where it is evident that additional protection should be afforded.

INSPECTION OF SERVICE.

The Commission is constantly engaged in the inspection of the service of common carriers. This inspection covers such matters as:

- (1) Sufficiency of railroad equipment, number of trains, number of cars and proper seating facilities in cars;
- (2) Sufficiency and adequacy of depot facilities;
- (3) Location of new or abandonment of existing stations and requests for stopping trains;
- (4) Adequate number of trains or schedules on steam, electric inter-urban and street car lines.

Investigation is also made by the Railroad Commission as to compliance by carriers with the provisions of the "Full Crew Law," the "Headlight Law," the "Train Dispatching Law" and other safety regulations as imposed by statute or by Railroad Commission general orders.

Deficiencies or irregularities in railroad service are brought to the attention of the Railroad Commission either by its own inspectors or by informal complaint from the public. After investigation, the Railroad Commission directs such improvements or extensions in service as to it seems proper. Much is constantly being done in this way to maintain adequate service by common carriers.

TIME-TABLES MUST BE FILED.

Under General Order No. 31 of the Railroad Commission, all changes in steam and electric interurban railroad time-tables are required to be filed with the Railroad Commission and to be posted for the information of the public five days in advance of the effective date of the proposed changes. A supplement to this general order requires that in all instances where a reduction of passenger train service is contemplated, or where the abandonment of any stop is desired by the railroad, an outline of the proposed time-table must be submitted to the Railroad Commission thirty days prior to the proposed effective date of the change and that the permission of the Railroad Commission must be obtained prior to making any reduction in service or abandoning any stop. Similar requirements are imposed upon automobile stage and truck lines operating under the jurisdiction of the Railroad Commission.

CURTAILMENT OF SERVICE.

All requests for the reduction of passenger service or the abandonment of stops are carefully investigated by the Railroad Commission. In many instances, due to an increase in train schedules during certain seasons to care for tourist or vacation travel, it is customary to reduce passenger train service when the particular travel for which the service was inaugurated no longer exists. In other cases, however, permission to withdraw passenger trains from service has been denied carriers if

the Railroad Commission's investigation has shown that the public convenience required the retention of the service. In still other instances a rearrangement of schedules has been made, satisfactorily adjusting the extra service of which a carrier desired relief and also meeting the public demand for service. Practically all these matters are handled informally by correspondence, but occasionally are the subject of formal proceedings and the subsequent order of the Railroad Commission.

ELIMINATION OF PASSENGER TRAINS.

Following the return of the railroads to local operation, a number of time-table changes have been made, resulting in material reductions of train service and the elimination of a considerable number of passenger trains. These reductions have been made primarily for the reason that the expense of operating many local trains have greatly exceeded the revenue earned and, where the Railroad Commission has received a satisfactory showing that the trains proposed to be discontinued were not earning the direct operating cost, informal permission has been given for the discontinuance of such apparently unnecessary train service. The inroads made upon the passenger traffic heretofore enjoyed by the steam and electric interurban railroads by the advent of privately owned automobiles has been in a large measure responsible for the discontinuance of local passenger train service in many localities, supplemented also in some degree, by the business which has been diverted to automobile stage lines which have, in many cases, operated service of more frequency than that offered by the steam or electric interurban lines and which service has therefore attracted and held the patronage of the traveling public. The Railroad Commission, in every instance, requires a full and satisfactory showing before consenting to the elimination of passenger train service when such curtailment or diminution of service has been requested by the carriers.

ABANDONMENT OF STATIONS, TRACKS, AND FACILITIES.

Under General Order No. 36 of the Railroad Commission, no station, sidetrack, spur, stop, facility for handling freight, platform or other like facilities of common carriers can be abandoned without the consent of the Railroad Commission. The applications of the carriers for such abandonments are carefully investigated before the permission to discontinue the use of any facilities is granted. In many instances such investigation shows that the retention of the facilities is desirable and necessary properly to accommodate the needs of shippers and receivers of freight, and in such instances the applications are denied.

Following the return of railroads from federal control and due to unsettled business conditions during the period of reconstruction following the war, the Commission has been called upon to pass on a number of applications for changes in the status of agencies, stations, the entire abandonment of stations heretofore existing and other matters for which authority was requested by the carriers in their endeavor to curtail operating expense when traffic conditions, in the opinion of the carriers, did not appear to justify the continuance of agencies and other station facilities. Complete analysis of conditions existing are always required by the Railroad Commission in support of the request made by carriers for any change which will result in a discontinuance of any facility heretofore accorded the traveling or shipping public by a carrier, and the

Railroad Commission has not authorized any reduction in such facilities until it has fully satisfied itself that the conditions represented by the applicant carriers were fully justified and that the patronage necessary to continue the facilities was not present.

AMENDMENT TO AUTO STATE RULES AND REGULATIONS.

To minimize the hazard of accident at railroad grade crossings the Railroad Commission issued, under date of December 8, 1921, its General Order No. 63, effective December 15, 1921, requiring all stages, operated under the Commission's jurisdiction, to stop at all steam or electric interurban crossings as follows:

It is hereby ordered that all transportation companies as defined by section 1, paragraph (C) of chapter 213, Statutes of 1917, and amendments thereto, be and they are hereby required to stop each and every stage engaged in the transportation of passengers before crossing the tracks of any steam or electric interurban railroad, such stop to be made not less than fifty (50) feet nor more than seventy-five (75) feet from the nearest rail of the railroad over which the highway crosses. After making the stop hereby required, the driver or operator of the stage shall carefully look in each direction for approaching cars or trains and shall not start his stage until it has been ascertained that there are no cars or trains approaching the crossing in either direction.

The foregoing rule shall not apply in connection with the operation of passenger stages within municipalities as regards operation over the tracks of electric or other street railroads.

Checks as to the observance of this order have been made by the Commission's inspectors and other complaints as to violations of the order, which are brought to the attention of the Commission, are investigated and the necessary corrective action taken in each case.

LIST OF ACCIDENTS.

Following is a partial list of the accidents investigated by the Railroad Commission's inspectors during the year ending June 30, 1923:

1. July 1, 1922. *Pacific Electric Railway Company*, Western Division, Redondo Line—Crossing accident at Playa Del Rey, resulting in death of automobile driver.
2. July 3, 1922. *Pacific Electric Railway Company*—Crossing accident at Newton. Driver of automobile truck killed.
3. July 4, 1922. *Market Street Railway*—San Mateo interurban line car derailed at Millbrae by reason of broken axle. Eight passengers and two employees injured.
4. July 7, 1922. *Southern Pacific Company*, Stockton Division—Crossing accident one mile west of Turlock. One person killed.
5. July 8, 1922. *Pacific Electric Railway Company*, Riverside-San Bernardino Line—Highway crossing accident near Urbita. Driver of automobile killed.
6. July 12, 1922. *Southern Pacific Company*, East Bay Electric Lines—Crossing accident at Parker and California streets, Berkeley. Two occupants of automobile injured.
7. July 13, 1922. *Pacific Electric Railway Company*, San Bernardino Line—Crossing accident at Magnolia avenue, Fontana. Driver of automobile killed.
8. July 13, 1922. *Southern Pacific Company*, Coast Division—Crossing accident at Mountain View. Two occupants of automobile injured.
9. July 15, 1922. *Southern Pacific Company*, Stockton Division—Crossing accident at Muscatel. Two occupants of automobile injured.
10. July 17, 1922. *Southern Pacific Company*, Stockton Division—Crossing accident at Borden's crossing, Modesto. Driver of two-horse team killed.
11. July 25, 1922. *Pacific Electric Railway Company*, Southern Division, San Pedro-Gardena Line—Collision between line car and passenger train in yard limits at San Pedro. No fatalities or injuries.

12. July 29, 1922. *Pacific Electric Railway Company*, Western Division, Van Nuys Line—Highway crossing accident at Fourth street, Lankershim. Driver of automobile fatally injured.
13. August 1, 1922. *Pacific Electric Railway Company*, Southern Division, Santa Ana Line—Highway crossing accident at Bellflower. One killed and one seriously injured.
14. August 3, 1922. *Southern Pacific Company*, Coast Division—Highway crossing accident at Bayswater avenue, Burlingame. Driver of automobile truck injured.
15. August 7, 1922. *Southern Pacific Company*, Western Division—Highway crossing accident at Bay Point. One killed, two persons injured.
16. August 8, 1922. *Southern Pacific Company*, San Joaquin Division—Highway crossing accident near Klink station. One killed, three injured, occupants of automobile.
17. August 12, 1922. *Pacific Electric Railway Company*, El Segundo Line—Collision between two cuts of cars when making flying switch. One fatality.
18. August 15, 1922. *Southern Pacific Company*, Coast Division—Highway crossing accident at Sheldon avenue near Mile Post 466. Automobile truck driver seriously injured.
19. August 20, 1922. *Pacific Electric Railway Company*, Western Division—Highway crossing accident at intersection of Santa Monica boulevard and Perryville street, Sawtelle. Driver of horse-drawn wagon killed.
20. August 16, 1922. *Southern Pacific Company*, Western Division—Crossing accident at Eighth and Taylor streets, San Jose. One killed and two persons injured, occupants of automobile.
21. August 20, 1922. *Southern Pacific Company*, Western Division—Crossing accident at Lucas avenue, Richmond. Occupant of automobile injured.
22. August 22, 1922. *Pacific Electric Railway Company*, Santa Monica Line—Highway crossing accident at intersection of Sunset boulevard and Occidental street, Los Angeles. Two killed, occupants of automobile.
23. August 28, 1922. *Pacific Electric Railway Company*, Southern Division—Derailment of passenger car resulting in serious injury to one passenger.
24. August 31, 1922. *Southern Pacific Company*, Western Division—Highway crossing accident at San Lorenzo. Four occupants of automobile killed.
25. September 5, 1922. *Southern Pacific Company*, Los Angeles Division—Highway crossing accident at Glendale. Fatal injuries to driver of automobile truck.
26. September 11, 1922. *Southern Pacific Company*, East Bay Electric Division—Collision between passenger train and freight switching train at Chevrolet spur.
27. September 14, 1922. *Southern Pacific Company*, Stockton Division—Highway crossing accident at Irrigosa. Two occupants of automobile injured.
28. September 15, 1922. *Pacific Electric Railway Company*, Southern Division—Highway crossing accident at Thirty-eighth street and Long Beach boulevard. Bicycle rider killed.
29. September 21, 1922. *Southern Pacific Company*, Los Angeles Division—Highway crossing accident at Huntington drive on Duarte branch. Two persons seriously injured, occupants of automobile.
30. September 22, 1922. *Southern Pacific Company*, Los Angeles Division—Collision between two passenger trains at Montalvo, resulting in death of two employees, injury to one person carried by contract, six employees and twenty-nine passengers.
31. September 27, 1922. *Atchison, Topeka and Santa Fe Railway Company*—Crossing accident at Pacific boulevard, Los Angeles. Collision with car of Los Angeles Railway Corporation. No serious injuries.
32. September 28, 1922. *Southern Pacific Company*, East Bay Electric Division—Highway crossing accident at Sixth and Powell streets, Emeryville. One person injured, occupant of automobile.
33. September 29, 1922. *Southern Pacific Company*, Stockton Division—Highway crossing accident at Arena station. One person killed, occupant of automobile.
34. October 3, 1922. *Southern Pacific Company*, Los Angeles Division—Highway crossing accident at Pierce avenue, Pacoima. Woman occupant of horse-drawn vehicle seriously injured.
35. October 4, 1922. *Southern Pacific Company*, Coast Division—Highway crossing accident at Mountain View. One person killed, occupant of automobile.

36. October 5, 1922. *Pacific Electric Railway Company*—Highway crossing accident at Lankershim on Van Nuys line. Driver of automobile fatally injured.
37. October 6, 1922. *Pacific Electric Railway Company*, Southern Division, Newport Line—Highway crossing accident at Willow avenue, Long Beach. Two occupants of automobile killed.
38. October 11, 1922. *Pacific Electric Railway Company*, Sawtelle Line—Highway crossing accident at Doheny drive. Truck driver and small boy killed.
39. October 12, 1922. *Pacific Electric Railway Company*—Side swipe collision between freight and passenger trains at Torrance. Slight injuries to one passenger.
40. October 13, 1922. *Southern Pacific Company*, East Bay Electric Lines—Collision of two electric trains in Oakland Pier yard. No personal injuries.
41. October 13, 1922. *Southern Pacific Company*, Western Division, Richmond Belt Line—Crossing accident resulting in death of one occupant of automobile and injury to another.
42. October 15, 1922. *Southern Pacific Company*, Los Angeles Division—Highway crossing accident at Pacoima. Injuries to five persons, occupants of automobile.
43. October 24, 1922. *Southern Pacific Company*, Los Angeles Division—Highway crossing accident one mile west of Pomona. Serious injury to driver of automobile truck.
44. October 30, 1922. *Southern Pacific Company*, Coast Division—Collision between switching train and car of Market Street Railway at crossing of Fourth and Townsend streets, San Francisco. No personal injuries.
45. October 30, 1922. *Southern Pacific Company*, Stockton Division—Highway crossing accident at Arena station. Driver of automobile truck killed.
46. November 1, 1922. *Southern Pacific Company*, Western Division—Street crossing accident at First and Brush streets, Oakland. Occupant of automobile killed.
47. November 1, 1922. *Pacific Electric Railway Company*, Southern Division—Highway crossing accident at Nadeau. Driver of automobile fatally injured.
48. November 3, 1922. *Southern Pacific Company*, Coast Division—Highway crossing accident at Perry station. Two persons killed, one injured, all occupants of automobile.
49. November 6, 1922. *Southern Pacific Company*, East Bay Electric Lines—Street crossing accident at High street and Encinal avenue, Alameda. One person killed, occupant of automobile.
50. November 12, 1922. *Pacific Electric Railway Company*, Northern Division, City lines, Pasadena—Collision between one-man car and automobile on Colorado street resulting in death of one person and serious injury to another, both occupants of automobile.
51. November 20, 1922. *Pacific Electric Railway Company*, Southern Division, Whittier Line—Highway crossing accident at Santa Fe avenue, Los Angeles. Driver of automobile killed.
52. November 25, 1922. *Pacific Electric Railway Company*, San Bernardino Line—Highway crossing accident at Eighth street, Uplands. Two persons riding on automobile truck killed.
53. November 29, 1922. *Pacific Electric Railway Company*, Van Nuys Line—Highway crossing accident at Cortez. Driver of automobile killed.
54. November 30, 1922. *Pacific Electric Railway Company*, San Bernardino Line—Highway crossing accident at Garey avenue, Pomona. Two occupants of automobile killed.
55. December 2, 1922. *Atchison, Topeka and Santa Fe Railway Company*, Valley Division—Derailment of passenger train at Shattuck and Nimmo spur near Bakersfield. Three persons killed and fourteen injured.
56. December 3, 1922. *Pacific Electric Railway Company*—Collision between two passenger trains on viaduct in rear of Los Angeles station. Slight injury to two passengers.
57. December 3, 1922. *Atchison, Topeka and Santa Fe Railway Company*, Los Angeles Division—Side swipe collision at Fullerton between a passenger and freight train. One employee injured.
58. December 5, 1922. *Southern Pacific Company*, East Bay Electric Lines—Highway crossing accident at Peralta and Eighteenth streets, Oakland. Occupant of automobile killed.

59. December 6, 1922. *Pacific Electric Railway Company*, Western Division, Venice Short Line—Highway crossing accident near Sixteenth and Berenda streets, Los Angeles. Two passengers slightly injured.
60. December 7, 1922. *Southern Pacific Company*, San Joaquin Division—Highway crossing accident at Bradbury crossing, three miles west of Ducor. One killed, three persons injured, all occupants of automobile.
61. December 7, 1922. *Southern Pacific Company*, Western Division—Crossing accident at First and Fallon streets, Oakland. One person killed, driver of automobile truck.
62. December 9, 1922. *Pacific Electric Railway Company*, Southern Division—Derailment of freight train near Southern Pacific crossing in San Pedro Harbor District. No personal injuries.
63. December 12, 1922. *Southern Pacific Company*, Coast Division, San Francisco—Collision between switching cut and street car of Market Street Railway. Two persons injured.
64. December 20, 1922. *Pacific Electric Railway Company*, Southern Division—Highway crossing accident at Sixteenth street and Long Beach boulevard. Driver of automobile fatally injured.
65. December 25, 1922. *Pacific Electric Railway Company*, Southern Division—Street accident at intersection of Seventh and Orange streets, Long Beach. Occupant of automobile killed.
66. December 25, 1922. *Southern Pacific Company*, East Bay Electric Lines—Derailment of electric train at California Junction. No personal injuries.
67. January 11, 1923. *Pacific Electric Railway Company*, Southern Division—Collision between train and car of Los Angeles Railway. Slight injuries to several passengers.
68. January 27, 1923. *Southern Pacific Company*, Shasta Division—Derailment of passenger train at Parks Creek. Two employees injured.
69. January 30, 1923. *Pacific Electric Railway Company*, Southern Division, Whittier Line—Highway crossing accident at Rio Hondo. Driver of automobile killed.
70. February 7, 1923. *Southern Pacific Company*, Stockton Division—Highway crossing accident at French Camp. One occupant of automobile injured.
71. February 9, 1923. *Pacific Electric Railway Company*, Southern Division, Long Beach Line—Highway crossing accident at Willowbrook. Driver of automobile killed.
72. February 12, 1923. *Pacific Electric Railway Company*, Southern Division, Santa Ana Line—Highway crossing accident at Cypress. Driver of automobile killed.
73. February 14, 1923. *Pacific Electric Railway Company*, Northern Division, Pasadena Short Line—Highway crossing accident at Newton street. Driver of automobile killed.
74. February 18, 1923. *Pacific Electric Railway Company*, Western Division, Venice Short Line—Highway crossing accident at National boulevard, Culver City. Driver of motorcycle killed.
75. February 19, 1923. *Pacific Electric Railway Company*, San Bernardino Line—Highway crossing accident at Valley boulevard, El Monte. Occupant of automobile killed.
76. February 20, 1923. *Pacific Electric Railway Company*, San Bernardino Line—Highway crossing accident at Valley boulevard, El Monte. Collision between section motor car and automobile truck. Three employees killed.
77. February 24, 1923. *Southern Pacific Company*, Stockton Division—Highway crossing accident at French Camp. Two occupants of automobile truck killed.
78. February 27, 1923. *Southern Pacific Company*, East Bay Electric Lines—Street crossing accident at California and Virginia streets, Berkeley. Fire truck of Berkeley Fire Department struck by passenger train. Two persons riding on fire truck injured.
79. March 1, 1923. *Southern Pacific Company*, East Bay Electric Lines—Street crossing accident at Eleventh and Webster streets, Oakland. One person injured, occupant of automobile truck.
80. March 6, 1923. *Pacific Electric Railway Company*, San Bernardino Line—Highway crossing accident at Second street, San Bernardino. Driver of automobile truck injured and another occupant killed.

81. March 10, 1923. *Atchison, Topeka and Santa Fe Railway Company*, Los Angeles Division—Collision between switch engine and freight train at Redondo Junction. Two employees injured.
82. March 19, 1923. *Southern Pacific Company*, Western Division—Highway crossing accident at Mt. Eden way, one mile east of Hayward. Two occupants of automobile injured.
83. March 20, 1923. *Southern Pacific Company*, Western Division—Street crossing accident at High street, Oakland. Driver of automobile killed.
84. March 22, 1923. *Southern Pacific Company*, East Bay Electric Lines—Street crossing accident at Henry and Rose streets, Berkeley. Injuries to one occupant of automobile and death of another.
85. March 26, 1923. *Southern Pacific Company*, Los Angeles Division—Highway crossing accident at Phillips crossing near Pomona. Two occupants of automobile killed and one injured.
86. April 3, 1923. *Southern Pacific Company*, Western Division—Highway crossing accident near Flodden. Driver of automobile truck killed.
87. April 4, 1923. *Southern Pacific Company*, East Bay Electric Lines—Street crossing accident at Seventh and Jefferson streets, Oakland. Driver of automobile truck injured.
88. April 15, 1923. *Peninsular Railway Company*, Western Division—Highway crossing accident at private road crossing near National avenue. Six occupants of automobile killed.
89. April 23, 1923. *Pacific Electric Railway Company*, Western Division—Street accident at Pico boulevard, Santa Monica. Driver of automobile killed.
90. April 27, 1923. *Pacific Electric Railway Company*, Southern Division, Long Beach Line—Highway crossing accident at Carlin avenue, Willowville. Driver of automobile fatally injured.
91. April 29, 1923. *Pacific Electric Railway Company*, San Bernardino Line—Highway crossing accident at New avenue near El Monte. Driver and three other occupants of automobile killed.
92. April 29, 1923. *San Diego Electric Railway*—Rear end collision and subsequent runaway of car. One person fatally injured and 85 passengers injured.
93. May 2, 1923. *Southern Pacific Company*, East Bay Electric Lines—Switching train broke in two, with following collision of separated sections. Yardman member of switching crew, killed.
94. May 10, 1923. *Pacific Electric Railway Company*, Western Division—Highway crossing accident at Wilshire boulevard on Sawtelle line. Driver of automobile killed.
95. May 11, 1923. *Southern Pacific Company*, Los Angeles Division—Highway crossing accident at private crossing near Keith station on the Santa Paula branch. Driver of automobile truck killed.
96. May 5, 1923. *Southern Pacific Company*, Stockton Division—Road crossing accident at private road one mile east of Irrigosa. One occupant of automobile killed and one injured.
97. May 13, 1923. *Southern Pacific Company*, Los Angeles Division—Street accident on Alameda street, between Fifteenth and Sixteenth streets, Los Angeles. Driver of automobile seriously injured.
98. May 14, 1923. *Pacific Electric Railway Company*, Southern Division, Long Beach Line—Highway crossing accident at Willow street, Long Beach. Driver of automobile seriously injured.
99. May 15, 1923. *Pacific Electric Railway Company*, Western Division—Highway crossing accident at Providencia street, Burbank. Driver of automobile killed, one other occupant seriously injured.
100. May 13, 1923. *Southern Pacific Company*, East Bay Electric Lines—Street crossing accident at Derby avenue, Oakland. Driver of motorcycle killed.
101. May 19, 1923. *Southern Pacific Company*, Coast Division—Road crossing accident at Chittenden. No personal injuries.
102. May 27, 1923. *Southern Pacific Company*, Western Division—Highway crossing accident at Williams street, San Lorenzo. Driver and occupant of motorcycle killed.
103. May 30, 1923. *Pacific Electric Railway Company*, Western Division—Highway crossing accident at Pico boulevard on Sawtelle line. Four occupants of automobile killed.
104. June 3, 1923. *Southern Pacific Company*, Western Division—Highway crossing accident one mile west of Byron Hot Springs. No personal injury.

105. June 14, 1923. *Pacific Electric Railway Company*, San Bernardino Line—Collision between passenger and freight train near Etiwanda. Eleven passengers and one employee slightly injured.
106. June 18, 1923. *Pacific Electric Railway Company*, Southern Division, Whittier Line—Highway crossing accident at Rio Hondo. Eight passengers in automobile stage seriously injured.
107. June 18, 1923. *Pacific Electric Railway Company*, Western Division, Sawtelle Line—Highway crossing accident at Doheny drive. Driver of automobile killed.
108. June 20, 1923. *Southern Pacific Company*, Los Angeles Division—Highway crossing accident at Osborne street, near Pacoima. Driver of automobile truck seriously injured.
109. June 22, 1923. *Southern Pacific Company*, Los Angeles Division, Santa Ana branch—Highway crossing accident at Buena Park. Driver of automobile truck killed.
110. June 27, 1923. *Pacific Electric Railway Company*, Southern Division, San Pedro Line—Collision between passenger and freight train near Thenard station. Five passengers seriously and forty other passengers slightly injured.

FORMAL PROCEEDINGS.

The following formal proceedings affecting the matter of service were decided by the Railroad Commission during the period covered by this report:

Pacific Electric Railway Company, for authority to abandon and remove Wharf No. 2 at Redondo Beach. (Decision No. 11656 on Application No. 4527, decided February 13, 1923.) Application granted.

West Berkeley Improvement Club et al. vs. San Francisco-Oakland Terminal Railways. Complaint requesting an order for extension of Dwight Way street car line on Sixth street, Berkeley. (Decision No. 11674 on Case No. 1523, decided February 16, 1923.) Complaint dismissed without prejudice.

City of San Bernardino vs. Southern Pacific Company; Atchison, Topeka and Santa Fe Railway Company; Los Angeles and Salt Lake Railway Company, and Pacific Electric Railway Company. (Decision No. 11789 on Case No. 1783, decided March 16, 1923.) Complaint requesting joint track connections at San Bernardino between all railroads. Complaint dismissed upon a showing that the expense of the necessary track construction would not be justified and that such expenditure would serve no useful purpose for shipping public other than to correct errors of routing for which shippers were primarily responsible.

Pacific Electric Railway Company, to discontinue certain street car service in city of Pasadena. (Decision No. 12151 on Application No. 9045, decided May 29, 1923.) Application granted authorizing substitution of automobile bus service for local street car service in Pasadena, tracks not to be removed and the discontinuance of car service to be temporary pending a thorough test of the substituted automobile bus service in lieu thereof.

Peninsular Railway Company, to abandon certain tracks and to reroute certain cars in the city of San Jose. (Decision No. 11233 on Application No. 7786, decided November 14, 1922.) Application granted upon a showing that the present financial condition of applicant and future prospect of earnings do not warrant the continued operation of the portion of line of which abandonment was authorized.

Pacific Electric Railway Company, to abandon and remove its railroad track in the city of Beverly Hills (Cold Water Canyon Line) from the

junction with the Sawtelle main line to the end of track in said city. (Decision No. 11400 on Application No. 7438, decided December 23, 1922.) Portion of line sought to be abandoned having been shown to fail to earn the direct cost of operation and there appearing no reasonable prospect of placing the line on a paying basis the continued operation was held not to be justified. Application granted.

Edwin H. Williams vs. Southern Pacific Company. (Decision No. 11488 on Case No. 1652, decided January 9, 1923.) A complaint as to the reduction of passenger train service between Oakland, Fruitvale and Stonehurst. Commission requested to either order full scheduled service resumed or to declare franchise forfeited. Held, that the reduction of service was justified by the fact that the operating revenue was greatly exceeded by the bare operating cost and that no prospect of additional traffic and revenue was apparent. Held, that an order compelling the forfeiture of a franchise, under such conditions, was in excess of the Commission's jurisdiction as prescribed by the statutory law. Complaint dismissed.

CHAPTER VII.

RATE DEPARTMENT TRANSPORTATION, STORAGE, WHARFAGE.

To the Rate Department of the Commission is assigned the handling of all matters pertaining to the rates, rules and regulations of common carriers, including steam railroads, electric interurban lines, street car lines, express companies, interurban automotive transportation companies, and water carriers. It also handles all matters pertaining to warehouses, including food warehouses (cold storage), and wharves.

The department is under the supervision of the rate expert, four assistants and two stenographers. The rate expert and assistant rate expert are examiners to whom other duties than rate department matters are assigned. The Rate Department is in close touch with the management of all public utilities coming under it and keeps informed of all changes in rates or practices contemplated by these utilities and is constantly cooperating with their representatives in expediting rate adjustments.

TARIFFS.

The fiscal year ending June 30, 1923, closes a very busy period for the Rate Department, as will be noted by the detail following. The law requires the various utilities to file schedules of their rates and charges with the Commission and the following list shows the number of utilities whose schedules are so filed:

Steam railroads.....	68
Electric railways.....	32
Street railroads.....	15
Carriers by water.....	113
Express companies.....	10
Aeroplane companies.....	1
Food warehouses.....	34
Warehouses, miscellaneous.....	333
Wharves.....	34
Automotive carriers.....	713
Total.....	1,353

The department maintains a public tariff file, where all of the tariffs referred to in the above paragraph are indexed and kept readily available for inspection by the public and, in addition thereto, has a working file of the same tariffs used by the department in its everyday duties. This file consists of approximately 4000 tariffs.

RATE CHANGES.

Section 15 of the Public Utilities Act provides that

Unless the Commission otherwise orders, no change shall be made by any public utility in any rate, fare, toll, rental, etc. * * * , except after thirty days notice to the Commission and the public * * * .

In many instances the carriers desire to file rates effective on less than statutory notice. For various reasons traffic may suddenly develop which the normal rates will not move and the traffic must move within a certain period. On the other hand, shippers and carriers may agree that certain traffic will be moved provided a certain rate is made effective within a certain time. In such cases the carrier makes application on a

form specially provided and the rates thereunder are made effective on less than thirty days' notice. During the last fiscal year the Commission handled 925 such applications.

Section 63 of the Public Utilities Act provides:

No public utility shall raise any rate, fare, toll, rental or charge, * * * under any circumstances whatsoever, except upon a showing before the Commission and a finding by the Commission that such increase is justified.

In many instances typographical and clerical errors creep into tariffs and tariff supplements, and it is often necessary in order to remove such errors to create technical increases in rates. In other instances, where it is desired to put in a rate for a temporary period, such rate to expire at a stated time, a technical increase is also created. In these instances the carrier makes formal application on a form provided for the purpose and in the discretion of the Commission may be authorized to make such increases in rates without a formal public hearing. Within the last year the Commission has acted upon 547 such applications.

RATE ADJUSTMENTS.

Section 24 (a) of the Public Utilities Act provides:

No common carrier subject to the provisions of this act shall charge or receive any greater compensation in the aggregate for the transportation of persons or of a like kind of property for a shorter than for a longer distance over the same line or route in the same direction, within this state, the shorter being included within the longer distance, or charge any greater compensation as a through rate than the aggregate of the intermediate rates; * * *. Upon application to the Commission, such common carrier may, in special cases, after investigation, be authorized by the Commission to charge less for a longer than for a shorter distance, * * *.

Instances coming under this section are such as the rates between San Francisco and Los Angeles, where the through rate is made less than intermediate rates, in order to meet water competition, and in other instances the carrier having a longer and circuitous line between two points desiring to meet the rate of the shorter and more direct line. In such instances, where it is shown to be for the best interests of all concerned, the Commission grants the authority.

During the last year 167 of these applications were authorized.

By the Commission's General Order No. 51, automotive carriers may be authorized to change the rates on less than the statutory notice under Rule 10, and the Commission during the last year handled 182 such applications.

Rule 11 of the same general order provides for the informal authorization of automotive carriers for the increasing of rates and is analogous to section 63 of the Public Utilities Act. The department handled 51 such applications.

There were, all told, 1872 informal applications from utilities for the last fiscal year.

These applications require considerable bookkeeping. They require the signature of an officer of the carrier, the same to be attested by a notary public, and the Commission takes separate action on each of these cases.

FORMAL PROCEEDINGS.

We now come to the formal proceedings before the Commission in which the Rate Department participates.

The following formal applications and complaints have been filed:

	Applica- tions	Com- plaints
Railroads.....	13	59
Automotives.....	29	--
Carriers by water.....	1	1
Warehouses.....	3	--
Express companies.....	--	2

RATE REDUCTIONS ORDERED.

The Commission, on July 28, 1922, rendered its decision in the case of *Supervisors of Imperial County vs. Southern Pacific Company*, alleging that the freight rates between Imperial County points and Los Angeles were excessive and discriminatory. The Commission found that the rates were excessive and discriminatory and prescribed rates approximately 20 per cent lower than the prevailing rates. The reductions applied to both commodity and class rates and in amount represent a decrease of approximately \$200,000 a year, based on the present volume of business.

On August 10, 1922, the Commission authorized San Francisco, Napa and Calistoga Railway to reduce individual monthly commutation fares between all points on that carrier's line to the basis of the fares in effect prior to July, 1918, resulting in the present fares being on a pre-war level, and representing a reduction of approximately 16 2-3 per cent.

On August 15, the Richfield Oil Company, operating an oil refinery in Bakersfield and shipping points on the Sunset Railway, filed a complaint alleging that the freight rates on crude oil from the oil fields' shipping points to Bakersfield were excessive, and discriminatory. The Commission has rendered its decision prescribing reasonable rates.

WEEKLY PASS EXPERIMENT.

On August 21, 1922, the Commission approved the weekly transferable "pass" for street car rides on the Pacific Electric Railway Company. The first tryout of the plan of this new form of fares, popularly known as a "pass" was made between the cities of Riverside and Pomona. The "pass" costs \$1 and entitles the holder to an unlimited number of rides during the 7-day period for which it is issued. This flat weekly rate is an innovation and has been put in voluntarily by many inter-urban passenger carriers in the state. It is an experiment, by which it is hoped to solve one of the problems of these electric lines.

PADDY RICE RATES.

On August 24, 1922, the Commission made an order requiring the carriers of the state to restore freight rates on paddy rice to the basis of 25 per cent in excess of the grain rates and ordered reparation to shippers for charging in excess of that rate.

HOLLYWOOD FARE ADJUSTMENT.

On September 2, 1922, the Commission rendered its decision in the case of the Pacific Electric Railway Company's rehearing in the Hollywood extension cases, which amended its order previously made.

The principal adjustment feature of the Hollywood case was the order of the Commission requiring the carrier to put in a commutation fare of approximately 8 cents per ride.

CONSOLIDATION OF RAILROADS.

On March 2, 1923, the Commission held a conference with all interested carriers, organizations and individuals on the subject of the proposed consolidation or grouping of railroads prescribed by Transportation Act 1920, making it mandatory that the Interstate Commerce Commission, within a certain time, make a tentative grouping of railroads after which any two railroads may make application to the Interstate Commerce Commission and a consolidation may be authorized by the Interstate Commerce Commission, provided such consolidation is in harmony with the tentative grouping previously made by the Commission. The consolidation or grouping of these large trunk lines naturally affects the State of California, and our Rate Department participated in the conference referred to above in a consultatory and advisory capacity as to just what effect such grouping of railroads might have upon rates within the state.

REPARATIONS DURING FEDERAL GUARANTY PERIOD.

At the beginning of this year the Commission received complaints from the *California Packing Corporation*, *Hunt Brothers Packing Company*, *Rosenberg Bros. & Co.*, *Libby, McNeill & Libby*, *G. W. Hume Co.*, *Richmond-Chase Company et al.*, *Max Schuckl*, *A. A. Wilson*, *Sun-Maid Raisin Growers*, *H. G. Prince and Company*, *Western Canning Company*, and *Pacific Coast Canning Company*, vs. *Southern Pacific Company et al.* alleging that the rates assessed on empty fruit and vegetable boxes during the federal guaranty period—March 1, to September 1, 1920—were excessive and unreasonable and demanding reparation against the charges paid.

It will be remembered that Transportation Act 1920 became effective on March 1, but there was a transition period to and including September 1, 1920, during which the government guaranty applied, but during which period there was a debate as to the authority having jurisdiction strictly over intrastate rates. While the revenues of the carriers were under the jurisdiction of the Director General of Railroads, the United States government being the guarantor, at the same time the Interstate Commerce Commission, the government's agency for the fixing of rates, had no jurisdiction over strictly intrastate rates. Therefore intrastate rates which were unjust, unreasonable, excessive or prejudicial during that transition period were in a peculiar situation.

Subsequently, the Interstate Commerce Commission denied that it had jurisdiction. Some carriers claimed that the state commissions had no jurisdiction, but assuming that some one had jurisdiction, and the federal body denying jurisdiction, this Commission has taken jurisdiction covering that period and the cases set out above are the result. These cases are still pending and have not been adjudicated.

REFRIGERATION CHARGES.

Complaints have been filed with the Commission by the *Western Meat Company*, *Miller & Lux*, and *Virden Packing Company* alleging that the amounts assessed by the *Southern Pacific Company* as refrigera-

tor charges on shipments of meat and packing house products initially iced by the shipper and not reiced in transit by the carrier, were excessive and unreasonable and should be eliminated.

The Commission, after an extended hearing, ordered the carriers to discontinue the practice of collecting a refrigeration charge of from \$5 to \$7.50, dependent upon distance, against shipments of meat and packing house products. This conclusion was based upon the fact that the charge had never been assessed in California prior to July 1, 1920, and that it was only being assessed in a certain number of western states. Furthermore, that since the carriers performed no additional service, they were not entitled to the revenue claimed. The practice has been discontinued.

COOPERATION.

As stated on page 164 of the 1921-1922 Report:

"The Transportation Act 1920 amended section 13 of the Interstate Commerce Act, etc."

The California Commission continues to cooperate with the Interstate Commerce Commission and with various other state commissions where California interests are involved.

The joint committee of Interstate Commerce Commissioners and members of the National Association of Railway and Public Utilities Commissioners have formulated a plan of cooperation whereby the state commissions may have a representative sit with the Interstate Commerce Commission representatives in all cases in which state rates or nation-wide rates are involved. In the Southeastern Class Rates case, state commissioners from Georgia, Florida and Virginia sat with Interstate Commerce Commissioner Eastman and Examiner Wagner in the hearing of this great case, which is now pending before the Interstate Commerce Commission. In these cases the state's representatives are given free hand to ask questions and are consulted in the passing upon objections and in every way are given the same power by the Interstate Commerce Commission in an interstate case as the state representative would have in a purely intrastate case.

INTERFERENCE WITH INTERSTATE COMMERCE.

The Transportation Act 1920, section 416, amending Interstate Commerce Act, section 13, subsection 4, gives power to the interstate commission in cases where it finds that state rates interfere with interstate commerce, to remove such state rates and provide rates in their stead which are in harmony with the interstate rates.

The Wisconsin case, which reached the Supreme Court, seemed to set at rest for all time the question of jurisdiction of the Interstate Commerce Commission in such cases under the Transportation Act and the state commissions are in every instance cooperating with the Interstate Commerce Commission in order to prevent frozen rates.

ORCHARD, FARM AND RANGE.

On July 1, 1922, all rates on orchard, farm and range products which had not been reduced since August 26, 1920 (on which date increased rates of 1920, *ex parte* 74), became effective, were reduced 10 per cent under order of the Interstate Commerce Commission and the state rates were likewise reduced. Since that time many adjustments in freight rates have been made.

INTERSTATE HEARINGS.

The Commission was represented by its rate expert and examiner in the Western Grain Rates case and also the Western Coal case, 80 I. C. C. 362, as well as in the Southern Oregon and Northern California Class Rates case, 74, I. C. C. 207.

In 58 I. C. C. 220, the Interstate Commerce Commission authorized increases in the rates of the Pullman Company for accommodation on sleeping and parlor cars 20 per cent. Subsequently the Order of United Commercial Travelers of America made complaint, in Docket 11567, to the Interstate Commerce Commission, alleging that not only the 20 per cent increase in Pullman fares but the surcharge of 50 per cent of the Pullman accommodation fare should not be made. Hearings were held and the case submitted. Later on, in Docket 14785, the Interstate Commerce Commission, on its own motion, started an investigation "In the matter of charges assessed passengers traveling in sleeping and parlor cars."

This investigation goes not only into the matter of sleeping car fares and charges, but also into the matter of the surcharge accruing to the rail lines.

At the request of the California Commission, the Interstate Commerce Commission set a hearing for San Francisco on July 10, at which appeared representatives of this Commission, who presented evidence concerning the situation in California which we claimed to be representative of the entire western situation.

It was shown that immediately after the surcharge was placed on Pullman fares August 26, 1920, the travel in Pullman cars, as well as in the parlor cars of the individual carriers, decreased. It was also shown that the amount paid by the Pullman Company to the rail carriers decreased. This case is still pending.

EXPRESS RATES.

The express companies, during federal control, operated under government guaranty against loss, but were guaranteed no profits.

Transportation Act 1920 provides that if the American Railway Express Company within thirty days after March 1, 1920, make application to the Interstate Commerce Commission the latter was empowered to authorize a perpetuity of the consolidated company. This was done.

Transportation Act 1920 also turned back to private owners the management of the express company, with the guaranty period running until September 1, 1920, the same transition period as was made for the railroads. The government had suffered a deficit in the operation of the express to the extent of close to \$100,000,000.

The express company, in March, 1920, made application to the Interstate Commerce Commission to increase its rates sufficient to offset the deficit and render a fair return.

The express company is a peculiar agency, depending, as it does, upon the rail carriers for the service it performs, and pays to the rail carriers a rental under contract, known as "Express Privilege."

The Interstate Commerce Commission, recognizing the emergency, granted the express company an increase in rates sufficient to render a reasonable return, and in the meantime the express company made application to the various states petitioning for authority to increase

intrastate rates to harmonize with the interstate rates. The California Commission, after thorough investigation, discovered that the western part of the country was bearing more than its share of the burden of expense and when the express company came to the Railroad Commission requesting an increase in rates the California Commission required it to make an affirmative showing for the necessity of such increase, and upon the express company's failure to do so the California Commission denied an increase in state rates, whereupon the express company took the matter to the Interstate Commerce Commission alleging that the failure of the California Commission to increase state rates to harmonize with interstate rates created an interference with interstate commerce and was in violation of section 13 of subsection 4 of the Interstate Commerce Act. The case was heard on March 25, 1920, before an examiner of the Interstate Commerce Commission in San Francisco.

In April, 1922, the Interstate Commerce Commission requested that California, with other states, who had acted similarly, should come to Washington and make oral argument and such other representation in the pending case as might seem necessary. This was done on May 3 and 4, 1922. California was represented by Mr. Hugh Gordon, attorney for the Railroad Commission, who argued that the various horizontal increases in the express rates had entirely destroyed the formula and suggested that the Interstate Commerce Commission start an investigation upon its own motion into the rates, rules and regulations of the express companies throughout the United States. In July, 1922, the Commission announced the commencement of such a proceeding under I. C. C. Docket 13930.

As stated in a preceding paragraph, the Transportation Act provided for a cooperative plan between state and interstate regulatory bodies; a committee of Interstate Commerce Commissioners and state commissioners, members of the National Association of Railway and Utilities Commissioners, was appointed and a plan of cooperation inaugurated.

At the convention of the national association, in Detroit, on November 14, 1922, Chairman McChord of the Interstate Commerce Commission made the keynote speech and suggested that the Express Rates case then pending before the Interstate Commerce Commission was the most apt case with which to try out the newly formed cooperative plan and suggested that a committee of state commissioners be appointed, one commissioner representing each of the five express rate zones, and this committee to select an examiner from one of the state railroad commissions to sit with the Interstate Commerce Examiner in hearing the case, and the committee to finally sit in conference with the interstate commissioners in reaching a conclusion in the proceeding. The states' committee was appointed with the following members: Hon. W. C. Bliss of the Rhode Island Public Utilities Commission; Hon. Frank W. Shealy of the South Carolina Railroad Commission; Hon. H. G. Taylor, chairman Nebraska State Railway Commission; Hon. Amos A. Betts, Arizona Corporation Commission; Hon. E. V. Kuykendall, Director Department of Public Works, Olympia, Wash., and this committee selected Examiner J. C. Harraman of the California Railroad Commission to sit with Interstate Commerce Commissioners Barclay

and Seal in hearing the case and making a report which, after submitting to the committee, would be finally submitted to the Interstate Commerce Commission *en banc*.

Hearings were held at Washington, D. C.; Atlanta, Ga.; Dallas, Texas; Phoenix, Ariz.; San Francisco, Cal.; Tacoma, Wash.; Helena, Mont.; Denver, Colo.; Omaha, Neb., and Chicago, Ill. Over 5000 pages of transcript of evidence was taken, several hundred exhibits filed and a horde of witnesses examined. After the case was submitted in Washington, on April 24, 1923, the examiners started their report. The Interstate Commission sent its examiners to San Francisco and with Examiner Harraman, of the California Commission, made their report and called a conference with the states commissioners at San Francisco on August 27. The states commissioners have tentatively approved the report of the examiners, which will be submitted to the Interstate Commission some time in October, 1923.

The California Commission is largely responsible for the opening of this case and in defense of its reasonable express rates the probability is that the decision of the Interstate Commerce Commission will be out before this report is in print.

CHAPTER VIII.

ENGINEERING DEPARTMENT.

The volume of work handled by the Engineering Department during the last fiscal year has been as great as that during any preceding year in the Commission's history.

During the first half of the fiscal year the department was fully manned and was able to carry on the work expeditiously. During the second half of the fiscal year a number of important resignations occurred in the Engineering Department, including the chief engineer and, in view of the very material reduction in the appropriation of the Commission for the coming fiscal year, it was impossible to take on additional expert engineers to maintain the full force. As a result, at the close of the year, the department was experiencing difficulty in preventing delay in the handling of proceedings.

No change has occurred in the general methods applied to the work of the department in making valuations and service investigations, the determination of rates, or the handling of informal complaints. The former plan of handling much of the work by informal conference has been continued. This method has made possible the handling expeditiously of a great deal more work than could be done by formal hearings.

Some changes in the organization of the Engineering Department have been made during the fiscal year as a result of the changes in staff and reduction in force. The four main divisions are continued and, in addition, there is maintained in the department a general staff of men specializing on matters of valuation and operations, who handle work as assigned in connection with proceedings involving the various divisions. The organization has been more closely knit together so that, in so far as practicable, men may be shifted from one division's work to another as is needed. Even with the curtailment of staff being made effective, the Engineering Department maintains representatives in the Los Angeles office of the Commission to handle formal and informal complaints originating there. This arrangement has proved very satisfactory and is making available to the public greater service.

OUTSTANDING ACTIVITIES.

The department's work in general is discussed in greater detail under the headings pertaining to the several divisions and attention will here be called only to the more important matters in which the Engineering Department has been actively engaged.

GAS AND ELECTRIC RATES.

During the year the electric rate proceedings involving the Pacific Gas and Electric Company and Great Western Power Company have been decided and new rates fixed for these two utilities, serving approximately one-half of the State of California. In addition hearings have been held in connection with the redetermination of electric rates of the Southern California Edison Company, Western States Gas and Electric Company, Coast Counties Gas and Electric Company, and Midland Counties Public Service Corporation. With the completion of

these proceedings the Commission will have reconsidered the electric rates of practically all utilities serving in California since the high prices of 1919 and 1920. Gas rate proceedings have been limited to certain natural gas companies by reason of the fact that the automatic rate adjustment, effective heretofore, has made it unnecessary to give consideration in formal hearings to changes in rate for manufactured gas resulting from the reduction in the price of oil.

In connection with the supervision of electric utilities the Commission has, through its valuation engineers, cooperated with the Federal Power Commission in the consideration of the granting of permits and licenses for construction and in the determination of values of projects heretofore constructed and now under construction.

WATER UTILITIES.

Work in connection with water utilities has not been so extensive as in previous years, owing in part to the fact that many of the utilities have previously appeared before the Commission and had rates adjusted and also to better conditions of water supply than heretofore existed. Considerable work has been done in connection with the inspection of dams constructed by public utilities. This work has increased owing to the greater activity in hydro-electric power development. During the year, however, thirty-seven appraisals were made involving water companies totaling in excess of \$6,000,000.

TELEPHONE SERVICE PROBLEMS.

The most difficult problem which is being handled by the telephone division of the Engineering Department is in connection with the telephone service conditions in southern California, and the work tending toward improving telephone service in general throughout the state. The unprecedented growth of California during the past two or three years has resulted in part in complaints of being unable to obtain telephone service and in the quality of service rendered. Every possible effort, with the limited staff available, is being exerted to bring about an improved telephone service condition.

GRADE CROSSING ELIMINATION.

The transportation division has been active in a number of rate and service proceedings involving state regulation. A very material increase in applications for approval of grade crossings and for consideration of the cases of elimination of grade crossings have been received. This has apparently been due to the very great increase in productive activities and the intent on the part of the larger steam railroads to carry on extensive railroad programs.

The problem of grade crossing elimination is becoming more serious each year as the state develops and the population increases. It is unfortunate that the Commission finds itself, on account of financial curtailment, unable to continue the active work of a comprehensive determination of grade crossing eliminations.

SOUTHERN PACIFIC - CENTRAL PACIFIC UNMERGER.

As discussed more in detail under the subdivision dealing with the transportation division, the Commission, through its engineering and other departments, took an active part in the consideration before the

Interstate Commerce Commission of the proposed Southern Pacific-Central Pacific unmerger. This matter is of vital importance to California. The Commission and the chief engineer of the Commission, who was fully familiar with the conditions, took an active part in the hearings.

CONSOLIDATION OF RAILROADS.

During the year the Interstate Commerce Commission held in California, at the urge of the Railroad Commission and other bodies, hearings on the question of the proposed consolidation of steam railroads. A careful analysis of the various plans was made by the Commission's chief engineer and the transportation engineer relative to the effect of the suggested plans, and recommendations were submitted setting forth their ideas as to the consolidations which would result to the best interest of California.

VALUATION OF RAILROADS.

In so far as men were available work has been carried on in connection with the valuation of steam railroads by the Interstate Commerce Commission. Tentative valuations as received have been gone over and the Interstate Commerce Commission advised at the proper time of such modifications and changes as it appears should be made.

LOS ANGELES STREET RAILWAY SITUATION.

A very important activity in connection with transportation properties now under way is the valuation and survey of the Los Angeles Railway and Pacific Electric Railway in the city of Los Angeles. The transportation situation of Los Angeles has presented important problems and, at the recommendation of this Commission, a cooperative survey is being carried on by the companies, the Commission, and the Board of Public Utilities of Los Angeles into the transportation situation. Valuations are being prepared of the street railway system properties within the city and a number of men are directly assigned to this work.

VALUATIONS.

Valuations made and completed during the year by the Engineering Department, not referred to specifically under the various divisions, include the following: Midland Counties Public Service Corporation's electric properties, Application No. 5535, historical reproduction cost operative property \$2,054,479; Western States Gas and Electric Company, Application No. 6886, historical reproduction cost electric properties as of December 31, 1921, operative property \$5,361,160; historical reproduction cost gas properties, operative property \$2,005,514; Southern California Gas Company, Case No. 1776, historical reproduction cost gas properties, San Bernardino, Riverside, Redlands and Corona, operative property \$2,405,540; Coast Counties Gas and Electric Company, Case No. 1851, electric properties as of December 31, 1922, operative property \$2,025,318. These valuations have been presented in evidence in proceedings which up to the present time have not been decided.

MISCELLANEOUS ACTIVITIES.

Other activities of the Engineering Department which are not a part of the general formal or informal routine work of the department consists of assisting different groups of the public in connection with various negotiations. An important one has been the action of the Commission

in the assistance of the Nevada Irrigation District to obtain a satisfactory agreement with the Pacific Gas and Electric Company for the sale of the use of water for power purposes in connection with the development of that district. A great deal of work has been done in connection with this matter and it appears that the outcome will be a satisfactory settlement whereby the district may develop its irrigation project.

It had been hoped during the year that considerable additional inspection of utility service would be instituted for the benefit of large developments to insure economy and efficiency in the service rendered the public and to insure the adequacy of the same. Unfortunately it does not appear that it will be possible to commence this work on account of curtailment of funds.

In the following four chapters is set forth more in detail the activities of the Engineering Department as shown by the work in the various divisions.

CHAPTER IX.

GAS AND ELECTRIC DIVISION.

The gas and electric division activities during the last year have been in a general way similar to those of previous years, covering the technical investigation connected with the formal proceedings involving gas, electric and steam heat utilities, the inspection of gas service and of overhead electric line construction and a number of special investigations into service conditions. During the year changes in the organization of the entire Engineering Department have resulted in the transfer of the problems of inductive interference between power and communication lines to the telephone division.

The year has seen a continuation of the downward tendency in rates for both gas and electricity that was noticeable during the previous year. This has been due in part to a continued decline in the prices of various materials, particularly of fuel oil, and in part to the effect of other more permanent influences. The growth of the various utility companies is having an important effect in the reduction of costs of operation because it is accompanied by a greater congestion of business and more intensive utilization of existing facilities, as well as because of the relatively lower cost of construction and operation of the larger units made possible. The continued use of plant facilities constructed under pre-war conditions has been an important factor in keeping down the cost of utility service. As the prices of labor and material are now well above pre-war levels each extension of service or addition to plant capacity tends to increase the relative proportion of higher priced plant facilities involved in the various services; and, in the case of the electric utilities, it must be remembered that the cheaper hydro-electric projects were the first ones to be constructed and as time goes on more inaccessible and less easily developed resources must be utilized. There are thus two distinct and opposite tendencies which will affect the future rates for gas and electric service and it is indeed difficult to predict at the present time how much further the prices of these commodities may be expected to decline.

GAS RATES.

During the year the average price of gas in the state has been reduced to approximately the pre-war level. The accompanying table shows the sum of the gross gas revenues and sales of all California utilities with the exception of the Midway Gas Company, which does a wholesale business in natural gas.

Year	M. cu. ft. gas sales	Gross revenue	Average rate per thousand
1916.....	22,533,581	\$14,831,215	65.8
1917.....	29,019,841	16,878,211	58.2
1918.....	34,443,869	19,998,131	58.0
1920.....	34,241,251	27,423,689	80.1
1921.....	42,267,513	32,252,205	76.3
1922.....	57,849,291	37,223,979	64.3
Fiscal year 1922-1923, estimated.....			59.0

RATE REDUCTIONS.

A great increase in the production of natural gas and material decreases in the price of oil have contributed to this reduction of rates. The

form of gas rate which varies automatically with the price of oil, adopted by the Commission in 1921, has aided materially in changing the rates of those utilities serving manufactured gas. Two general oil price reductions totaling fifty cents per barrel occurred during the year and consumers were receiving the benefit in lower gas rates within thirty days thereafter. The rate reductions thus put into effect without the necessity of hearings or legal process amounted to over \$2,100,000 in annual gas bills and affected some 632,000 families.

In connection with the general reduction in the level of rates, it is gratifying to note a continued improvement in both gas and electric service. This is in part due to development in the arts and to increased recognition of the importance and value of good service and, to a large extent, in the continued search for and improvement of weaknesses which developed during the period of increasing demands and scarcity of labor and material following the war. It is distinctly noticeable that the complaints regarding service reaching the Commission are becoming fewer and the correction of the unsatisfactory conditions more readily accomplished.

STANDARDIZATION OF GAS SERVICE.

Important progress was made during the year in the enforcement of General Order No. 58 and the standardization of gas service throughout the state. On April 1, 1923, a revision of the Commission's General Order No. 58 became effective. The revised order sets forth in somewhat greater detail the standards which the Commission believes requisite for good gas service.

The most important change in its provisions is the reduction of the standard heating value for manufactured gas from the former 570 B. t. u. average to an average of 550 B. t. u. based upon daily tests made of an average sample of gas. In addition to this daily average sample test, three tests a day are required to determine the variations from the average. This new heating value standard follows the recommendation of the Joint Committee on Efficiency and Economy of Gas and is based upon three years' practical study as to the most efficient and economical heating value standard applicable to California conditions.

There is a marked tendency in the state toward a centralization of gas plants in large units situated at strategic points and the construction of transmission lines therefrom, operated at high pressures, to serve the surrounding territory. The Pacific Gas and Electric Company have under construction a transmission line from San Rafael to Santa Rosa, a distance of 40 miles, with the ultimate purpose of dismantling the Santa Rosa plant. The Woodland and Los Gatos plants have already been discontinued, gas being supplied from Sacramento and San Jose. A transmission line is nearing completion connecting San Francisco and San Jose, serving the thickly populated peninsula territory. Central Counties Gas Company serves five growing municipalities from its central plant at Visalia; Riverbend Gas and Water Company serves four cities from Dinuba, and Coast Counties Gas and Electric Company, five from its Pittsburg plant. The intervening rural territory is, in all these instances, greatly benefited by the convenience of gas service.

The revised order takes cognizance of the drop in heating value due to the compression of gas and contains special provision permitting

the Commission to take suitable action in case this becomes sufficiently serious to affect service.

To accompany this revised order the Commission's engineering department has prepared a gas service bulletin in explanation of the rules and containing much useful information concerning the records a gas utility is required to maintain and the service it is expected to render. The usefulness of this bulletin is evinced by the fact that some 900 copies have already been distributed. Requests for copies have been received from some twenty states and four foreign countries.

During the year seventy-five gas service inspections were made by the engineers engaged in this work and the reports made thereon show a steady improvement in the service rendered to consumers. The general purpose of these inspections is to ascertain whether gas consumers are receiving a service commensurate with the rates charged, and to check all records and testing equipment in order to make sure that the records maintained reflect actual operation conditions.

JOINT COMMITTEE ON EFFICIENCY AND ECONOMY OF GAS.

The field work of the Joint Committee on Efficiency and Economy of Gas was completed during the year and the preparation of its final report is now in progress.

The results obtained by this committee have been most satisfactory and the two progress reports issued by it have caused widespread comment. Its recommendations concerning the most economical and efficient heating value for oil gas were followed by the Commission in its revised General Order No. 58. So useful has the work of this committee been that the utilities concerned, in conjunction with the Railroad Commission, have determined to reorganize it into a permanent organization known as The California Gas Research Council. The purpose of the Council is to coordinate the research activities of California gas utilities into a concerted effort to study means for the improvement of the art of gas manufacture, distribution and utilization.

The constitution of the council provides that its chairman shall be a member of the staff of the Commission and in addition to its company membership an engineer has been employed, qualified to supervise and conduct intensive research investigations.

LINE INSPECTION.

The inspection of electric line construction facilities as to compliance with the provisions of chapter 499, Statutes of 1911, as amended by chapter 600, Statutes of 1915, an act regulating the placing, erection, use and maintenance of electric poles, wires, cables and appliances has now been carried on by the Commission for over a year.

Three inspectors in the field have covered the largest part of the state, inspecting not only lines of electric utilities but of cities, private companies and individuals. Approximately 75,000 miles have been traveled to date. The hazard to workmen and the public being largely on the higher voltage lines, the inspection work has been confined so far to power and electric transportation lines. No effort has yet been made to inspect telephone or telegraph facilities except where same are in hazardous proximity to power or traction lines.

During the period of inspection thirty-three utilities, forty-five cities and one hundred seventy-four privately owned electric lines have been

inspected. In all, 200,519 infractions have been listed; of these 160,680 have been charged to utilities, 18,098 to cities and 21,741 to individuals and private companies. The Commission in order to save time and expense ordered some of the larger and better organized utilities to remove all remaining unlisted violations in accordance with the interpretation given and violations listed in the inspected districts of the respective utilities. In this way the elimination of approximately 200,000 additional violations has already been ordered without the delay incident to a complete inspection. It is estimated that it will take approximately one and one-half years to complete the inspection work, as practically all of the signal and communication lines have yet to be inspected, and a final inspection of all facilities will have to be made to see that the violations have been removed as directed.

Many of the infractions found have been technical in nature, but an extraordinarily large amount of extremely hazardous violations have been disclosed. The inspection has beyond a doubt been justified from every standpoint and will result in very materially reducing accidents and loss of life, particularly with respect to the workmen. The State of California in this connection is the first state in the Union to undergo such a detailed inspection and the result of the investigation will unquestionably mean a very high standard of construction which can not but help improve service as well as establish the very highest standard of safety that is economically practicable.

The Commission's General Order No. 64, Rules for Overhead Line Construction, governing the construction and maintenance of all overhead power, communication, signal and trolley circuits has now been in effect for one year's time. The standards set forth have effected safer working conditions for employees and have secured greater safety to the general public. It can also be said that new construction and reconstruction in conformity with the rules have resulted in better service.

In spite of the wide variation in construction practices of the different utilities, the new standards have been conceded by all concerned as representing a desirable advance over past practices. Representatives of the electrical workers have indicated their appreciation of the rules by a conscientious endeavor to familiarize themselves with the requirements. This has been demonstrated by the demand for copies of the rules. Approximately three thousand copies have been given out, the large majority going to individuals, the utilities themselves ordering comparatively few, as their own specifications have incorporated the rules.

In addition to demands from other states a number of foreign countries are represented by orders for copies of the rules. The wide interest in the rules and the beneficial results of their application have been more than gratifying to the Commission and give promise of a high standard of overhead line construction throughout the state.

COOPERATION WITH CONSUMER ORGANIZATION.

A gradual development in connection with the procedure before the Commission that is particularly noticeable in connection with the work of the gas and electric division is the increasing cooperation of consumers with each other and with the engineers of the Commission in the investigation of facts and the preparation of evidence. This appears to result from

an increasing recognition that sound regulation must include a consideration of facts as well as a recognition of the requirements of the law.

In recent proceedings involving the electric rates of Pacific Gas and Electric Company, Great Western Power Company of California and Southern California Edison Company, the various cities depending upon the utilities for service have joined together for the purpose of engaging attorneys and engineers and to a large extent their representatives have cooperated with the engineers of the Commission. The California Farm Bureau Federation has also appeared and taken an active part in a number of proceedings involving utilities supplying electricity in agricultural regions. During recent months, the department of the farm bureau organization created to deal with such utility problems has cooperated with our engineers.

FORMAL PROCEEDINGS.

The most important formal decisions in which this division of the Engineering Department has been involved were those issued near the beginning of the present calendar year in connection with the electric rates of Pacific Gas and Electric Company and Great Western Power Company of California. These decisions followed the authorization of temporary increases in rates during the period of high prices and were the culmination of more than a year's work. The hearings involving Pacific Gas and Electric Company alone occupied over fifty court days and resulted in the submission of more than 7000 pages of written and 5500 pages of oral evidence. These decisions effected a reduction in rates somewhat in excess of 10 per cent, equivalent to a saving to the consumers of both companies of about \$3,000,000 annually. The rates of these two companies are now not far from 10 per cent above pre-war levels.

Another important electrical decision was that in which Pacific Gas and Electric Company was ordered to make changes in its overhead lines to bring them into compliance with state law requirements. Following the principles laid down in this decision, a large number of orders have been directed to other companies, ordering them to reconstruct their overhead systems.

Possibly the most far-reaching single decision involving gas matters was that ordering changes in standards of service which followed laboratory studies and field investigations of approximately two years' duration. Another important decision was that approving an agreement between Southern Counties Gas Company and the city of Santa Barbara, establishing the conditions upon which a pipe line would be built for the transmission of natural gas from the Ventura oil fields to Santa Barbara. While the introduction of this natural gas will result in no immediate change in rate, the increase in the heating content of the gas supplied will be equivalent to a reduction in rates of approximately 20 per cent. Although they involved the establishment of no new principles and might, for that reason, pass almost unnoticed, a large number of supplemental orders were issued carrying out the provisions of the automatic gas rates established by previous decisions. These orders made effective a reduction in gas rates accompanying the reduction in the price of

fuel oil, and as pointed out elsewhere in this chapter, were equivalent to a saving to the gas consumers of the state of over \$2,000,000 per year.

An itemized list of all formal proceedings decided, involving matters other than security issues, is included.

GAS AND STEAM PROCEEDINGS DECIDED DURING YEAR ENDING JUNE 30, 1923.

Pro- ceeding number	Deci- sion number	Utility involved	Date decided	Remarks
A-7951	10378	Valley Natural Gas Company—Midway Gas Com- pany.....	September 9, 1922	Rates increased
A-8227	11015	Santa Maria Gas Company.....	September 26, 1922	Rates decreased
A-8223	11030	Southern California Gas Company.....	September 27, 1922	Rates decreased
A-8194	11018	Pacific Gas and Electric Company.....	September 26, 1922	Certificate
C-1803	11092	Commission vs. San Joaquin Light and Power Cor- poration.....	October 9, 1922	Rates decreased

				Rates decreased

While the foregoing covers in general the progress of the work of this division of the Commission's Engineering Department, certain developments in fields outside of the Commission's direct activities are of great interest because of their bearing on present and future gas and electric utility service. We refer particularly to work which has been done in increasing the voltages at which electrical energy may be transmitted, to the continuing development of the water power resources of the state and to the present tremendous production of natural gas and fuel oil in southern California.

NATURAL GAS SITUATION.

During the past year there has been an extremely rapid development in the Signal Hill, Santa Fe Springs and Huntington Beach fields.

Large numbers of new wells have been drilled in these three fields, and at Signal Hill the extent of the probable productive area is now well defined, and most of the possible locations have been drilled. In Santa Fe Springs the western limits of the field have not yet been entirely defined, and many new wells are now being brought in with prospects of a considerable number of highly productive new wells in the near future. In the Huntington Beach field a large portion of the activity has been the redrilling and deepening of the early wells which tapped only the upper sand. The deep drilling to about 4500 or 5000 feet into the second zone has very greatly increased the production of this field, both in regard to oil and natural gas.

The Signal Hill field has now passed its peak of natural gas production. In November, 1922, this field was producing a daily average of 230,000,000 cubic feet. At the present time production has declined to approximately 195,000,000 cubic feet, and it appears that upon the completion of wells now drilling in the upper part of the field that a further and very rapid decline will be experienced. Geological estimates indicate that within three years the total gas production of this field will be in the neighborhood of 25,000,000 cubic feet, or less, daily.

Santa Fe Springs is proving to be the most remarkable of southern California fields, particularly in regard to its oil production, the quality of which is very high, and the average yield per well extremely large. Natural gas developments have gone ahead very rapidly. In November, 1922, the total production was about 70,000,000 cubic feet per day, whereas at the present time it is 200,000,000 cubic feet per day. The continued drilling in Santa Fe Springs will doubtless sustain the total gas production for some time, and it is possible that the decline of the field will be slower than at Signal Hill.

The production of natural gas at Huntington Beach has increased very rapidly during recent months with the deep drilling now in progress. Total gas production amounts to about 130,000,000 cubic feet per day, with prospects of some increase over a more prolonged period than may be anticipated for Santa Fe Springs or Signal Hill, as the area of this field is about 2500 acres, as compared with 2000 acres at Santa Fe Springs, and 1000 acres at Signal Hill.

Natural gas production has been largely restricted in all of the other important southern California fields, including the Midway and Elk Hill fields in Kern County, because of curtailment of oil production by the larger operators.

Approximately 83,000,000 cubic feet of natural gas per day are available to Los Angeles city through the lines of the Midway, and Southern California Gas Companies, and about 45,000,000 cubic feet per day are taken by Southern Counties Gas Company from Los Angeles and Orange County oil fields.

While oil production has increased very rapidly and field prices for crude oil have dropped to low figures, there have not been any recent changes in the prices charged the gas utility companies for fuel oil for the manufacture of artificial gas.

Because of the large available supply of natural gas in southern California, and the possibility of providing an inexpensive service of very high quality, domestic and industrial gas sales have increased rapidly during the past few years. At the present time there are practically

the same number of gas consumers upon the systems of the Los Angeles Gas and Electric Corporation, Southern California Gas Company and Southern Counties Gas Company, as upon the combined systems of all other companies in the state. Gas sales upon these three systems are over 50 per cent greater than the combined sales for the balance of the state; gas revenue is approximately equal, and investment in companies' property is more than twice the combined investment for all other utilities in California.

It is apparent from these statements and the fact that peak winter day gas send-out for Los Angeles city exceeds the combined peak day send-out of all other parts of California, that gas operations in southern California have become a matter of much importance, justifying the constant attention in Los Angeles by the Commission's Gas Engineering Department.

In order to be prepared for the heavy demands, the Gas Utilities in the Los Angeles district have during the past several years expended vast amounts for enlargement of plant facilities. The gas generating plant of the Los Angeles Gas and Electric Corporation is now the largest oil gas manufacturing plant in the world, having a rated capacity of 95,000,000 cubic feet of oil gas per day. This output could be materially increased in an emergency, such as failure of the supply of natural gas which is mixed with the artificial gas for domestic consumption. The generating plant of the Southern California Gas Company has a capacity of 35,000,000 cubic feet per day. Gas storage facilities in the Los Angeles district amount to 40,000,000 cubic feet, with two additional 10,000,000 cubic feet holders now in course of construction.

Because of the increase in natural gas supply available to Los Angeles city, the Railroad Commission on April 1, 1923, informally ordered the Los Angeles Gas and Electric Corporation and Southern California Gas Company to increase the quality of mixed gas supplied for domestic purposes from 750 to 850 British thermal units per cubic foot. This increase in heating value was made without any change in rate and was therefore equivalent to a reduction in rates of approximately 12 per cent.

ELECTRIC DEVELOPMENT.

The year just closed has seen definite accomplishments in the development of high tension transmission of electrical energy and in the increase in practical voltage of transmission. About twenty years ago an eastern manufacturing concern contracted with a California power company to furnish equipment for 44,000 volt transmission and agreed that if after a six months' experimental period, it was unable to make the equipment operate in a satisfactory manner at this voltage, it would rebuild it for operation at the highest voltage which was shown to be practical. During the past fiscal year, Southern California Edison Company has been actively engaged in the reconstruction of its Big Creek transmission system for operation at 220,000 volts and as this is written, the line is operating at such a voltage with better success than was met in the operation of the early lines at only one-fifth this voltage.

The result of the continual increase in transmission voltages during the past twenty years has been to reduce the cost of transmission lines and the loss of energy in them. Power is now transmitted to distances and in amounts that a few years ago were commercially impossible, and

there has been a continual widening of the field of development of our hydro-electric resources. The utilization of the extensive resources of the Pit River region and the transmission of its energy over 250 miles to the nearest available market, was accomplished during the year.

At the same time there have been extensions of the inter-connected transmission system, which now covers California and reaches into adjoining states.

The construction by The California-Oregon Power Company of a transmission line from its Copco plant in California to Springfield, Oregon, closes the principal gap between the Columbia River and the Mexican boundary line. Pacific Gas and Electric Company has completed preliminary arrangements for the construction of a transmission line to the summit of the Sierras east of Sacramento over which power will be exchanged with the Truckee River Power Company operating principally in the State of Nevada.

While but little energy is actually transmitted to great distances by means of the interconnection of these lines, they are of great value in making temporary surplus water power upon one system available upon some other system where there is a shortage. Not only does the inter-connected transmission system distribute the benefits of the diversity in the time of maximum stream flow, but it results in a noticeable economy by permitting the construction of new plants in large units and almost eliminates the period of partial operation, which would be inevitable if such plants could be used only to meet the requirements of individual companies. The importance of this factor will be better realized when it is pointed out that the total generating capacity of the public utilities in the state is now close to one million horse-power and the annual growth, which for several years has averaged 8 per cent, demands the construction in each year of the equivalent of one power plant that but a few years ago would have been of record-breaking size.

In keeping pace with this increased demand for electricity, the electric utilities of the state have made substantial additions to their generating capacity. Pacific Gas and Electric Company placed in operation during the fiscal year its Pit River No. 1 plant of approximately 80,000 horse-power capacity; the San Joaquin Light and Power Corporation installed an additional unit of 20,000 horse-power in its natural gas-burning steam plant in the Midway oil fields, and The California-Oregon Power Company added a 15,000 horse-power generator to its Copco hydro-electric plant. Looking to the future, San Joaquin Light and Power Corporation has commenced preliminary survey and road work in connection with a development on the Kings River; Pacific Gas and Electric Company is actively engaged in tunnel work in its Pit River No. 3 development of 100,000 horse-power; the Great Western Power Company is preparing for the installation, early in 1924, of a 30,000 horse-power unit in its Caribou plant; Western States Gas and Electric Company is continuing work on its American River development, and Southern California Edison Company is carrying out work which will bring in about 125,000 horse-power of additional capacity in its Big Creek development before the close of the present calendar year.

CHAPTER X.

HYDRAULIC DIVISION.

The work of the hydraulic division of the Engineering Department of the Commission, for the year ending June 30, 1923, has comprised investigations of and reports on rates, service, regulations and other matters relating to public utilities supplying water for domestic and irrigation purposes.

There are in excess of 550 public utility systems in the state which have filed their rates, rules and regulations with the Commission. These utilities range in size from those supplying a few persons to those which serve approximately 90,000 consumers, and the investment in these systems varies from a few thousand to in excess of forty million dollars.

During the twelve months' period decisions were rendered in 205 formal proceedings, and 146 formal matters were filed with the Commission. The work of the division also included the consideration and investigation of 479 informal complaints.

CLASSIFICATION OF DECISIONS.

The following is a classification of formal proceedings involving water utilities decided during the year.

Formal Complaints:		
Rates.....	47	
Transfers.....	54	
Securities.....	38	
Certificates of public convenience.....	10	
Discontinuance of service.....	10	
Fixing just compensation.....	3

Rates.....	5	
Investigation on commission's own motion.....	3	
Invasion of territory.....	2	
	<hr/>	23
Total formal matters filed.....		<hr/> 146

RATE PROCEEDINGS.

During the past fiscal year the number of applications for increased rates has decreased, as compared with the applications filed during the previous year. This is probably due to the fact that many of the utilities have previously appeared before the Commission and have had their rate schedules adjusted to conform, to some extent, to the very material increases in the cost of maintenance, operation and construction. The indications at this time are that general reductions in the rates of water utilities cannot be made equitably until there is some decided reduction in the costs of material and labor. In a general way it may be stated that costs of operation and construction of water systems are fully 70 per cent higher than the corresponding costs in 1914 and 1915. Such rate increases as have been granted have not been so great as the increases in cost of operation and construction.

Among the larger rate proceedings decided during the year are included Natomas Water Company, Port Costa Water Company, Haines Canyon Water Company, Consolidated Water Company of Pomona and Cuyamaca Water Company.

Forty-seven proceedings involving applications for increased rates were decided during the fiscal year, in all of which the hydraulic division made complete investigation, appraisal and report.

An investigation on the Commission's own motion into the reasonableness of the rates of one of the larger water companies resulted in a decrease in the former rates of approximately 10 per cent.

VALUATION OF PROPERTY.

During the course of the hydraulic division's investigations it is frequently necessary to make complete and extensive valuations of the properties of the utilities. A recapitulation of the valuations completed during the year shows that thirty-seven proceedings required appraisals ranging from \$923 to \$1,401,250. Eight of these appraisals showed a total in excess of \$100,000, the average of the thirty-seven valuations being \$164,635. The following tabulation shows the nature of the proceeding, the number of valuations and the amounts.

Number of valuations:	Nature of proceedings	Amounts
30-----	Rates	\$4,007,314 00
1-----	Rates and service	53,636 00
2-----	Just compensation	1,457,750 00
2-----	Service	4,508 00
1-----	Certificate	923 00
1-----	Securities	567,480 00
Totals 37-----		\$6,091,611 00

A complete statement is attached showing companies whose properties were appraised by the engineers of this division, setting forth in each individual case the valuations of property, application or case number, decision number and nature of proceeding.

TRANSFER OF PROPERTY.

During the year fifty-four transfers of public utility water properties were authorized, of which thirteen were to municipalities, and five to water or irrigation districts.

There has been a decided tendency on the part of municipalities to acquire and operate public utility systems, and during this fiscal year

the cities of Napa, Watsonville, Ventura, Monterey Park and East San Diego acquired the public utility water systems which formerly supplied the citizens, and are now operating the plants.

DISCONTINUANCE OF SERVICE.

Ten applications for authority to abandon public utility water service were decided during the year, eight of which were granted, one was dismissed at request of applicant and one was dismissed for lack of jurisdiction.

As applications of this nature are of great importance the Commission has insisted that the interests of consumers be protected fully and that the applicants thoroughly substantiate their claims before authority to discontinue is granted. The hydraulic division is invariably called upon for a complete report of conditions in proceedings of this nature.

INVESTIGATION ON COMMISSION'S OWN MOTION.

In some instances it has been necessary for the Commission to initiate an investigation on its own motion into the rates, rules, practices or service of various water utilities, and in connection with these proceedings engineers from this division have made extensive investigations and reports on the matters in controversy.

During the fiscal year decisions have been rendered in five proceedings initiated on the Commission's own motion.

CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY.

Owing to the rapid growth of the state new water systems are being constructed to supply consumers located upon subdivisions and tracts opened for sale and settlement. Certificates of public convenience and necessity are required before these systems can operate as public utilities.

Ten certificates were granted during the fiscal year in each of which the engineers of this division made investigation and report.

FIXING JUST COMPENSATION FOR PUBLIC UTILITY PROPERTY.

During the fiscal year the hydraulic division has been called upon to make investigations, inventories, appraisals and reports upon two public utility water systems which municipalities have desired to acquire under eminent domain proceedings or otherwise.

These investigations and appraisals require exceptional accuracy and care in order to avoid a reversal of the Commission's findings of just compensation in the Supreme Court. It may be noted that in the only proceeding of this character taken to the Supreme Court the Commission's finding was sustained.

INADEQUATE SERVICE.

The engineers of the hydraulic division are frequently called upon to investigate matters relating to formal complaints of inadequate service rendered by water utilities, and to make recommendations as to the best methods of improving conditions.

Decisions were rendered in twenty-three formal proceedings involving service matters in each of which an investigation and report were required.

The rapid growth of the state and the difficulty in securing material have made it extremely difficult for the utilities to provide adequate facilities for supplying consumers. These conditions will no doubt be remedied to a very large extent within the next year.

OTHER WORK PERFORMED.

Thirty-eight decisions affecting public utility finance, in the nature of issuing securities, were rendered during the year. These matters are largely handled by the department of finance and accounts, but in many instances have required a separate investigation by the hydraulic division.

Other matters, requiring work by the engineers of the division, and decided during the year, were three proceedings affecting the Commission's jurisdiction; one proceeding involving the invasion of a utility's territory; and four proceedings affecting options, contracts or leases.

SUPERVISION OF DAM CONSTRUCTION.

The Commission's General Order No. 50 provides that no public utility shall begin the construction of any dam without first having submitted to the Commission the plans and specifications thereof, in order that inquiry may be made into the safety of the contemplated structure, and shall have received from the Commission its approval of the plans and specifications.

In accordance with the conditions of this order the engineers of the division have checked the plans of proposed dams submitted by the various utilities, and have made inspections of foundations and progress of the work in order to determine whether or not the plans approved were being complied with, and that proper precautions were being taken to provide a safe structure.

Among the investigations made was that of a proposed triple arched concrete dam, 110 feet high, for El Dorado Water Company, near Placerville. An investigation was also made of the proposed increase in height of Lake Hemet Water Company's masonry dam and of an earth fill dam owned by the same company.

CHAPTER XI.

TELEPHONE AND TELEGRAPH DIVISION.

During the past fiscal year, the telephone and telegraph division, in addition to being engaged in formal proceedings, has had before it an exceeding large amount of informal work.

The critical situation faced by the telephone utilities, particularly in the southern part of the state, brought about by the great influx of population together with the difficulty of securing the necessary materials and supplies for construction work, has resulted in a huge task of supplying the demand for telephone service. This condition has been reflected in the large number of informal complaints to the Railroad Commission, particularly, in connection with delayed installations and service.

USE OF THE TELEPHONE.

It is interesting to note the rate of increase in the number of telephones within the State of California during the last few years. The following table will show this growth for the past five years for the cities of San Francisco, Los Angeles, and for the entire state.

TABLE NO. 1.
Number of Telephones.

	San Francisco	Los Angeles	State of California
1919-----	138,500	128,900	548,000
1920-----	149,300	140,700	602,000
1921-----	158,800	154,700	655,000
1922-----	167,200	169,000	716,000
1923-----	179,400	197,400	792,000

The use made of the telephone is also of interest. Nowhere in the United States, not even in New York or Chicago, is the telephone used to the extent it is in California and particularly in Los Angeles. The following table shows in addition to the number of telephones, the average number of calls per telephone per day and the average number of telephones per every 100 population:

TABLE NO. 2.
Use of Telephone in California.

Location	Number of telephones	Average number of calls per telephone per day	Average number of telephones per 100 population
San Francisco-----	179,400	4.7	23
Los Angeles-----	197,400	7.5	22
Oakland-----	53,400	5.1	18
Portland-----	71,300	6.5	23
Seattle-----	83,200	6.3	21
State of California-----	792,000	4.7	20
United States-----	14,500,000	4.0	13

The above information shows that approximately 840,000 calls are made every day in San Francisco, 1,500,000 in Los Angeles, 3,700,000 in the State of California and 58,000,000 calls in the United States. These figures show in a general way how much the telephone is used.

FORMAL PROCEEDINGS.

During the past year the Commission has rendered forty-nine decisions in relation to telephone and telegraph proceedings exclusive of stock and bond proceedings affecting these utilities. There were at the close of the year fifteen proceedings pending awaiting the decision of this Commission. Table No. 3 following shows a segregation of these decisions rendered during the year and proceedings pending at the close of the year. Table No. 5 following contains a complete detail list of the decisions rendered.

TABLE No. 3.

Number of Decisions Rendered during the Year ending June 30, 1923, and Proceedings Pending as of June 30, 1923.

Nature of proceeding	Number of decisions rendered			Number of proceedings pending

VALUATIONS.

Valuations of seven telephone and telegraph utilities properties have been made during the past year. The list of the utilities whose properties were valued together with the valuation found by the Commission are set forth in the table following:

TABLE No. 4.

Valuation of Telephone and Telegraph Properties.

April 1, 1922—Suisun and Green Valley Telephone Company.....	\$19,436 00
June 1, 1922—Elk Grove Mutual Telephone Association.....	4,480 06
October 1, 1922—Sunland Rural Telephone Company.....	10,890 00
October 1, 1922—Lakeport and Blue Lakes Telephone Association.....	4,863 00
October 1, 1922—Associated Farmers' Telephone Lines of Lower Lake.....	515 00
Upper Lake Farmers' Telephone Association.....	685 00
January 1, 1923—T. H. Dassel (Morgan Hill Telephone Company).....	5,248 00

THE LOS ANGELES SITUATION.

The situation in Los Angeles has been the most perplexing and is, at the present time, the center of our activities.

The Southern California Telephone Company, which serves the city of Los Angeles and immediate vicinity, has connected during the past year 58,200 telephones and disconnected 29,900 telephones, resulting in a net gain of 28,300 stations. These figures show that in order to make a net gain of one telephone, three installations are involved; or in other words, for every new subscriber one old subscriber moves from one location to another, requiring, in addition to his own installation, the installation and disconnection of a telephone.

The growth of the City of Los Angeles, as compared with other cities, has been tremendous, particularly, during the last two years. The telephone company has not only had this growth to contend with, but also, it has been necessary to reengineer or remodel a very large portion of its present distribution system.

The Southern California Telephone Company has, in the city of Los Angeles, actually three different telephone systems, the manual system, the old three-wire automatic system and the new two-wire automatic system. The old three-wire automatic equipment is that of the former Home Telephone Company, and due to its age and operation, is being retired and replaced by the more modern and efficient two-wire equipment. Having three systems in operation at the same time has made it necessary to install special equipment in order that conversations might be carried on between any two subscribers of any two of the different systems.

The consolidation of the two former companies gave to the Southern California Telephone Company, to a large extent, a duplication of central offices, particularly in the downtown district, systems duplicating underground ducts, cables, lines and other equipment, and also, subscribers' switchboards and instruments. Eliminating these duplications and rearranging central office territories has been an exceedingly difficult task and is, at the present, not entirely completed.

Numerous exchange offices together with respective distribution systems supplying the residential sections adjoining the down town area have had to be remodeled due to the rapid change to business and apartment sections.

These rearrangements and the new construction work have had to be made to the existing plant while in service, which means that before any old equipment could be taken out or replaced the new equipment had to be first installed and operating, which meant a further doubling up during the process of change. This constant reconstruction work, together with the tremendous growth and change in the city of Los Angeles and the demand for an increased number of telephones has all been reflected in a poorer class of telephone service than otherwise would occur.

This Commission is constantly in touch with the conditions in Los Angeles and elsewhere throughout the state and is not only carrying on investigations and studies with a view that the utilities shall render the best service possible, but also, to estimate the future in order that the telephone utilities will make proper preparations now for the demand and service of the coming year.

INDUCTIVE INTERFERENCE.

In 1918, this Commission issued a General Order No. 52, which sets forth rules and regulations governing the construction and operation of power and communication lines for the prevention or mitigation of inductive interference. Work in connection with this order is largely informal in nature and requires that power and communication utilities file with this Commission reports regarding proposed construction of lines which are in any way involved in a parallel, or will result in the creation of inductive interference. The total number of reports received to date, since the issuance of this order, is 394. Of these, 79 have been received during the past fiscal year.

The Commission has had before it one formal case, *Postal Telegraph-Cable Company vs. Pacific Gas and Electric Company*. In this proceeding, the Postal Company asks that steps be taken which will result in the mitigation of interference which they now experience in their circuits due to the proximity of certain transmission lines of the Pacific Gas and Electric Company located between the cities of Suisun and Sacramento.

A decision in this proceeding has been rendered requiring that a further hearing be held in order that the Western Union Company, Southern Pacific Company and The Pacific Telephone and Telegraph Company might appear as their circuits are also involved in this particular parallel. The proceeding also ordered that a joint conference of all utilities operating either power or communication circuits within this parallel be called by the Commission's engineering department for the purpose of promulgating plans for the relocating of the circuits within the parallel.

The proceeding will be reopened after certain tests have been made to determine the reduction in induction which may be obtained by making certain changes in the power system and after certain cost figures have been submitted by the different utilities operating lines which are involved in the relocation of the Postal Company's circuits within certain portions of the parallel where the horizontal separation is small.

The Commission's engineering department is preparing to hold a series of informal conferences of all the power communication utilities operating within the state for the purpose of reviewing the progress which has been made by the application of General Order No. 52, considering the advisability of making revisions in this order, and also to consider the question of formulating rules and regulations to govern the location of power and communication circuits along public roads.

A number of instances have come to the attention of this Commission where both sides of a public road have been occupied by power or communication circuits. This condition has made it very difficult to extend the lines of the other utilities and it appears possible that some general practice might be standardized by the utilities in which one side of the road will be left for power circuits and the other for communication lines.

FILING OF RATE SCHEDULES.

The Commission has issued a General Order No. 68 governing the filing of rate schedules, rules and regulations of telephone and telegraph utilities. The issuance of this order requires each telephone and telegraph company to file a complete schedule, consisting of rate schedules and rules and regulations governing service, in a uniform and standard manner. The order also provides that the utilities include in their schedules, maps showing the boundaries of primary rate areas and exchange areas. This will involve considerable work but will eliminate a great amount of difficulty both now and in the future regarding the definite location of dividing lines between adjoining exchange areas. It is interesting to note that the schedule of The Pacific Telephone and Telegraph Company consists of 25 volumes containing over 5000 pages.

PROCEEDINGS PENDING.

The more important proceedings pending at the close of this fiscal year are:

(1) Case 1354—*California Railroad Commission vs. Pacific Telephone and Telegraph Company.*

(2) Case 1362—*Postal Telegraph-Cable Company vs. Pacific Gas and Electric Company.*

(3) Application 8145—*City of Los Angeles for investigation of service conditions.*

Case 1354 is a proceeding instituted by this Commission on August 1, 1919, in which it ordered that investigation be made to determine the reasonableness of all rates and charges and rules and regulations of The Pacific Telephone and Telegraph Company for long distance, toll and telegraph service and exchange telephone service rendered within the State of California.

A preliminary hearing was held in this proceeding on September 15, 1919. However, to carry on this investigation will mean the valuation of the entire properties of The Pacific Telephone and Telegraph Company within the State of California, and also, extensive investigations and studies of the operating revenues and expenses of that company. This work has been held in abeyance, primarily, on account of the lack of the necessary men.

Application 8145 is a request made by the city of Los Angeles asking that the Commission make a survey and investigation of the service conditions now existing in the city of Los Angeles. This application, together with Case 1796, *H. G. Brainerd et al. vs. Southern California Telephone Company*, has been heard and submitted and is now awaiting decision.

Case 1362, a complaint made by Postal Telegraph-Cable Company against Pacific Gas and Electric Company, has been decided and reopened to allow the Western Union Company, the Southern Pacific Company and The Pacific Telephone and Telegraph Company to appear and be heard relative to certain proposed circuit relocations. This proceeding has been discussed more fully above under "Inductive Interference."

TABLE NO. 5.
TELEPHONE AND TELEGRAPH RATE AND SERVICE PROCEEDINGS DECIDED DURING FISCAL YEAR ENDING JUNE 30, 1923.

Decision Number	Number	Utility	Territory affected	Date decided	Remarks
10534	A 7634	Frank Pellissier and Interstate Telegraph Company.	Bentcn.	July 1, 1922	Sale

Reopening=Reopening office.

Exchange=Opening exchange.

Closing=Closing offices.

Dismissal=Proceeding dismissed.

Transfer=Transfer of property.

Abandonment=Abandonment of service.

CHAPTER XII.

TRANSPORTATION DIVISION.

During the last year the important work of this division included a study of a general plan of consolidation of the railroads of the United States in connection with hearings before the Interstate Commerce Commission as affecting the railroads of California; and the submission of evidence at these hearings; preparation and presentation of evidence before the Interstate Commerce Commission in connection with grade crossing elimination and with passenger terminal unification in the city of Los Angeles; the Los Angeles Street Railway survey; the Los Angeles Harbor Transportation Development investigation; the making of a report dealing with service and operation on the Bakersfield and Kern Railway Company, Fresno Traction Company, Rodeo-Vallejo Ferry Company and Fairfax Incline Railway Company.

GRADE CROSSINGS.

A large part of the work during the year was necessarily in connection with applications filed with the Commission for the authorization of grade crossings. There were 280 such applications filed during the year as contrasted with 155 during the previous year, an increase of over eighty per cent. The largest part of this increase came in the first half of the year 1923 and, because of several resignations in the division, required more delay in handling than had previously been the case. This increase is, no doubt, largely due to the development of California, as a major portion of such applications involve the construction of grade crossings on spur tracks constructed to serve new industries or, in the larger cities, existing industries.

VALUATIONS.

The following valuations of transportation properties other than steam railroads have been made by the Commission during the year. All of these valuations have been made in connection with proceedings involving rates.

1. *Rodeo-Vallejo Ferry Company—Mare Island Run (Application No. 8512).*

This application was presented in evidence at a hearing involving the rates from Vallejo to Mare Island.

Historical reproduction cost	\$50,176 00
Historical reproduction cost, less depreciation	24,601 00

2. *Bakersfield and Kern Electric Railway Company (Application No. 7230).*

A valuation upon the historical reproduction cost basis of this property was made in conjunction with the investigations into service, operations and financial conditions.

Operative property	\$558,464 00
Nonoperative property	12,062 00
Total	\$570,526 00

Historical reproduction cost less depreciation:

Operative property	\$339,342 00
Nonoperative property	8,586 00
Total	\$347,928 00

3. *Fresno Traction Company (Application No. 7205).*

Valuation was made on the historical reproduction cost basis in con-

nection with the resettlement franchise obtained by the railroad from the city of Fresno. The resettlement franchise was on the basis of a minimum fare rather than on the basis of division of profits as has been the usual practice and because of this feature the franchise contained provisions to the effect that a yearly adjustment of fares was to be made predicated upon current earnings. The valuation presented by the engineering department was, therefore, on the reproduction cost basis and totaled as follows:

	Operative	Nonoperative	Total
Historical reproduction cost.....	\$1,507,320	\$172,446	\$1,679,766
Historical reproduction cost, less depreciation.....	1,043,985	132,232	1,176,217

4. *Fairfax Incline Railway Company (Application No. 8877).*

This valuation covered the operative property of the Fairfax Incline Railway Company which consists of a funicular railway near Manor, Marin County.

Historical reproduction cost.....	\$18,641 00
Historical reproduction cost, less depreciation.....	12,026 00

STEAM RAILROAD VALUATIONS.

In accordance with the provisions of the Interstate Commerce Commission Act valuations of railroad properties prepared by the bureau of valuation of the Interstate Commerce Commission are submitted to the Governor of each state. As prepared by the bureau of valuation there are three reports, namely:

1. Engineering Report—An inventory and appraisal of all properties except lands.
2. Land Report—An inventory and appraisal of all lands.
3. Accounting Report—Dealing with history book cost and earnings, financial and corporate.

These reports, for both interstate and intrastate railroads, comprising a valuation of the road and equipment are referred to this Commission for attention.

Table No. 1 shows the tentative valuation figures found by the bureau of valuation for cost of "reproduction new" and "reproduction cost less depreciation" for all items of property except land and the "present value" of lands. These reports, which have been submitted to the Commission, known respectively as Engineering Reports and Land Reports, are submitted by the bureau of valuation to the Interstate Commerce Commission and the carrier concerned at the same time that they are sent to the various states.

At some later time the Interstate Commerce Commission prepared a tentative valuation, based on the findings of the bureau of valuation, which is submitted to the states and the carriers with notice that protest and request for public hearing must be given within a specified time. The tentative valuation is one figure for all the property of the carrier including, in addition to the items listed in the engineering and land reports, materials and supplies on hand and all other elements of value.

Unless protest is made the tentative value becomes the final value.

During the year tentative valuations have been received as follows:

Amador Central Railroad Company.

California Western Railroad and Navigation Company.

Cement, Tolenas and Tidewater Railway Company.

Lake Tahoe Railway and Transportation Company.

Nevada County Narrow Gauge Railroad.

Sierra Railway Company of California.

South San Francisco Belt Railway.

TABLE NO. 1.

VALUATION OF STEAM RAILROADS BY INTERSTATE COMMERCE COMMISSION—DIVISION OF VALUATION—FILED WITH THE GOVERNOR OF THE STATE OF CALIFORNIA
AND AVAILABLE TO THE ENGINEERING DEPARTMENT TO JUNE 30, 1923.

Railroads	Valuation as of date	Main track, miles	All track, miles	Engineering report cost of reproduction		Present value of land	Total cost of reproduction	
				New	Less depre- ciation		New	Less depreciation
Amador Central Railroad Company.....	June 30, 1916	11,794	14,542	\$355,439	\$286,989	\$14,862	\$370,301	\$301,851

NOTE.—All these figures are for lines in California, and are preliminary and subject to revision by the Interstate Commerce Commission.

*Equipment (Accounts 51 to 58 inclusive) has not been allocated to the various states and has not been included in these amounts.

(a) Land reports have not been received.

All the tentative valuations have been protested by the carriers who, through their "Presidents' Conference Committee," which is the central railroad valuation organization, have adopted a standard form of protest. This protest consists, first, of a general protest based upon principles, and second, the specific protest the particular carrier makes to the engineering or land reports submitted by the bureau of valuation. Copies of these objections made by the carriers are filed with this Commission.

The Engineering Department of this Commission has already made complete valuations on a large number of the interstate and intrastate railroads and when the bureau of valuation's tentative reports on road and equipment have been received a detailed check is made to ascertain the methods used and the results obtained. A check is also made of the claims and objections submitted by the carriers.

Since attendance at public hearings of these matters in Washington, D. C., is not practicable, a written protest is then made by this Commission and forwarded to the Interstate Commerce Commission.

There have been many objections raised by both carriers and the various state commissions as to the principles used by the bureau of valuation. If the Interstate Commerce Commission does not uphold the bureau of valuation upon these matters of principle all valuations thus affected will have to be changed. In order that the various objections may be presented and receive consideration, the Interstate Commerce Commission has held several hearings *en banc* for oral argument upon these contested basic principles before finding the tentative valuations.

At the hearings held in Washington on valuation dockets which included the following California roads, Western Pacific Railroad Company, Tonopah and Tidewater Railroad Company, and Death Valley Railroad, this Commission's chief engineer, Mr. Richard Sachse, and its attorney, Mr. Hugh Gordon, appeared and presented evidence on behalf of the Commission.

Hearings were also held in the valuation dockets of the Riverside, Rialto and Pacific Railroad Company (now a part of the Los Angeles, Salt Lake Railroad) and the Cement, Tolenas and Tidewater Railroad Company, but decision in these matters is being withheld, it is understood, pending the Interstate Commerce Commission's action in the leading cases.

INVESTIGATIONS OF SERVICE, OPERATING AND FINANCIAL CONDITIONS.

Investigations of this kind are usually made in connection with proceedings involving rates or the issuance of securities. The purpose is to set forth the facts as relating to the revenues and expenses to show as a result of a careful survey the quality of the service rendered and any possibilities of increasing the revenues or decreasing the expenses; to determine if the book charges follow the physical changes in the property and to set forth the past, present and future return to the utility is one factor of measuring whether or not a fair return is earned from a fair value of the properties.

Necessarily these investigations include a study of the traffic, the methods of operation and include, in some cases, recommendations to the political divisions of the state which are thought helpful in increasing the efficiency of operation.

A year's experience with these careful studies has substantiated the previous conclusion that they are a successful measure toward assisting the utilities to render more efficient and economical service.

Three investigations into the operating revenues, expenses and service of transportation utilities have been completed during the year. These investigations included the Rodeo-Vallejo Ferry Company-Mare Island Run (Application No. 8512), Bakersfield and Kern Electric Railway Company (Application No. 7230) and Fresno Traction Company (Application No. 7205). In the case of the Bakersfield and Kern Electric Railway Company the transportation division made a report on the service and operating expenses of the railway system within the city of Bakersfield and made recommendations, the result of which made possible the continuation of the five-cent fare. The investigation of the Fresno Traction Company was made in connection with the resettlement franchise.

SPECIAL INVESTIGATIONS.

Los Angeles Street Railway Survey—The Commission in its Decision No. 10930 involving the rates and fares of the Pacific Electric Railway Company stated, in brief, that satisfactory local street car transportation in Los Angeles could not be brought about and the necessary expansion of a growing city properly met until there is a unification of the two local systems into one ownership and one management, and stated further that this could be accomplished in one of three ways:

- (a) Pacific Electric to take over the Los Angeles Railway lines.
- (b) The Los Angeles Railway to take over the local lines of the Pacific Electric.
- (c) The city of Los Angeles to acquire both.

In Decision No. 10929 it was suggested and recommended that a conference be held by the representatives of the city of Los Angeles, the Commission and the street railway companies with a view to working out this problem. As a result of the Commission's suggestion the Los Angeles city council and board of public utilities extended an invitation to discuss this matter at a conference. Such a conference was held and as a result of further negotiations it was arranged that a survey should be made with the object of preparing a report dealing with the different plans of consolidation as outlined above and pursuant to these negotiations a memorandum covering the scope of the survey and method of handling the work was agreed upon by the board of public utilities, the Los Angeles Railway Corporation, the Pacific Electric Railway Company and the Commission.

The memorandum of agreement between the four parties provided for the making of an inventory and appraisal of the railway properties of the two utilities within the city of Los Angeles and a survey investigation dealing with matters of service, operating revenues and expenses and of improvements and extensions to the systems. Under the heading of "Inventory and Appraisal" it is proposed that both the historical reproduction cost and the reproduction cost new, together with estimates of accrued depreciation, should be made. Under the service investigation, careful consideration was to be given to the various means of possible consolidation of the operating systems.

The cost of this work is to be borne by the two railway companies, they also to maintain certain engineering force. The companies agree

to pay on presentation of bills by the respective public authority the salaries and expenses of the engineers assigned by the Commission, or the board of public utilities of Los Angeles. The work of this survey commenced early in 1923 and, at the close of the fiscal year, the work was approximately 40 per cent completed, there being employed at that time thirty-one men by the Los Angeles Railway, four by the Pacific Electric, three by the city of Los Angeles and nine engineers from the Commission's engineering department. It is expected the work will be completed about January 1, 1924.

TRANSPORTATION DEVELOPMENT AT LOS ANGELES HARBOR INVESTIGATION.

The city council of Los Angeles on August 9, 1922, passed a formal resolution calling a conference of the board of public utilities, the California Railroad Commission and the harbor department of the city of Los Angeles to consider the promulgation of a comprehensive plan and survey for adequate and proper means of transportation for the harbor district of the city of Los Angeles.

Thereafter a conference was held with the Commission where it was agreed that the proposed line of the Los Angeles and Harbor Railway (a Santa Fe subsidiary) should be studied and should be made the first part of the harbor transportation problem. At this conference an engineering committee consisting of Mr. H. Z. Osborne, Jr., chief engineer, board of public utilities; J. W. Ludlow, harbor engineer, city of Los Angeles; Richard Sachse, chief engineer of the commission; and H. G. Weeks, transportation engineer, was appointed to make this report. The first part of the report above referred to has been made and submitted to the city of Los Angeles and the Commission in addition also presented it at a hearing before the Interstate Commerce Commission on the application of the Santa Fe and Harbor Railway for a certificate of public convenience and necessity as mentioned elsewhere.

After a careful consideration of the construction of the Santa Fe line to the harbor the engineering committee came to the conclusion that the franchise applied for should be granted by the city of Los Angeles with clauses providing:

- (1) That the city can take over such portion of the trackage as should be needed for an outer belt line.
- (2) That the city can take over the trackage in Wilmington for unified use.
- (3) That the Santa Fe will in the future change its line to avoid any inner harbor development at Bixby Slough if it is decided a free right of way in another location.

It is also concluded that the investigation should be continued for the investigation of a plan of the facilities in Los Angeles harbor and pursuant to this recommendation the city council of the city of Los Angeles asked that the investigation be continued.

Because of the press of work it has not been possible to continue this investigation as diligently as the circumstances seem to demand, but it is hoped that in the last half of the present year this investigation will be completed as the extremely rapid growth at Los Angeles harbor, both on the docks and particularly in the railroad yards, demands an immediate solution of the transportation problem.

LOS ANGELES TERMINAL AND GRADE CROSSING PROCEEDINGS.

The scope and purpose of this large proceeding have been discussed in previous annual reports. During this year the State Supreme Court decided that the Railroad Commission did not have authority to order terminal unification in Los Angeles because such power, if any existed, had been transferred to the Interstate Commerce Commission by the Transportation Act, 1920.

Soon after this decision was rendered the city of Los Angeles instituted a proceeding asking the Interstate Commerce Commission, in brief, to order what the California Commission had ordered in its decision on rehearing. The Interstate Commerce Commission set this proceeding for hearing in Los Angeles on July 5 and at the close of the year the transportation division was engaged in the preparation of evidence in this matter, the Railroad Commission having decided to enter an appearance as an intervener.

The preparation of evidence was made jointly with the city of Los Angeles, and, while a large part of it was available in the record for the California Commission, practically all statistical matter was brought up to date before the hearing of the Interstate Commerce Commission.

NEW RAILROAD CONSTRUCTION.

During the year there was more new railroad construction in California than for several years. The new lines constructed or commenced are as follows:

- (a) *By Southern Pacific Company:*
 - Branch line south and east from Calipatria.....21 miles
 - Branch line southerly from Magunden.....19 miles
- (b) *By Pacific Southwestern Railroad:*
 - From Lompoc to White Hills.....4 miles
- (c) *By Minarets and Western Railroad Company:*
 - Northerly from Fresno.....75 miles
- (d) *By Pacific Electric Railway Company:*
 - Main line connection between Glendora and Lone Hill.....4 miles
 - East San Gabriel extension.....3 miles
- (e) *By the Atchison, Topeka and Santa Fe Railway Company:*
 - Los Angeles and Harbor Railway extension to Los Angeles.....13 miles

WORK UNDER TRANSPORTATION ACT.

Under the Transportation Act, 1920, passed by congress and approved that year, it became necessary for interstate carriers to apply to the Interstate Commerce Commission for certificates of public convenience and necessity authorizing them to construct new railroads, either as new construction or as extensions, or to abandon existing service or tracks. This does not apply to secondary tracks, such as sidings and spurs. The act also makes it incumbent upon the Interstate Commerce Commission to give the states in which these lines are located an opportunity to make such representations as they desire, and to ask that a public hearing be held.

In California proceedings of this nature are handled by this Commission and during the year there have been presented to the Commission, for its consideration, several matters which will be described. These proceedings involve only those requiring a certificate of public convenience and necessity and the list does not include similar proceedings in which carriers asked the authorization of the Interstate Commerce Commission to issue securities.

There have been referred to the Commission by the Interstate Commerce Commission applications for certificates of public convenience and necessity for the construction of lines as follows:

Pacific Southwestern Railroad Company.

The Pacific Southwestern Railroad Company in Finance Docket No. 2694 applied to the Interstate Commerce Commission for authority to construct a railroad from Lompoc to White Hills, both in Santa Barbara County. This application was investigated by the engineers of the Commission in connection with this proceeding.

Southern Pacific Branch southeasterly from Calipatria.

Southern Pacific Company in Finance Docket No. 2798 applied to the Interstate Commerce Commission for a certificate of public convenience and necessity to construct and operate a line 21.3 miles long from Calipatria to a point 7 miles north of Holtville, Imperial County. From an investigation made by the transportation division it was found that the extension would redound to the benefit of the public and the Railroad Commission thereupon recommended that the extension be authorized. The Interstate Commerce Commission later granted this application.

Southern Pacific Magunden-Arvin Branch.

The Southern Pacific in Finance Docket No. 2819 requested the Interstate Commerce Commission for authority to construct a branch line from Magunden north a distance of 17.6 miles to a point near Arvin, together with certain spur tracks and branch lines. It was estimated by the company that the construction would cost \$506,423 exclusive of equipment and the line would serve a considerable area of fruit and garden lands now being developed. Recommendation was made after investigation that the extension be authorized.

Construction of Santa Fe to Los Angeles Harbor.

The Santa Fe and Los Angeles Harbor Railway, a subsidiary of the Santa Fe Company, in Finance Docket No. 2434 requested the Interstate Commerce Commission for authority to construct a new line of railroad from El Segundo to Los Angeles Harbor. The main purpose of the construction was to connect the Santa Fe Company's system with the harbor of Los Angeles by its own tracks. This application involved an additional survey to ascertain the advisability of constructing the new line from an operative standpoint and in connection with large number of crossings proposed of important thoroughfares in Los Angeles County by the railroad. In cooperation with the chief engineer of the board of public utilities and the harbor engineer of Los Angeles, the chief engineer and transportation engineer of the Railroad Commission prepared a report on this matter which was submitted before the Interstate Commerce Commission. The grade crossing proceeding involving this extension was pending before this Commission at the close of the year.

Southern Pacific-Central Pacific Unmerger Proceeding.

As noted in last year's report, the Supreme Court of the United States on May 29, 1922, rendered its decision directing the severance of the control of the Central Pacific Railway by Southern Pacific Company through stock ownership or lease. This decision was in a suit begun in 1914 by the Attorney General of the United States under the Sherman

Anti-trust Act and was a somewhat similar proceeding to that in which the Union Pacific Railway Company was ordered to divest itself of the control of Southern Pacific Company.

On October 17, 1922, Southern Pacific Company made application to the Interstate Commerce Commission for an order authorizing the acquisition of the control of Central Pacific Railway Company under the provisions of the Transportation Act of 1920. It was contended that this act had superseded the Federal Anti-trust Act of June 2, 1890, known as the Sherman Anti-trust Act, as far as the control of one railroad by another was concerned.

Since this application was filed there commenced on the part of the Union Pacific Railroad an organized effort opposing the granting of the application and on the part of the Southern Pacific an effort to secure all the public support possible for granting the application. The efforts of these two contending interests resulted in a flood of propaganda almost unparalleled in the railroad history of the state. Particular efforts were made to secure the support of the associations of shippers and chambers of commerce in the form of resolutions endorsing either the retention of the control of the Central Pacific by the Southern Pacific or in favor of their separation. As a result of this the Commission was in receipt of hundreds of such resolutions and letters in addition to the verbal arguments of many committees representing the larger traffic associations.

Following the receipt of this application the Engineering Department of this Commission made an extended investigation with particular reference to the effect in the State of California of the granting of the application and the Commission's chief engineer with its attorney proceeded to Washington for hearings before the Interstate Commerce Commission in November, 1923, where the former as a witness presented evidence on behalf of the Commission.

After the close of the hearings the Interstate Commerce Commission, in order to expedite final decision, requested the views of all parties regarding arrangements to be sanctioned and required, in case the decision was favorable to the acquisition of the control of the Central Pacific by the Southern Pacific, the terms and conditions that would safeguard all interests and suggested specific consideration to the authorization of such control to the following extent by the following means:

(a) By lease until December 31, 1984, subject to termination by order of this Commission, if and when found by this Commission to interfere with the consummation of its final plan of consolidation when promulgated under section 5 of the Interstate Commerce Act, as amended; and

(b) By ownership of all of the issued and outstanding capital stock of the Central Pacific during the continuance of the lease subject to the following conditions:

First—The Southern Pacific shall join with the Union Pacific in maintaining via the lines of said companies between Omaha, Nebraska, and San Francisco Bay points, as parts of one connected continuous line, through passenger, mail, express and freight train service between San Francisco, or Oakland, California, and Chicago, Illinois, at least equal in every respect to that afforded by either with its connections between Los Angeles, California, or Portland, Oregon, and Chicago, Illinois.

Second—The Southern Pacific shall join with the Union Pacific in maintaining via the lines of said companies between Roseville, Cali-

for California, and Omaha, Nebraska, as parts of one connected, continuous line, perishable freight train service from Roseville, California, to Chicago, Illinois, at least equal in point of time to that afforded by either with its connections from San Bernardino or Colton, California, to Chicago, Illinois.

Third—The Southern Pacific shall cooperate with the Union Pacific in the maintenance of train schedules under which neither shall discriminate as to time of service against the other in favor of any other connection through Ogden or Salt Lake City.

Fourth—The Southern Pacific shall, at the request of the Union Pacific, provide for the publication and maintenance of rates via the Central Pacific through Ogden between all Southern Pacific and Central Pacific points in California west of Banning, and Oregon on the one hand, and Colorado common points and points east thereof on the other, no higher than apply concurrently between these same points via any other route in which *it* participates. While the Commission may have no power to impose any conditions upon the Union Pacific in this proceeding, it is suggested that the same course should be pursued by the Union Pacific in connection with rates between the same points via its various routes.

Fifth—The Southern Pacific shall cooperate with the Union Pacific to secure by active solicitation the routing of the maximum of freight traffic via Union Pacific and Central Pacific lines through the Missouri River and Ogden as parts of one connected continuous line between all points in California north of and including Caliente and Santa Margarita (including points in Oregon and the Klamath Falls Branch, Kirk and south) on the one hand, and points north and west of a line along the northern boundaries of Oklahoma and Arkansas to the Mississippi River, thence via the Mississippi and Ohio rivers (but not including intermediate cities on the Ohio River) to Wheeling, West Virginia, thence north on a line drawn just east of Pittsburgh and West Virginia, thence north on a line drawn just east of Pittsburgh and Buffalo to Niagara Falls. We shall be glad to have the view of the interested parties upon the suggested plan.

After a review of the evidence the Commission (California Commission) advised the Interstate Commerce Commission as follows:

We conclude that the Interstate Commerce Commission will not hesitate to exercise its new far reaching powers and that in such exercise the Commission will be governed by the needs of the "public interest" in the sense that this term is used in the Transportation Act. Applying this test to that present proceeding, the merits of the case seem to us to permit only one answer:

No public benefit of any kind and character can possibly result by the separation of the Central Pacific lines from the Southern Pacific lines and by the creation of an independent competing carrier such as the Central Pacific could hope to become even in the most optimistic forecast of the final result of an attempted dissolution. As far as the State of California is concerned the result could be nothing but confusion, duplication and waste, a waste that in numerous ways would be bound to add to the burden to be carried by the people in freight and passenger rates. A separation could not, in the nature of things, be permanent and after a shorter or longer interim of uncertainty and waste, the Central Pacific would again, in accordance with economic laws, gravitate towards the one or the other of its natural alliances, the Southern Pacific or the Union Pacific.

Believing these views to be sound we earnestly urge upon the Interstate Commerce Commission the granting of the Southern Pacific application under such conditions as the Interstate Commerce Commission may deem proper to impose.

The terms and conditions quoted above were also approved.

The Interstate Commerce Commission in its decision dated February 6, 1923, allowed Southern Pacific Company to acquire control of the Central Pacific subject to certain conditions among which are the following:

(f) That the aforesaid lease shall contain a provision that the same shall become null and void and of no effect whenever this Commission shall find that the control, acquisition of which is herein approved and authorized, interferes with the consummation of the complete plan of consolidation adopted and published under the provisions of section 5 of the Interstate Commerce Act, as amended;

(g) That the control herein authorized by lease and stock ownership shall be held subject to termination by order of this Commission if and when found by this Commission to interfere with the consummation of its complete plan of consolidation under the provisions of section 5 of the Interstate Commerce Act and for this purpose the Commission reserves full jurisdiction over the case to make such order or orders as, after hearing, it may deem to be necessary and appropriate;

(h) That the Southern Pacific Company shall not voluntarily sell, pledge or otherwise dispose of the capital stock of the Central Pacific Railway Company or any part thereof without the consent of this Commission, except that any existing pledge of such stock may be ratified and confirmed;

(i) That this proceeding may be reopened at any time by order of the Commission either upon the initiative of the Commission or, in the discretion of the Commission, upon the motion of any person claiming an interest in the matter, for the purpose of making such orders as the Commission may deem necessary or appropriate supplementary to the present order.

CONSOLIDATION OF RAILROADS.

Reference is made in last year's report to proceedings instituted by the Interstate Commerce Commission in the matter of consolidation of railroads. The Interstate Commerce Act, to review briefly, provides that the Commission shall as soon as practicable prepare and adopt a plan for consolidation of the railway properties of the continental United States into a limited number of systems. In so doing, competition shall be preserved as fully as possible and wherever practicable the existing rates and channels of commerce shall be maintained. Cost of transportation as between competitive systems and as related to the values thereof, shall be as nearly the same as possible for the purpose of the employment of uniform rates in the movement of competitive traffic and, further, subject to the foregoing requirements, the competitive systems are to earn substantially the same rate of return on the value of their respective properties.

The act makes the states parties to these proceedings. Under these sections the Interstate Commerce Commission has prepared a tentative plan of consolidation and under Interstate Commerce Commission Docket No. 12964 "in the matter of consolidation of the railway properties of the United States into a limited number of systems," served this plan upon the states and the interested railroads.

After preliminary hearings in Washington the Interstate Commerce Commission set two hearings in California, one in San Francisco and one at Los Angeles.

This Commission asked a committee, consisting of its rate expert, attorney and chief engineer, to investigate the proposed plans of consolidation as far as California was concerned with a report of its findings. This report was prepared and it explained the situation and drew attention to the following matters of importance, which should have consideration in endorsing or opposing any plan of consolidation:

(a) *Flow of Traffic:*

(The north and south traffic in California and between Oregon and Washington on the north and Arizona on the south through California is heavy and as important, if not more so, as the east and west through traffic. This fact emphasizes the importance of maintaining and strengthening the railroad transportation facilities for the California and Pacific coast local service as distinguished from the east and west through service.)

(b) *Betterments and Improvements:*

Other things being equal, the state is interested in favoring such consolidation as will most likely bring about, as early as necessary, the important improvements and betterments necessary to take care of California traffic and desirable in the upbuilding of the state. Among these improvements are:

1. The betterment of the Central Pacific by double-tracking and grade reduction through the Sierra Nevadas.

2. The broad-gauging of the Central Pacific from Mina, Nevada, to Owenyo and Keeler, California.

3. The grade reduction of the Central Pacific main line over the Siskiyou.

4. Double-tracking and grade reduction of Southern Pacific over Tehachapi mountains.

5. The development and upbuilding of the Northwestern Pacific, with a possible continuation beyond the Oregon boundary and a possible connection with the Portland main line.

6. The building of a facility on the Southern Pacific main line between Oakland and Sacramento to do away with the Benicia-Port Costa ferry operations.

7. Los Angeles terminal unification and grade crossing elimination.

8. The construction of an adequate passenger station in Sacramento (this improvement has been agreed to by the Southern Pacific).

9. The best development of the railroad facilities serving the Los Angeles harbor and between the harbor and the city of Los Angeles.

10. The creation of better terminal facilities for the Santa Fe on the east side of the San Francisco Bay and in San Francisco.

11. The best possible regulation and interchange of car supply throughout the state, especially the supply of lines now weak in this respect.

12. Necessary branch line construction.

13. There should be kept in mind the ultimate electrification of certain of the main lines, especially through the mountain sections.

This report was also presented at several conferences which the Commission called with representatives of shippers, chambers of commerce, trunk lines and short lines. At this time the issues narrowed down to the following points:

(1) Should the Central Pacific be consolidated with the Southern Pacific or some other system.

(2) Should the Western Pacific be consolidated with the Santa Fe or with some other system.

(3) Should the Northwestern Pacific,

- (a) Remain under the joint control of the Southern Pacific and Santa Fe.
- (b) Be consolidated with the Southern Pacific.
- (c) Be consolidated with the Santa Fe.

(4) What disposition should be made of the short lines.

The Interstate Commerce Commission having, as noted above, authorized the Southern Pacific to acquire control of the Central Pacific and the Commission having taken a position in favor of such action, it was not only logical but necessary that the same position be taken with respect to the Central Pacific and the consolidation proceedings. The answer to the first point of the four above was then clear.

In its order of August 3, 1921, and promulgating its "Tentative Plan of the Commission," the Interstate Commerce Commission says:

Under our direction, Professor William Z. Ripley, of Harvard University, has prepared a report to us, which is the appendix. In some respects our tentative plan does not follow his recommendations, but presents alternatives thereto for like consideration. We indicate the main differences. We have sought to minimize dismemberment of existing lines or systems. This tentative plan is put forward in order to elicit a full record upon which the plan to be ultimately adopted can rest, and without prejudgment of any matters which may be presented upon that record. Whenever we refer to a property, the properties controlled thereby under lease, stock ownership or otherwise, should be understood as included unless otherwise indicated.

We find for the purposes of this tentative plan that the railway properties of the continental United States may be consolidated under the statute into the following systems.

There are then listed nineteen "systems," each one with its constituent roads and with numerous notes.

The concluding two paragraphs of this tentative plan are:

The carriers included in this tentative plan comprise most of the Class I steam railroads, but very few of those in Class II and Class III. Those not so included whether industrial common carriers, terminal carriers, interurban electric railways operated as a part of general steam railroad systems of transportation or engaged in the general transportation of freight, "short lines," or others, will be considered at the hearings to be hereafter assigned so that in the plan to be ultimately adopted, provision can be made for their inclusion in the systems.

We have not specifically mentioned water carriers. Where these carriers are now controlled by carriers by rail they will be considered as being included tentatively in the systems in which the controlling rail carrier has been included.

The tentative "systems" of particular interest to this state and to the so-called "western transcontinental region" are System No. 13, Union Pacific-Northwestern; System No. 14, Burlington-Northern Pacific; System No. 15, Milwaukee-Great Northern; System No. 16, Santa Fe, and System No. 17, Southern Pacific-Rock Island.

It should be understood that the Interstate Commerce Commission under the present law has not the power to force railroad consolidations in accordance with its tentative plan or any other plan. It merely is under mandate to "prepare and adopt a plan for the consolidation of the railroad properties of the continental United States into a limited number of systems." The act provides, however, that once such a plan is adopted, consolidations made voluntarily by the railroads, or otherwise, "must be in harmony with and in furtherance of the complete plan of consolidation."

At the hearings before the Interstate Commerce Commission, Mr. Richard Sachse, chief engineer of the Commission, testified in its behalf, submitting a memorandum dealing with all of the above questions, except the disposition of the short lines.

This memorandum dealt in great detail with the effect of the various proposed plans of consolidation upon the California conditions. Each of the proposed plans were carefully analyzed and recommendations made in general that the Southern Pacific-Central Pacific combination should continue; that it would probably be advisable from the California standpoint that the Western Pacific be consolidated with the Santa Fe and that the Northwestern Pacific be made a part of the Santa Fe. It was also suggested that the San Diego and Arizona Railway be made a part of the Southern Pacific System.

A comprehensive report was also submitted by the transportation engineer of the Commission relative to the numerous short line railroads in California, in which recommendations were made as to the advisability of the consolidation or combination of short line railroads with through line railroads. This report contains suggestions relative to 58 short line railroads in California operating a total of 3345 miles of track.

The following consolidation was recommended to the Interstate Commerce Commission by the Commission's transportation engineer:

To Atchison, Topeka and Santa Fe Railway Company:

Central California Traction Company.
California Western Railroad and Navigation Company.
Fresno Interurban Railway Company.
Kings Lake Shore Railroad Company.
Modesto and Empire Traction Company.
Nevada-California-Oregon Railway.
Northwestern Pacific Railroad Company.
Sacramento Northern Railway Company.
San Francisco, Napa and Calistoga Railway Company.
San Francisco-Sacramento Railroad Company.
Stockton Terminal and Eastern Railroad.
Sierra Railway Company of California.
Tidewater Southern Railway Company.

To Southern Pacific Company:

Amador Central Railroad Company.
Camino, Placerville and Lake Tahoe Railroad Company.
Chowchilla Pacific Railway Company.
Holton Interurban Railway Company.
Nevada County Narrow Gauge Railroad Company.
Pacific Electric Railway Company.
Peninsular Railway Company.
Petaluma and Santa Rosa Railroad Company.
San Diego and Arizona Railway Company.
Santa Maria Valley Railroad Company.
South San Francisco Belt Railway Company.
Visalia Electric Railroad Company.
Yosemite Valley Railroad Company.
Yreka Railroad Company.

Southern Pacific and Santa Fe Joint Control:

Richmond Belt Railway.
Sunset Railway Company.

Independent:

Albion Lumber Company Railroad.
 Arcata and Mad River Railroad Company.
 Bay Point and Clayton Railroad Company.
 Bucksport and Elk River Railroad Company.
 California Central Railroad Company.
 California Shasta and Eastern Railway Company.
 Cement, Tolenas and Tidewater Railroad Company.
 Coalfields Railway Company.
 Death Valley Railroad Company.
 Diamond and Caldor Railway.
 Hetch Hetchy Railroad.
 Howard Terminal Company.
 Humboldt Northern Railway Company.
 Indian Valley Railroad Company.
 Iron Mountain Railway Company.
 Lake Tahoe Railway and Transportation Company.
 McCloud River Railroad Company.
 Mojave Northern Railroad Company.
 Mt. Tamalpais and Muir Woods Railway.
 Minarets and Western Railway Company.
 Pacific Coast Railway Company.
 Pajaro Valley Consolidated Railroad Company.
 Quincy Railroad Company.
 Sacramento Valley and Eastern Railway.
 San Joaquin and Eastern Railroad Company.
 State Belt Railway.
 Sugar Pine Railway Company.
 Tonopah and Tidewater Railroad Company.
 Trona Railway Company.
 Ventura County Railway Company.

RAILROAD CROSSINGS AND SAFETY.

General Grade Crossing Survey—In January, 1916, the Commission on its own initiative prepared a program and held hearings in several of the principal cities with the view of obtaining public opinion and to secure the cooperation of the public and railways in the amelioration as far as possible of the hazards existing at all grade crossings within the state. At these public hearings representatives of counties, cities and railroads expressed the opinion that much good would result from a general investigation and the cooperation of all interested parties was assured.

In April, 1916, a survey was started by the Engineering Department of the Commission and work was continued until October, 1917, when it was discontinued on account of war conditions, and the forces employed on the survey were assigned to the preparation of data requested of the Commission by the War Department.

Early in this fiscal year (1922-1923) the survey was again taken up and grade crossings in eighteen counties were investigated. In some localities where the crossings were surveyed in 1916 and 1917 conditions have so materially changed that it was deemed advisable to make an additional inspection. In this connection fifty-six crossings were re-surveyed.

Following is a tabulation showing the crossings surveyed during the general grade crossing survey during the year ending June 30, 1923, by counties:

County	Number of crossings
Butte	52
Contra Costa	45
Fresno	121
Kern	91
Mendocino	30
Monterey	62
Nevada	5
Placer	29
Sacramento	147
San Joaquin	125
San Luis Obispo	39
San Mateo	8
Siskiyou	9
Solano	60
Stanislaus	8
Sutter	41
Tulare	229
Yuba	48
Joint investigation, with Highway Commission and U. S. Bureau of Roads, of state highway grade and separated grade crossings	560
Total	1,709
Crossings surveyed prior to June 30, 1922	7,218
Total crossings surveyed	8,927

This total represents about 85 per cent of all the grade crossings in the state.

State Highway Grade Crossings—In addition to the general grade crossing survey, an investigation was made of all state highway grade and separated grade crossings in conjunction with the United States Bureau of Roads and the California Highway Commission. This investigation was made at the instigation of the United States Bureau of Roads for the purpose of formulating a program of separating the grades at state highway crossings.

All of the 446 railroad grade crossings on the state highway were inspected including 22 overgrade and 33 undergrade crossings, which existed at the time the inspection was made. In addition 127 crossings on state highway routes but located in incorporated cities were inspected. All crossings were classified according to a classification made by the Bureau of Public Roads and may be numerated as follows:

	Crossings
Class I Grade crossings to be eliminated by relocation	(Not included)
Class II Crossing of primary highway and trunk line railway of two or more tracks	24
Class IIIa Crossing important single track and primary highway	71
Class IIIb Crossing of single track, moderate traffic and primary highway	58
Class IVa Crossing one important single track and primary highway	124
Class IVb Crossing of spur and switch track with highway	114
Total	391

At the same time inspection was made the approximate estimate of the cost of grade crossing elimination was made and this may be summarized by classes as follows:

Class II — 24 crossings	\$625,000
Class IIIa— 71 crossings	3,240,000
Class IIIb— 58 crossings	2,580,000
Class IVa—124 crossings	3,355,000
Class IVb—114 crossings	4,234,500
Total	\$14,044,500

The detail of the above figures classified as to state highway routes is presented in the following tabulation:

TABLE NO. 2.

JOINT GRADE CROSSING INVESTIGATION, STATE HIGHWAY AND RAILROAD CROSSINGS. CONDUCTED BY CALIFORNIA HIGHWAY COMMISSION; U. S. BUREAU OF PUBLIC ROADS; CALIFORNIA RAILROAD COMMISSION.
Summary of Data Relative to Grade Crossing Elimination.

Totals.....		24	\$635,000	71	\$3,240,000	58	\$2,580,000	124	\$3,355,000	114	\$4,234,500	22	33

FORMAL COMPLAINTS IN CROSSING MATTERS.

Various formal complaints regarding crossing matters have been filed with the Commission as shown by the following tabulation:

Complainant	Pending June 30, 1922	Filed year ending June 30, 1922	Granted	Denied	Dismissed	Pending June 30, 1923
Commission's own motion.....	1	1	--	--	1	1
Political bodies and individuals	7	7	8	1	--	5
Totals.....	8	8	8	1	1	6

Most of these complaints sought to have better protection afforded at certain crossings. Careful investigations were made by the transportation division as to all of the crossings covered by such complaints and the results presented at the various hearings.

FORMAL APPLICATIONS FOR NEW GRADE CROSSINGS.

The accompanying tabulation shows the applications made to the Commission for authority to install new crossings. In connection with the applications filed by railroads it should be noted that most of these are for crossings on industry tracks in the industrial districts of the larger cities. In such cases the crossings are relatively of little importance as far as the introduction of any additional hazard is concerned and are necessary to meet the development of the communities.

TABLE NO. 3.

CROSSING APPLICATIONS, YEAR ENDING JUNE 30, 1923.

*Including supplemental applications and old proceedings reopened during the year.

GRADE SEPARATION.

Separation of grades between public roads and railroads have been authorized at eight locations, namely:

State highway under Southern Pacific Company at Redding.

State highway under Northwestern Pacific near Willits.

State highway over San Francisco and Sacramento Railway at Denver-ton.

State highway under Northwestern Pacific near Alto.

County road over Southern Pacific at Klamathon, Siskiyou County.

County road under Santa Fe at Hughson, Stanislaus County.

County road under Santa Fe at Rialto, San Bernardino County.

Union avenue under Santa Fe in Bakersfield.

In some of the above mentioned proceedings the interested parties agreed as to the division of cost, in others no such agreement was reached and the Commission found it necessary to designate the equitable division of cost. In addition to grade separations ordered considerable work has been done upon a proceeding now pending before the Commission looking toward the separation of grades of certain streets and railroads in the city of Stockton.

The matter of a separation of grades between The Alameda and the Southern Pacific in the city of San Jose has again been before the Commission and a new engineering study made of this problem.

CROSSING PROTECTION.

Investigation has been made with respect to the protection of many important crossings during the year and a considerable number of automatic flagmen have been installed on recommendation or order of the Commission at certain of the crossings investigated. In some instances other special forms of protection have been recommended or ordered, such as overhead illuminated signs or in some instances human flagmen.

Interlocking Plants.

Interlocking plants protecting the crossings, junction and yards of railroads at grade are within the technical supervision of this division. A new interlocking plant has been installed for the protection of the crossing of the Whittier line of the Pacific Electric over the main line of the Santa Fe at Los Nietos and existing plants have been substantially changed or renewed at the junction of the Southern Pacific and Santa Fe at Kern Junction; at the junction of the San Francisco and Sacramento with the San Francisco-Oakland Terminal Railways at Fortieth street and Shafter avenue, Oakland; at the junction of the Valley and Coast routes of the Southern Pacific at Burbank; and at the M street bridge of the Sacramento Northern and San Francisco and Sacramento railroads, Sacramento. Plans for all of this work have been checked and the plants themselves inspected and approved by engineers of this division. In addition, field inspections were made of nine other interlocking plants during the year.

CHAPTER XIII.

LEGAL DEPARTMENT—COURT PROCEEDINGS

The marked increase in the legal work of the Commission which was noted in our last annual report has continued during the last fiscal year. At the end of the fiscal year, there were four cases pending in the United States Supreme Court, seven in the California Supreme Court and one in the Superior Court of Los Angeles County. In addition, seven matters in which this Commission was interested were pending before the Interstate Commerce Commission. Two of the matters which were pending in 1922 before the California Supreme Court are still pending, but during the fiscal year, that court finally determined ten cases involving the Commission and ten petitions were received by that court praying for writs of review of orders of the Commission.

IMPORTANT PENDING MATTERS.

The most important pending matters are the so-called "Los Angeles Terminal Cases" now in the United States Supreme Court; the similar matter brought by the city of Los Angeles before the Interstate Commerce Commission; the National Express Rate cases (which are still pending before the Interstate Commerce Commission) and the Consolidation of Railroads matter, also before the Interstate Commerce Commission.

The so-called "Los Angeles Terminal Cases" which were pending in the California Supreme Court on June 30, 1922, are, as explained in our last annual report, in reality three separate cases, involving the problem of grade crossing elimination in the city of Los Angeles. The Commission, after hearings covering a period of several years, directed the Southern Pacific, Santa Fe and Salt Lake Railroads to join in building a union passenger depot in Los Angeles as a part of a plan to eliminate certain hazardous grade crossings in that city. The railroads petitioned for a writ of review in the State Supreme Court, the cases being consolidated for hearing by that court. Public interest in this matter is large and the city of Los Angeles joined with the Railroad Commission in the proceedings before the California Supreme Court and filed a brief before that court in support of the Commission's order. On December 19, 1922, however, the California Supreme Court annulled the order of the Commission upon the ground that this matter had been placed in the hands of the Interstate Commerce Commission by certain provisions of the Transportation Act of 1920. On petition of the Railroad Commission, writs of certiorari were issued by the United States Supreme Court in these matters and they are now pending in that court. These consolidated cases have been advanced upon the calendar and set for argument on November 12, 1923.

In the meantime and subsequent to the decision of the California Supreme Court, the city of Los Angeles applied to the Interstate Commerce Commission for an order similar in tenor to that of the Railroad Commission. This matter was placed upon the Interstate Commission calendar for hearing in Los Angeles during July, 1923, and the Railroad Commission signified its intention to participate in the proceeding.

The express rate case discussed in our last annual report is still pending before the Interstate Commerce Commission. During the last year this nation wide express rate proceeding instituted by the Interstate Commission has progressed through a series of hearings in Washington and also in other large centers throughout the country. For the purpose of these hearings, the Interstate Commerce Commission requested that the National Association of Railway and Utilities Commissioners appoint a representative of the state commissions to sit with its examiners and take testimony. Pursuant to that request one of the rate experts of the California Railroad Commission, Mr. J. C. Harraman was selected to act as such representative and to accompany the examiners of the Interstate Commerce Commission on a tour of the country, holding hearings in all of the important centers. The matter was then set for argument before the Interstate Commerce Commission en banc and the California Commission took an active part in this argument, contending that express rates throughout the western territory are abnormally high as compared to those in other sections of the country and that a reduction should be granted. The decision in favor of the contention of the Railroad Commission in this and the intrastate express rate case will result in a saving of more than a million dollars annually to the shippers of California.

During the last fiscal year, hearings were also had by the Interstate Commerce Commission upon the matter of the proposed consolidation of railroads in the United States. This hearing was held pursuant to the provisions of the Transportation Act of 1920, which required the Interstate Commerce Commission to propose a plan for the consolidation of the railroads of continental United States into a limited number of systems. The California Railroad Commission appeared at the hearings held in San Francisco and Los Angeles and placed before the Interstate Commission evidence as to the operation of railroads within this state. The California Commission recommended that in any plan of consolidation finally formulated by the Interstate Commerce Commission, the Central Pacific Railroad be left as a part of the Southern Pacific system under certain safeguards for competing lines, and that the Western Pacific, Denver and Rio Grande systems be consolidated with The Atchison, Topeka and Santa Fe Railway. The short lines of California were discussed at length by the Railroad Commission witnesses and it was recommended that the Northwestern Pacific, which runs from San Francisco to points north of Eureka be consolidated with the Santa Fe system in any final plan.

CASES PENDING IN THE SUPREME COURT OF THE UNITED STATES.

1. *Railroad Commission vs. Southern Pacific Company.*
2. *Railroad Commission vs. The Atchison, Topeka and Santa Fe Railway Company.*
3. *Railroad Commission vs. Los Angeles and Salt Lake Railroad Company.*

These three cases, as explained above, arise from a decision of the California Supreme Court annulling the Railroad Commission order which directed the three railroads to join in building a union passenger depot in Los Angeles and in eliminating certain hazardous grade crossings in that city. These matters have been set for argument in the Supreme Court of the United States on November 12, 1923.

4. *John C. Brewer et al. vs. Railroad Commission.* Appeal to the United States Supreme Court by writ of error following two decisions by the California Supreme Court affirming the order of the Railroad Commission fixing rates to be charged by the Cuyamaca Water Company in San Diego County.

CASES PENDING IN THE SUPREME COURT OF CALIFORNIA.

1. *Southern Pacific Company vs. Railroad Commission.* To review an order of the Railroad Commission requiring the railroad company to construct a new passenger depot at Fourteenth and Franklin streets in the city of Oakland.

2. *Live Oak Water Users Association vs. Railroad Commission.* After decision by the Supreme Court annulling the order of the Railroad Commission authorizing the increase of rates by the Sutter Butte Canal Company, the court granted a rehearing and after further argument the case has again been submitted for decision.

3. *Hollywood Chamber of Commerce vs. Railroad Commission.* Writ of mandate to compel the Railroad Commission to hear and determine the petition of the Hollywood Chamber of Commerce for an order directing the Los Angeles Railway Company to extend certain electric street railway lines into Hollywood.

4. *City of Pasadena vs. Railroad Commission.* Writ of review involving the validity of an order of the Commission authorizing certain increases of fares on the Pacific Electric Railroad, certain through fares being claimed by Pasadena to be in violation of the rule against through rates higher than a combination of local rates.

5. *Richardson vs. Railroad Commission.* Writ of review brought by the owner of a small water system in Orange County to annul an order of the Railroad Commission directing him to furnish continued service to certain consumers, the Commission having decided that he was operating a public utility.

6. *Klatt vs. Railroad Commission.* Similar to the case of *Richardson vs. Railroad Commission.*

7. *Williamson vs. Railroad Commission.* A review proceeding dealing with an order of the Railroad Commission fixing rates to be charged by the Natomas Water Company. This case deals with the question of whether or not the predecessor of the Natomas Company was operating as a public utility at the time certain contracts for water service were entered into.

CASES PENDING BEFORE THE INTERSTATE COMMERCE COMMISSION.

1. *In the matter of California Express Rates, Docket No. 12093.* A proceeding to secure from the Interstate Commerce Commission an order increasing express rates in the State of California $13\frac{1}{2}$ per cent above the present rate, notwithstanding the denial on the part of the California Railroad Commission of an application for such increase, the claim being that the disparity between state rates and interstate rates is undoubtedly prejudicial to interstate commerce. This matter has been held in abeyance pending the decision of the Interstate Commerce Commission upon the National Express rate case.

2. *In the Matter of Express Rates, 1922, Docket No. 13930.* This case, as explained above, involves the general level of express rates throughout the United States. Examiner J. C. Harraman, of the California Railroad

Commission, as the representative of the National Association of Railway and Utilities Commissioners, has taken an active part in this case and sat with the examiners of the Interstate Commerce Commission throughout the hearings in various sections of the United States.

3. *City of Los Angeles vs. Los Angeles and Salt Lake Railroad et al., Docket No. 14778.* This application on the part of the city of Los Angeles asks the Interstate Commerce Commission to make an order similar in tenor to that of the Railroad Commission in the "Los Angeles Terminal Cases," above mentioned.

4. *In the Matter of the Consolidation of Railroads of Continental United States, Docket No. 12964.* This proceeding, initiated pursuant to certain provisions of the Transportation Act of 1920, relates to possible plans for the consolidation of the railroads of continental United States into a "limited number of systems." The Railroad Commission appeared at hearings held in San Francisco and Los Angeles and presented evidence dealing with railroad problems in the State of California.

5. *Applications of Santa Fe and Los Angeles Harbor Railroad and The Atchison, Topeka and Santa Fe Railroad Company, Finance Dockets Nos. 2434 and 2446.* Applications for authority to construct a railroad between the city of Los Angeles and the harbor at San Pedro to bring the Santa Fe Railroad to tidewater at this point.

6. *Pullman Surcharge proceeding, Docket No. 14785.* This matter, entitled "In the matter of charges assessed passengers traveling in sleeping and parlor cars," covers not only the general rates, but the surcharge payment to the railroads now assessed against such passengers. The Railroad Commission appeared in hearings held at San Francisco and presented evidence to show that such surcharge should be eliminated.

7. *Valuation Proceedings.* The work of this Commission in connection with valuation proceedings, before the Interstate Commerce Commission is discussed at some length in the section of this report dealing with the transportation division of the Engineering Department. The Commission's attorney appeared and presented argument and evidence in behalf of this Commission's position at a hearing at Washington, D. C., involving the Western Pacific Railroad Company, The Tonopah and Tidewater Railroad Company, and the Death Valley Railroad.

CASES PENDING IN THE SUPERIOR COURT OF LOS ANGELES COUNTY.

1. *Los Angeles Gas and Electric Company vs. Railroad Commission and City of Los Angeles.* Petition for injunction to restrain the Railroad Commission from proceeding under section 47 (b) of the Public Utilities Act, to value the electric properties of the Los Angeles Gas and Electric Corporation, as desired by the City of Los Angeles.

CASES DECIDED IN THE SUPREME COURT OF CALIFORNIA DURING THE FISCAL YEAR.

1. *Motor Transit Company vs. Railroad Commission.* This was a proceeding to review an order of the Railroad Commission directing an automobile stage company to refrain from operating as a transportation company between certain points, which operation the Railroad Commission had concluded to be in violation of the Auto Stage Truck and Transportation Act. The order of the Commission was affirmed.

2. *McCullagh vs. Railroad Commission.* Review proceeding brought by certain consumers of the Coneland Water Company seeking to annul an order of the Railroad Commission establishing increased rates and

requiring the water company to furnish a more adequate supply of water and to do other things for the improvement of its service, on the ground that petitioners private contract rights were not subject to regulation by the Commission. The order of the Commission was annulled.

3. *John C. Brewer et al. vs. Railroad Commission.* In this proceeding certain consumers of the Cuyamaca Water Company asked that an order of the Commission be annulled on the ground that their private contract rights were not subject to regulation by the Railroad Commission. The order of the Commission was affirmed. (This and another case of the same name, both decided on November 10, 1922, are now pending in the United States Supreme Court upon writ of error proceedings taken by these consumers.)

4. *The Atchison, Topeka and Santa Fe Railway Company vs. Railroad Commission.*

5. *Los Angeles and Salt Lake Railroad Company vs. Railroad Commission.*

6. *Southern Pacific Company vs. Railroad Commission.*

In these cases the railroads sought to have annulled an order of the Railroad Commission requiring them to join in the construction of a union passenger depot in the City of Los Angeles and to put an end to certain hazardous grade crossings in that city. The court held that under the Transportation Act of 1920 full power and authority over the matter of union terminal depot facilities of interstate railroads has been vested in the Interstate Commerce Commission, and upon that ground annulled the order of the Railroad Commission. (This is the matter now pending in the United States Supreme Court upon writs of certiorari, as explained above.)

7. *King vs. Railroad Commission.* A proceeding to review an order of the Railroad Commission authorizing an increase of rates by the Sutter Butte Canal Company, petitioners claiming to hold contract rights not subject to regulation by the Commission. The order of the Commission was affirmed.

8. *Live Oak Water Users Association et al. vs. Railroad Commission.* This matter dealt with the same order involved in the case of *King vs. Railroad Commission*, but involved certain other consumers and slightly different problems. The order of the Commission was annulled as to such consumers, but a petition for rehearing was granted and argument has been had thereon. This case is, therefore, also listed with those now pending in the California Supreme Court.

9. *City of San Bernardino vs. Railroad Commission.* In this case it was sought to have annulled an order of the Commission approving the cost of maintenance and repair of a viaduct over the tracks of the railroad company between the municipality and the railroad company. The order of the Commission was affirmed.

10. *Saunby vs. Railroad Commission.* This was a proceeding in which certain consumers of the Southern California Edison Company sought the annulment of an order of the Railroad Commission decreasing their rates, upon the ground that the Commission had erred in limiting the argument to certain specified matters and in making its allowance for operative costs and taxes. The essential claim of these consumers was that the reduction in rates should have been larger than it was. The order of the Commission was affirmed.

11. *Coast Truck Line vs. Railroad Commission.* This proceeding involved an order of the Railroad Commission directing the Coast Truck Line and auto stage freight carriers to desist from certain operations held by the Commission to be in violation of the regulatory statute. The order of the Commission was affirmed.

12. *Lizzie Ghriest et al. vs. Railroad Commission.* This was a proceeding to review an order of the Commission fixing the just compensation to be paid by the city of Banning for an electric distributing system owned by Mrs. Ghriest and sought to be acquired by the city. The proceeding was dismissed upon the request of the petitioners.

13. *Haines Canyon Water Company vs. Railroad Commission.* A writ of review was asked in this case to annul an order of the Railroad Commission directing the water company to render service to certain persons. By stipulation between all parties, this matter was dismissed by the court.

14. *Del Monte Light and Power Company vs. Railroad Commission.* In this proceeding the Del Monte Light and Power Company sought to have annulled an order of the Railroad Commission requiring it to render service to a certain locality. This matter was dismissed without prejudice upon application by the power company.

15. *Ernsting vs. Railroad Commission.* A writ of review in this matter was denied upon a petition seeking an annulment of an order made by the Railroad Commission involving the operation of certain automobile stages in the Imperial Valley.

16. *County of Tuolumne et al. vs. Railroad Commission.* In this matter a writ of review was denied upon a petition by certain water consumers of the Sierra and San Francisco Power Company, who asserted that the Commission had erred in apportioning certain operative costs between power and irrigation departments of the company.

HISTORICAL SUMMARY.

Since the reorganization of the Railroad Commission in 1911 it has made 12,297 formal orders and decisions. During that same period it has been a party to one hundred and twenty court proceedings, of which seven are still pending. Of these cases only eighteen have been decided against the Commission. Included in these eighteen cases are four which were reversed by later action of the State Supreme Court, four which were test cases and although normally decided against the Commission, in reality sustained the Commission in principle; and one which is now pending on appeal in the United States Supreme Court. This leaves a net of nine cases actually lost during those twelve years, out of the one hundred and twenty cases which have been handled. In other words, the formal action of this Commission in the regulation of public utilities in California as expressed in more than 12,000 decisions, has been reversed in but nine cases, considerably less than one-tenth of one per cent.

As stated in statistical form, the record is as follows: 12,297 decisions by the Commission since 1911; one hundred and twenty court proceedings, of which eighteen decided against the Commission. Out of the eighteen cases lost, four reversed by later decisions; four test cases sustained the Commission in principle; one pending on appeal in United States Supreme Court; leaving nine cases, net loss.

CHAPTER XIV.

AUTOMOBILE TRANSPORTATION.

Automotive transportation is steadily becoming a more highly developed and more smoothly functioning utility. Out of the maze of poorly arranged schedules, even more faulty methods of assessing charges, and woeful lack of understanding of the duty of a common carrier to the public (due unquestionably to the fact that the earlier auto stage men were drivers of vehicles rather than transportation or public service men), there is emerging a utility of enormous value to the individual, the community and the state.

POTENTIALITIES REVEALED.

The auto stage, for a period before the advent of regulation by the Commission in 1917, like Topsy, "just grewed." Misdirected, or rather, undirected, for years, automotive transportation gave a "hit and miss" kind of service to the public. Comfort and convenience were secondary considerations to "a load," and time schedules, apparently, were made but to be ignored. War's service demands put a strain upon motor transportation that did not break it down, but on the contrary, revealed its potentialities. Quick development followed as a result of changed conditions hastened by the World conflict. The driver type disappeared; the dilapidated stage became a thing of memory, and in their stead came men of means and understanding, and equipment built to give pleasure and comfort, and speedy transportation to the rapidly growing army of travelers who found in the auto stage a satisfying mode of conveyance.

HIGHWAYS AID TO DEVELOPMENT.

California's wonderful highway system, giving access to places formerly regarded as so remote as to be almost inaccessible, lent speed to the development of automotive transportation. This is evidenced by the records of the Commission which show that on June 30, 1923, there were in operation in the State of California, under the jurisdiction of the Commission, 713 carriers, divided as follows:

- Passenger only, 246;
- Passenger and freight, 125;
- Passenger and express, 62;
- Passenger, freight and express, 25;
- Freight, 174;
- Express and freight, 11;
- Express, 1;
- Milk, dairy products, eggs, poultry, etc., 38;
- Fruit, vegetables and berries, 19;
- Special carriers, lumber, films, auto parts, furniture, etc., 8;
- School children, 4.

SEASONAL OPERATIONS.

Operations of many carriers are seasonal, the freight lines so operating limiting their activities to the periods of time when the commodities they are authorized to transport are ready for market. In the case of

seasonal passenger carriers the time of operation depends upon weather conditions, or the opening and closing of summer resorts in the territory served. School busses operate only on school days, and the so-called mail carriers, that is, auto stage operators who transport mail for the United States government under contract, and carrying passengers and freight under authority of the Railroad Commission, frequently limit their operations to service only on such days as they are required to transport the mail, in some instances, daily, except Sunday; in others twice a week, and others three times a week.

DEPARTMENT ESTABLISHED.

Since June 30, 1921, the Commission has maintained a department devoted solely to the regulation of automotive transportation, an expedient made necessary by the increase in the number of matters pertaining to franchised auto trucks and stages, and the unprecedented development of the state's newest utility service. Indicating the spread of this growth may be quoted the statistics showing that of the formal matters brought to the attention of the Commission from July 1, 1922, to June 30, 1923, the period covered by this report, 612 of the 1170 applications had to do with automotive transportation and its regulation. This, in connection with the fact that more than 21,000,000 passengers were transported during the year by auto stages, stresses the importance to the state of transportation via the highways.

This department will also handle all applications for certificates of convenience and necessity filed in connection with operation of common carriers on the inland waters of the state. The last session of the legislature made it a statutory requirement that before a passenger or freight carrier on inland waters may begin operations, a certificate of convenience and necessity must be obtained from the Railroad Commission. This law will become effective on August 15, 1923.

The act does not require that carriers operating in good faith prior to that date secure such a certificate. Such carriers, of which there are 117, may continue to operate, provided their tariffs were on file with the Commission prior to the effective date of the new legislation.

TREND TOWARDS CONSOLIDATION.

Three years ago marked the beginning of a general trend towards consolidation of stage lines operating in territory more or less sectional in demands. This tendency continued during the year covered by this report. Operators of purely local services transferred their operating rights to operators covering a wider field in contiguous territory. Others sought enlarged territory, either through the purchase of existing lines or by application to the Commission for authority to operate between stated points, application being based on the declaration that public convenience and necessity required additional transportation service. Where all the facts were a matter of record in the Commission's files, ex parte orders disposed of many applications for transfer of operating rights. In a large majority of the proceedings based on a request to enlarge or create operating rights, public hearings were held, at which all persons concerned and communities interested were given opportunity to appear and voice either protest or approval of the application.

DEEP INTEREST OF PUBLIC.

The interest of the public in the development of automotive transportation is best evidenced by the fact that hearings sometimes cover a period of three or four days. Very frequently application for certificates are followed by letters to the Commission from individuals, civic bodies, and municipal officials, supporting the application. On the other hand, in numerous instances, civic bodies and communities have gone on record as opposing the grant of a certificate to a motor carrier, the objection, in nearly every case being based on a choice of rail service rather than motor, and a desire to protect local steam or electric carriers against motor competition. Road protection has also been advanced in a few instances by opponents of motor transit.

There has been a gradual spread of the field of service by auto carriers, both passenger and freight. Today the traveler patronizing the auto stage, finds every convenience and comfort. Cushioned cars, roomy to a degree considered impossible in the early days of motor transportation, well ventilated and lighted, make public motor travel a pleasure. Traversing the length and breadth of California, motor stages are giving to the residents of the state a real public service, to the tourist an opportunity to view all of the wonders between the Oregon line and Mexico, and adding to the transportation of the country a service that in reality is one of convenience and necessity.

FINANCIAL REPORTS REQUIRED.

Financial reports filed by the stage and truck lines operating under the jurisdiction of the Commission tell in their totals a graphic story of the spread of their operations, and show to what a great extent automotive transportation is sharing in the development of California. The stage and truck lines are divided into two classes by the Commission's accounting department. All operating units having a gross income of \$20,000 or more are listed under "Class A," and are required to file reports under headings prescribed by the Commission in its "uniform classification of accounts," just as are the other large utilities of the state. Report requirements from the lesser companies, while they assemble practically the same figures, are less rigidly enforced as to detail.

Reports from 140 'Class A' companies, covering financial operations for the calendar year 1922 show a total operating revenue of \$12,596,309.59, with a total operating expense of \$11,831,754.35, yielding a net operating revenue of \$764,555.23. By additions from other sources (nonoperating income) totaled \$1,702,119.43, the gross income of these companies is increased to \$2,466,674.66. Nonoperating expenses, which include interest, federal income taxes and expenses of other operations totaled \$1,770,266.51. The profit for the year of all these companies amounted to \$696,408.15. During the year the dividends paid by all Class A companies reporting totaled \$157,842.66. The value of "plant and equipment" is given by these companies as \$9,280,880.69, with other property (property not used in operation) valued at \$267,319.42.

MAIN SOURCES OF REVENUE.

The main sources of revenue of the Class A carriers were as follows:

Passenger revenue.....	\$7,770,054	85
Freight revenue.....	3,179,873	55
Express revenue.....	960,574	84
Baggage revenue.....	101,819	15
Mail revenue.....	201,402	54
Other transportation revenue.....	138,842	98

Class A companies spent \$1,150,758.60 for fuel for power and \$219,712.49 for lubricants and other supplies. Damages to freight and baggage cost the Class A companies \$43,874.45 and injuries and damages cost them \$185,316.94. Salaries and expenses of general officers reached a total of \$422,498.37, and salaries and expenses of general office clerks totaled \$341,665.05. To passenger car operators (drivers) \$1,316,191.70 was paid and to freight car operators \$745,643.74. Express, baggage and mail car operators were paid \$262,429.95. Superintendence of transportation cost \$189,987.49. Station employees cost \$423,716.30; garage, labor and expenses totaled \$382,274.23.

The Class A companies or operators transported during the year 18,721,485 passengers and 444,943 tons of freight. The passenger car mileage totaled 29,723,980, and freight car mileage 3,754,510. To transport these travelers and goods the companies used 975 passenger cars, 625 freight "cars" and other equipment (trailers, etc.) totaling 291 vehicles.

OPERATING INCOME AND EXPENSE.

As a whole the operations of all the large companies were profitable, or at least showed an excess of operating income over operating expense, the companies that did not meet operating expenses being very few. Listed below are a few of the large Class A companies, with figures taken from their annual reports:

Passenger Carriers.

Name of carrier	Operating income	Operating expenses	Number cars	Passengers carried
Vallejo-Benicia Stage Line.....	\$28,416 00	\$26,829 75	8	159,715
Bay Cities Transit Company.....	180,487 60	165,174 29	22	3,000,000
B. and H. Transportation Company.....	264,542 14	257,834 56	37	5,226,558
Crown Stages.....	362,023 47	341,297 73	42	1,009,390
California Transit Company.....	843,871 30	734,580 60	69	771,428
Dillingham Transportation Company.....	83,865 54	73,669 85	14	198,324
Golden Eagle Barker Stage.....	50,134 50	47,272 89	8	74,625
McVey Stage Lines.....	48,357 66	38,774 08	7	72,328
*Motor Transit Company.....	1,461,436 25	1,469,667 98	94	2,139,449
Original Stage Line.....	136,820 12	123,415 08	14	445,748
Peninsula Rapid Transit Company.....	453,894 35	428,518 06	28	No record
Pickwick Stages, Incorporated, southern division..	266,748 64	266,584 69	19	143,542
Pickwick Stages, Incorporated, northern division..	528,643 16	518,075 71	44	160,355
Pacific Auto Stages.....	163,363 68	151,127 72	10	203,251
Pierce Arrow Stages.....	126,094 43	93,562 49	21	50,766
San Jose-Santa Cruz Stage.....	37,101 79	30,464 88	6	29,642
Santa Rosa, Petaluma and Sausalito Auto Stage Company.....	150,653 54	121,472 80	13	130,879
Vallejo Bus Company.....	69,001 95	68,529 31	8	690,542
United Stages, Incorporated.....	129,447 38	125,203 92	10	161,497
Valley Transit Company.....	417,680 40	374,801 77	39	388,369
Auto Transit Company.....	39,782 43	36,068 05	6	12,278
Sutherlands, Tia Juana Stage.....	226,606 60	224,616 50	42	461,630

*Income from other sources, \$184,822.57.

Freight Carriers.

Name of carrier	Operating income	Operating expenses	Number cars	Tons carried
Bakersfield and Los Angeles Fast Freight.....	\$100,444 41	\$95,109 89	6	7,352
Coast Truck Line.....	130,444 58	127,360 01	19	14,855
Drayage Service Corporation.....	78,692 79	78,062 34	--	No record
*Gibson's Express, Incorporated.....	41,060 70	35,909 93	8	-----
*Pioneer Express.....	63,227 18	57,806 45	13	6,078
Hodge Transportation System.....	130,956 82	109,811 20	26	37,907
Highway Transportation Company, Incorporated..	73,535 95	73,190 51	8	12,500

Yosemite National Park Company.....	290,563 14	220,269 05	54	1,658	120,448
Zahner's Stage.....	22,036 90	20,973 79	5	5,841	29,746

MANY SMALL CARRIERS.

The 573 "Class B" or small companies, comprising the motor stage and truck lines whose revenues did not exceed \$20,000 in the calendar year report a total investment in cars and shop equipment of \$1,922,-681.35. The total revenue of these companies for the year 1922 amounted to \$2,953,040.35. The sources were as follows:

Passenger.....	\$1,147,508 28
Freight.....	1,274,535 70
Mail.....	261,924 75
Express.....	148,711 84
Other sources.....	120,359 78

The expenses of these lines totaled \$2,490,970.98, giving a net revenue of \$462,069.37. The chief items of expense of the small companies were as follows:

Labor.....	\$703,503 44
Gas and oil.....	423,655 20
Repairs.....	417,099 10
Depreciation.....	289,341 55
Salaries, officials and clerks.....	227,440 42

MANY CARS IN SERVICE.

The small carriers transported 2,500,443 passengers from January 1, 1922, to December 31, 1922, and 220,483 tons of freight. In this operation 641 passenger cars were used, 334 freight and 44 other vehicles, such as trailers, wagons, etc.

Recapitulation of the reports of the Class A and so-called small companies, shows that revenues from purely motor operations totaled \$15,549,349.94. The operating expenses of all companies, totaled \$14,322,725.34, leaving a net revenue of \$1,226,624.60.

MILLIONS INVESTED.

Of the Class B carriers, 86 operated in the red as did 34 of the Class A carriers. The investment in physical properties represented in the operations of the 713 automotive carriers in the state, according to their financial reports, shows a total of \$12,317,089.20, divided as follows:

Class A.		
Plant and equipment.....	\$9,280,880	69
Other property, nonoperative.....	267,319	42
Materials and supplies.....	427,139	98
		<u>\$9,975,340 09</u>
Class B.		
Value of cars.....	\$1,865,743	76
Shop equipment and lands.....	56,937	59
Materials and supplies.....	32,725	01
Lands.....	386,342	75
		<u>2,341,749 11</u>
Total.....		<u>\$12,317,089 20</u>

MILLIONS OF PASSENGERS CARRIED.

The number of passengers transported during the year by both large and small companies reached a grand total of 21,221,928. The equipment used by all companies, a recapitulation of their reports shows, totaled 1616 passenger cars, 959 freight cars and 335 other vehicles, such as trailers, wagons, etc.

NEW LEGISLATION.

A legislative enactment of the session of 1922-23 reduced somewhat the extent of the jurisdiction of the Commission over motor freight carriers. The Crittenden bill, which becomes a law on August 16, 1923, provides that motor freight carriers engaged in transporting farm products from farm to farm, and from farm to warehouse, creamery, shipping point or other initial point and articles of husbandry to or from a farm shall be exempt from the provisions of the Auto Transportation Act. The Crittenden bill also provides that each application for a certificate of public convenience and necessity, or for an order authorizing the sale, leasing, assignment or transfer of an existing operative right must be accompanied by a fee of \$50.

Approximately 70 motor freight carriers will be affected by the provisions of the bill exempting carriers of farm products, but as many of them also transport general freight, they will still require a certificate or permit.

Other legislation (Breed bill) enacted into law the Commission's general order requiring motor vehicles to come to a full stop at rail crossings. It provides for registration of all motor vehicles, fees for such, etc. It also provides a gasoline tax of 2 cents a gallon. The provisions of this bill, which is known as the Motor Vehicle Act, cover all motor vehicles, and is not part of the act under which automotive common carriers are regulated.

Taxation of motor carriers is provided by the Duval bill, taxing common carrier stages 4 per cent of their gross receipts. Collection of this tax devolves upon the State Board of Equalization, which is also authorized to issue the license plate required to be carried on each vehicle operated by a common carrier over the highways of the state.

COMMISSION AIDS TRAVELERS.

During the year covered by this report the Commission, though without jurisdiction in the matter of loss and damage claims, was able to give

the public a distinct service by means of informal adjustment of claims made against carriers. Where the aid of the Commission was sought, the carrier was notified by letter or by telephone of the filing of a complaint, and was requested to make a statement in the matter. Usually there was willing compliance, with the result that many complaints were settled without rancor or appeal to the courts. The complaints generally covered refunds, damage to, or loss of baggage. In all instances the carriers displayed a desire to give to the public a maximum of service. This was particularly noticeable in the matter of courteous treatment of the public. Any complaint of incivility brought prompt action by the carriers, and punishment for the offending employee, if after investigation he was found to be at fault.

PART TWO.

STATISTICAL REPORT.

AUTO STAGES AND AUTO TRUCKS.

Names and Business Addresses of Automotive Transportation Companies.

Tables 1 to 4, Inclusive.

AUTO STAGES AND AUTO TRUCKS.

List of Auto Stage and Truck Companies as Reported in Annual Reports filed with the Railroad Commission for the Year Ending December 31, 1922.

Atlas Mail and Stage.

C. H. Biggs, 510 North Brown street, Napa, California.

Angels Camp and Murphy's Auto Stage Line.

Nativo Celayo, Angels Camp, California.

Alpaugh-Angiola Stage.

E. T. Ryker, Alpaugh, California.

Auto Transit Company.

Geo. H. Higgins, President, 5 Seventh street, San Francisco, California.

Arroyo Seco Stage Line.

N. A. Webb, 610 Elizabeth street, Pasadena, California.

M. Anderson Truck Service.

666 East Ninth street, Pomona, California.

Alturas and Cedarville Stage Company.

Delmas and Frailey, Cedarville, California.

Almaden Stage.

W. H. Robbins, New Almaden, California.

The Alpha Company Auto Truck Service.

F. F. Cassidy, President;
Geo. A. Legg, Agent, Nevada City, California.

A. M. Atkins and Sons.

Lower Lake, California.

Aetna Springs Stage Company.

W. B. Twitchell, St. Helena, California.

Anderson's Auto Passenger Line.

W. H. Anderson, Randsburg, California.

E. L. Askin Truck Line.

Lemon Cove, California.

Auburn-Forest Hill Stage.

M. C. Langstaff, Forest Hill, California.

Avila-San Luis Obispo Stage Line.

Antone Nelsson, Avila, California.

The Ambler Truck Line.

Gleason Ambler, Mesa Grande, California.

American Transfer and Auto Delivery Company.

Hudson, Hudson and Githin, 141 American avenue, Long Beach, California.

Allison Auto Express.

O. C. Allison, 4238 S. Harvard boulevard, Los Angeles, California.

Alder Point-Bridgeville Auto Line.

E. Wilkinson, Bridgeville, California.

Alder Point-Hoaglin Auto Stage.

Wilkinson Brothers, Alder Point, California.

Alhambra-Los Angeles Express.

100-102 S. Garfield avenue, Alhambra, California.

Arroyo Grande-Oceano Truck Line.

John Bardieu, Arroyo Grande, California.

Bab Arutoff.

255 North Anderson street, Los Angeles, California.

Atlantic and S. P. Transfer Company.

James Jenkins, 1402 Second street, Santa Monica, California.

Anaheim Transit Company.

Scott and Day, 151 S. Los Angeles street, Anaheim, California.

Auburn-Georgetown Stage.

C. W. Ganow, Georgetown, California.

Arcata-Eureka Stage Line.

M. S. Bittencourt, Eureka, California.

Auto Package Delivery.

Berdie M. Macey, 327 N. San Pedro street, Los Angeles, California.

Harry Anderson Auto Stage Line.

Ferndale, California.

Azevedo's Auto Stage Line.

Wm. Azevedo, Half Moon Bay, California.

Annapolis-Stewart's Point Stage.

Edward Mitchell, Annapolis, California.

Alder Point-Harris Stage.

Geo. N. Mathison, Alder Point, California.

American Stage Line.

Geo. M. Brice, Ferndale, California.

Arcata-Samoa Auto Line.

Donald McPherson, Arcata, California.

Allen and Reese Stages.

Union Stage Depot, Fresno.

Baker, J. F., Auto Line.

Copperopolis, California.

Burris Truck Line.

C. W. Burris, 2415 J street, Eureka, California.

Benedict and Moorman.

122 E. Randolph street, Huntington Park, California.

Bellflower Truck and Transfer.

T. I. Buie, Bellflower, California, or 743 East Eighth street, Los Angeles, California.

Burbank Transfer.

F. A. Mullens, 269 North Orange Grove, Burbank, California.

Bay City Hauling Company.

Chew Chick, P. O. box 130, Menlo Park, California.

Butler, V. W.

Cottonwood, California.

Bishop and Laws Freight Line.

Pioneer Livery and Lumber Company, Bishop, California.

Boyd and Mattly.

1800 Chester avenue, Bakersfield, California.

Besones' Motor Express.

Jos. Besones, 1600 T street, Bakersfield, California.

Boulevard Express, Incorporated.

C. D. Boynton, State and G streets, San Diego, California.

Bieber, John.

c/o E. H. Armstrong, attorney, Grass Valley, California.

Beverly Hills and Sherman Transfer.

A. A. Hardie, Owner, 572 South Alameda street, Los Angeles, California.

Bakersfield-Buttonwillow Auto Stage Line.

Wm. Giminiani, 1200 Nineteenth street, Bakersfield, California.

Bisher's Truck Line.

A. C. Bisher, Ramona, California.

Bakersfield-Glenville Stage.

E. A. Murdock, Terrace way, Bakersfield, California.

Benicia-Vallejo Stage Line.

M. Passalacqua, Owner, Benicia, California.

Bakersfield and Los Angeles Fast Freight, Incorporated.

Geo. M. Duntley, President, 525 Crocker street, Los Angeles, California.

Big Pine and Zurich Auto Stage Line.

R. H. Logan, Big Pine, Inyo County, California.

Bodega-Santa Rosa Auto Truck.

A. Ellis, Sebastopol, California.

Beswick-Ager Auto Line.

H. H. Hessig, Beswick, California.

Bridgeport, Bodie and Mono Lake Stage Route.

Chas. W. Fulton, Bridgeport, California.

Bay Cities Transit Company.

Fred Walker, Treasurer, 763 Ohio street, Sawtelle, California.

Becher Mail Stage.

J. Becher, Pleasant Valley, California.

Biggs and N. E. Stage Line.

W. M. Grein, Biggs, California.

Belvedere Bus.

Wm. Barr, Belvedere, California.

Blairsden Stage Company.

C. A. Lemm, Blairsden, California.

Bridgeville-Ruth Stage Line.

Chas. E. Wilkinson, Jr., Bridgeville, California.

Boulder Creek Stage Line.

Amy G. Harvey, 294 Mission street, Santa Cruz, California.

Bradley-Bryson Stage.

Clyde S. Dayton, proprietor, Pleyto, California.

Bolton and Bennett Freight Line.

I. J. Bennett, R.F.D. A, box 502, Fresno, California.

Blocksburg-Fort Seward Auto Line.

O. A. Cooper, Blocksburg, California.

Burke Sanitarium Auto Bus.

John W. Wilson, Burke, California.

Bakersfield-Wasco-Lost Hills Stage Line.

P. Dal Porto, 1800 Chester avenue, Bakersfield, California.

Bakersfield-Shafter Auto Truck.

Mrs. F. C. Williams, Shafter, California.

N. Boronda Mail Stage.

743 Abrego street, Monterey, California.

B. and H. Transportation Company.

G. I. Hazzard, Secretary, Long Beach, California.

Blythe Mecca Stage Line.

E. B. Stevenson, 1834 East Slauson avenue, Los Angeles, California.

Bay Shore Drayage Company.

W. J. Harris, 300 Franklin street, Oakland, California.

Blairsden-Lake Center Stage.

Green and Green, Blairsden, California.

Boyd's Eureka-Arcata Stage Line.

W. G. Boyd, Eureka, California.

Bland Stages.

A. B. Bland, Holtville, California.

Borderland Express.

W. J. Gibson, Holtville, California.

G. W. Boutell Mail Stage.

San Benito, California.

Belvedere Gardens Bus Lines.

A. B. Dunphy, 531 South Rowan avenue, Los Angeles, California.

Bay Rapid Transit Company.

A. J. Mason, Monterey, California.

Barrere Auto Freight Line.

Jos. Barrere, 1251 Sixty-third street, Oakland, California.

Coast Truck Line.

Roy Jakeway, President, 312 Eleventh street, San Diego, California.

Chico-Cohasset Stage.

A. C. Lacey, Chico, California.

Citizens Auto Stage Company.

Frank Davies, Manager, Nevada City, California.

Chico-De Sabla Stage.

W. A. Bailey, 4641 Eighth street, Chico, California.

Cooley's Stage Line.

C. T. Cooley, Manager, Maricopa, California.

Covelo Stage Line.

W. G. Goforth, Covelo, California.

Cutler-Badger Stage.

R. Venard, Cutler, California.

Crescent City and Grants Pass Stage Company.

L. C. Lake, Manager, Crescent City, California.

Crown Stage Line.

A. B. Watson, Proprietor, 515 North Main Street, Santa Ana, California.

Crescent City, Smith River and Brookings Stage.

Plaisted and Horn, Crescent City, California.

Crosby Stage Line.

C. J. Crosby, 1614 North Main street, Santa Ana, California.

Chilcoot-Downieville Stage Line.

C. Dubourdieu, Jr., Sierraville, California.

Campo Seco-Valley Springs Stage Line.

Edward Maher, Campo Seco, California.

Citrus Belt Bus Line.

V. W. Neher, La Verne, California.

Chico-Willows Stage.

R. E. Riley, Chico, California.

Cunha Brothers Freight Line.

C and Castro streets, Hayward, California.

Coronado-Imperial Beach Stage.

Plen Mathews, Imperial Beach, California.

Consolidated Motor Freight Lines, Incorporated.

A. A. McFarland, 335 Fourth street, Oakland, California.

Chico-Butte City-Princeton Stage.

Burke and Hughes, Chico, California.

Clark's Sacramento-Plymouth Auto Stage Line.

S. C. Clark, Plymouth, California.

Compton Transportation Company, Incorporated.

W. W. Compton, General Manager, 143 East Ocean avenue, Long Beach, California.

Coachella Valley Transportation Company.

Raymond Davis and H. E. Smith, 353 East Second street, Pomona, California.

Cambria Truck Company.

M. G. Filippini, Cambria, California.

Cloverdale Geyser Stage.

Natalie Bacci, Cloverdale, California.

Chino Express and Transfer.

Galbreath and Galbreath, Chino, California.

City Transfer Company.

C. L. Fortier and Sons, Reedley, California.

Carmel-Monterey Stage.

C. O. Gould, Carmel, California.

Coast Transit Company.

C. L. Simonds, Santa Cruz, California.

Camp Elwell Stage.

W. F. Drew, Blairsden, California.

Concord-Avon Stage Line.

W. V. Hogan, Concord, California.

City Transfer and Storage Company.

J. H. Meldrim, 140 Pacific avenue, Long Beach, California.

Cloverdale-Healdsburg Bus Line.

J. P. Hildreth, Healdsburg, California.

Chico-Paradise-Sterling City Stage Company.

A. A. Johnson, Manager, Auditorium Hotel, Chico, California.

Compton Transfer Company.

Tallon and Stanley, Compton, California.

The Cloverdale-Elk-Navarro Stage.

Ledford and Hubert, Cloverdale, California.

Cullen Truck and Transfer.

W. H. Cullen, Box 127, El Monte, California.

Coast Line Stages, Incorporated.

Allen and Olinsky, Fort Bragg, California.

Cottonwood and Shingleton Stage Company.

H. A. and J. M. Cleland, Cottonwood, California.

Cregar Stage Lines.

R. B. Cregar, 741 West Eighth street, Riverside, California.

Coalinga-Paso Robles Auto Stage.

Benj. J. Byles, P. O. box 175, 612 Van Ness avenue, Coalinga, California.

Calistoga-Middletown Truck.

Benj. Hunt, Middletown, California.

California Transit Company.

W. E. Travis, President, 1290 Bush street, San Francisco, California.

Columbia Stage Line.

Geo. M. Trask, Columbia, California.

California Highway Express.

D. C. Bole, Treasurer, 1250 Polk street, San Francisco, California.

Chico-Westwood-Susanville Stage.

Houck and Smith, Owners, 4421 Third street, Chico, California.

H. A. Condra Mail Stage.

H. A. Condra, Owner, Los Alamitos, California.

Colfax-Forest Hill Stage.

M. C. Langstaff, Forest Hill, California.

Cascada-Huntington Lake Stage Company.

D. A. Munger, Traffic Manager;

C. P. Staal, Auditor.

Business address, Edison Building, Los Angeles, California.

Copperopolis and Milton Auto Stage.

Jos. Deschamp, Copperopolis, California.

Camp Wishon Stage Line.

C. A. Kirkpatrick, Manager, Springville, California.

Calistoga-Clear Lake Stage Line.

Wm. Spiers, Calistoga, California.

John Cheap Stage Line.

John Cheap, 323 C street, Oxnard, California.

Camp Nelson Auto Stage Line.

C. B. Smith, Porterville, California.

Dos Palos Passenger and Freight Line.

Carl S. Painter, Dos Palos, California.

Downieville Stage Company.

Henry German, Nevada City, California.

Ducor-California Hot Springs Stage Line.

F. A. Minaker, Hot Springs, California.

Dunbar, S. H.

1100 Clay street, Oakland, California.

Dunham Auto Stage.

A. Dunham, Santa Rosa, California.

Drayage Service Corporation.

W. P. Scott, Manager, 561 Fourth street, Oakland, California.

Donner Lake-Truckee Auto Stage Line.

W. B. Gelatt, Donner Lake Camp, Truckee, California.

Dillingham Transportation Company.

E. B. and H. L. Dillingham, 245 East Ocean avenue, Long Beach, California.

Donlay's Milk Truck.

Elmer Donlay, Hynes, California.

Descanso-Laguna Camp Auto Line.

Geo. L. Terry, Laguna Camp Resort, San Diego County, California.

Eureka-Bridgeville Mail Route and Stage Line.

W. B. Shively, 2624 E street, Eureka, California.

Eureka-Arcata-Korbel Stage Line.

Thos. B. Riley, Eureka, California.

Edelblute's Truck Line Service.

J. L. Edelblute, Santa Ynez, California.

Escondido Truck Line.

Elmer Webb, Escondido, California.

El Dorado Motor Transportation Company, Incorporated.

A. L. Doerr, President and General Manager, Front and R streets, Sacramento, California.

Eagleville-Cedarville Auto Line.

James E. Jones, Cedarville, California.

Etna Mills-Forks of Salmon Stage Line.

Geo. W. Smith, Forks of Salmon, California.

J. O. Ernst.

209½ East Thirty-second street, Los Angeles, California.

Eagleville-Cedarville Auto Line.

L. S. Tripp, Eagleville, California.

Etna-Fort Jones-Yreka Stage Line.

C. A. Reichman, Fort Jones, California.

Eagle Rock Express.

Geo. A. Thompson, 407 East Adams street, Eagle Rock, California.

Escondido-Palomar Auto Line.

Hoxie, Hubbard and Stewart, Escondido, California.

Freshwater Auto Stage Line.

Wm. Lolax, Freshwater, California.

Fresno-Coalinga Stage Company.

Frank Roberson, 715 J street, Fresno, California.

Fresno-Sanger Stage Line.

Carl C. Allen, Manager;

Allen and Reese, Owners, 709 J street, Fresno, California.

C. R. Fudge Auto Line.

Collins Hotel, 1032 H street, Fresno, California.

Fresno-Orange Cove Auto Line.

H. H. Hardwick, Anchor Stage Depot, Fresno, California.

Fresno-North Fork Stage.

Geo. Teaford, North Fork, California.

French Gulch-Carrville Stage Line.

Basham and Brown, Carrville, California.

Fresno-Cutler Auto Truck.

Schmidt and Emick, 2255' Rose avenue, Fresno, California.

Fresno-Auberry Stage Line.

F. D. Jamison, Auberry, California.

Fresno-Kerman-Calwa Anchor Line Stage.

E. J. Thompson, Mono and J streets, Fresno, California.

Fallbrook and Oceanside Stage Line.

Jay G. Tucker, Fallbrook, California.

Firebaugh-Fresno Stage.

C. and H. Frisch, Firebaugh, California.

Folsom-Sacramento Auto Truck.

F. W. Wales, Folsom, California.

Forbestown Stage Line.

E. A. Boehme, Oroville, California.

Flintridge Motor Company.

R. F. Ingold, Secretary, 1016 South Broadway, Los Angeles, California.

Fresno-Riverside Stage Line.

D. M. Rife, 707 J street, Fresno, California.

C. F. Fredericksen and Sons.

Lower Lake, California.

Fresno-Visalia Freight and Express Truck Line.

G. C. Scribner, 2037 S. Van Ness avenue, Fresno, California.

Freeman's Motor Freight Service.

V. M. Freeman, 443 Hawthorne street, Glendale, California.

Ralph Follows Stage Line.

James A. Goss.

Coulterville, California.

Greene and Greene.

Colma, California.

Garberville-Briceland Auto Line.

Garberville Mercantile Company, Garberville, California.

Erben J. Henry.

968 South San Pedro street, Los Angeles, California.

F. A. Hodges.

San Juan, California.

Geo. Harm Truck.

1235 G street, Fresno, California.

Hanford-Corcoran-Tulare-Lindsay Auto Stage Routes.

C. J. Graham, Hanford, California.

Home Stage Line.

C. E. Sansome, Taft, California.

Healdsburg-Santa Rosa Auto Freight Line.

Thomas and Hopper, Healdsburg, California.

E. D. Hall.

Lankershim, California.

Harrell Freight Line.

O. E. Harrell, Plymouth, California.

Healdsburg and Geyser Stage Company.

R. P. Lattin, Healdsburg, California.

Hearne's Auto Truck.

Raymond J. Hearne, 1027 Nipomo street, San Luis Obispo, California.

Highway Stage Line.

R. L. and Claire T. Heple, 494 Delmas avenue, San Jose, California.

Highway Transport Company.

E. J. Mott, President, 317 Balboa Building, 593 Market street, San Francisco, California.

J. P. Hoffman Mail Stage.

Box 204, Victorville, California.

Jos. B. Held.

1100 Clay street, Oakland, California.

Highway Transportation Company.

C. T. Boyd, Manager, 221 South San Pedro street, Los Angeles, California.

O. L. Higdon Truck Line.

Riverdale, California.

Houck and Pimentel.

M.R. B, box 1058, Sacramento, California.

Hufford's Stage Line.

G. W. Hufford, Fortuna, California.

Hoffman and Grizes.

Yreka, California.

Hamilton City-Chico Stage Line.

Martin and Rosebrook, Hamilton City, California.

Hanson's Transportation Company.

F. E. Hanson, Box 75, Cedarville, California.

Hornbrook-Hamburg-Happy Camp Auto Line.

L. H. Newton, Hornbrook, California.

Holbrook and Shuller Stage Line.

Chas. B. Holbrook, R.F.D., 12, box 726, Los Angeles, California.

Hull Weider Transfer and Storage Company.

A. Pasteris, Owner, 1053 Thirty-seventh street, Oakland, California.

Huntington Park and Los Angeles Transfer.

F. J. Dresman, 138 South Pacific boulevard, Huntington Park, California.

Hodge Transportation System.

F. M. Hodge, 1816 East Ninth street, Los Angeles, California.

Half Moon Bay Draying Company.

Tocchini and Dianda, 111 Washington street, San Francisco, California.

A. J. Happe Transfer Company.

339 Orange street, Redlands, California.

Isabella-Onyx Stage.

Peter Larsen, Isabella, California.

Ireland Truck Line.

L. Ireland, 312 South I street, Madera, California.

Independent Truck Company.

C. E. and C. B. Trueblood, Managers, Whittier, California.

Interurban Freight Truck.

Mrs. Jennie A. Wells, 352 West Ninth street, Los Angeles, California.

A. F. Johnston Auto Line.

Verona, California.

Jolon Stage Line.

W. S. Charlton, Jolon, California.

Jackson-Silver Lake Auto Stage.

E. J. Keyes, 1156 Alabama street, San Francisco, California.

Joe and Ed's Express.

H. N. Richards, V. O. Gorst, H. W. Lowell, 1114 Sonoma street, Vallejo, California.

Valley Transit Company.

Geo. H. Vogeler, Secretary, 717 J street, Fresno, California.

Vance Truck Line.

T. K. Vance, 395 Center street, Pomona, California.

Valley and Coast Truck Line.

E. L. McConnell, Owner, San Luis Obispo, California.

Victorville Transfer Company.

Oscar M. Green, Victorville, California.

Washington Stage Line.

E. T. Moomey, Nevada City, California.

The White Lines.

W. J. Quinn, President, 448 South Center street, Stockton, California.

Winters Truck Company.

Claude Sears, Winters, California.

W. and S. Truck Company.

Geo. Wiegand, 618 Mill street, Los Angeles, California.

Wimer, W. H.

Gazelle, California.

Williams Truck Line.

Thos. H. Williams, 1195 Huntington boulevard, Pomona, California.

Willits-Ukiah Stage Line.

Riley and Robinson, Ukiah, California.

Willows-Glenn-Butte City Auto Service.

O. H. Harper, Willows, California.

Watsonville-Palm Beach Stage.

E. L. Paddon, Watsonville, California.

Whitcomb Stages.

W. F. Whitcomb, 548 South Louis street, Los Angeles, California.

Whitlock Stage.

C. L. Whitlock, Orland, California.

H. H. Webb Transfer and Storage Company.

H. H. Webb and Company, 220 Santa Monica boulevard, Santa Monica, California.

C. A. Ware Auto Freight Truck Lines.

F. P. McCarthy, Westmoreland, California.

Westport Auto Stage.

Westport, California.

Wheeler's Hot Springs Stage Line.

Webb W. Wilcox, Owner;

M. D. Bayles, Agent, Wheeler's Hot Springs, California.

Walters Springs Auto Line.

Claude E. Riley, box 44, Cement, California.

Wilbur Springs Stage Company.

E. Strauss, Manager;

A. M. Cuthbert, Secretary, Wilbur Springs, California.

Al. G. Witt.

492 Seventeenth avenue, San Francisco, California.

Williams-Bartlett Springs Stage Line.

Wm. Quigley, Williams, California.

- Willow Ranch-Surprise Valley Stage.**
W. N. Harris, Willow Ranch, California.
- Winters-Davis-Sacramento Auto Stage.**
Judy and Elliott, Winters, California.
- Weaverville-Junction City-Helena-Big Bar Stage Line.**
C. W. Bremer, Weaverville, California.
- Way's Ferndale-Loleta-Eureka Freight Line.**
A. W. Way, Eureka, California.
- West Coast Rapid Transit Company.**
D. B. Maurice, Hermosa Beach, California.
- Western Truck Line.**
Davis and Haynes, 1235 G street, Fresno, California.
- Willits-Garberville Stage Line.**
T. B. Riley, Willits, California.
- Winters Truck Line.**
J. H. Jacobs, Winters, California.
- Wagner's Inglewood Express.**

H. S. Emlaw, President;
S. W. Austin, Vice President;
H. H. Vater, Secretary and Treasurer;
O. W. Tuckwood, Auditor;
M. C. Cockshott, Superintendent.

Business address, Trona, California.

Ventura County Railway Company.

Elisha Gee, President;
Frederick Noble, Vice President and General Manager;
C. H. Weaver, Secretary;
W. N. Wilds, Auditor.

Business address, 1530 Sixteenth street, Denver, Colorado.

The Western Pacific Railroad Company.

Charles M. Levey, President;
A. R. Baldwin, Vice President;
F. W. McCutcheon, Vice President;
Charles Elsey, Vice President and Treasurer;
E. W. Mason, Vice President and General Manager;
W. G. Bruen, Secretary;
D. C. DeGraff, Auditor.

Business address, 963 Mills Building, San Francisco, California

Yosemite Valley Railroad Company.

F. G. Drum, President;
O. W. Lehmer, Vice President;
Thomas Turner, Secretary and Treasurer;
W. A. Robbett, Auditor, Merced, California;
W. L. White, General Manager, Merced, California;
F. L. Higgins, Superintendent, Merced, California.

Secretary's address, 910 American National Bank Building, 485 California street, San Francisco, California.

Yreka Railroad Company.

R. H. DeWitt, President;
J. E. Turner, Vice President;
Gordon Jacobs, Secretary;
F. A. Reiser, General Superintendent and Manager.

Business address, Yreka, California.

American Railway Express Company.

Chas. A. Lutz, Vice President.

Business address, 65 Broadway, New York.

Pasadena Electric Express Company.

F. S. Imes, President;
M. G. Collar, Secretary.

Business address, Pasadena, California.

The Pullman Company.

E. C. Morris, General Auditor.

Business address, Chicago, Illinois.

Pacific States Express, Incorporated.

G. R. Anderson, President;
B. F. McKibben, Secretary.

Business address, 247 Fremont street, San Francisco, California.

TABLE NO. 1.

ELECTRIC RAILWAYS.

List of Electric Railways and Their Officials.

Tables 1 to 5 Inclusive.

ELECTRIC RAILWAYS.

List of Officers of Electric Railway Companies as Reported in Annual Reports Filed with the Railroad Commission for the Year Ending December 31, 1922.**Angels Flight Railway Company.**

L. J. Christopher, President;
John Lopizich, Vice President;
R. M. Moore, Secretary and General Manager.

Business address, 215 West Sixth street, Los Angeles, California.

Bakersfield and Kern Electric Railway Company.

A. C. Balch, President;
Wm. G. Kerckhoff, Vice President;
L. M. Farnham, Secretary;
A. E. Peat, Treasurer;
A. E. Wishon, General Manager;
V. R. Mickleberry, General Superintendent, Bakersfield.

Business address, 1801 Tulare street, Fresno, California.

California Street Cable Railroad Company.

James W. Harris, President, General Manager and General Superintendent;
A. H. Payson, Vice President;
S. Waldo Coleman, Vice President;
George A. Hare, Secretary;
E. B. Stone, General Auditor.

Business address, 1061 Hyde street, San Francisco, California.

Castro Point Railway and Terminal Company.

Anson S. Blake, President;
Edwin T. Blake, Vice President and General Superintendent;
G. Kuppe, Secretary and Treasurer.

Business address, 5000 Broadway, Oakland, California.

Central California Traction Company.

H. Fleishhacker, President;
M. Fleishhacker, Vice President;
G. W. Peltier, Vice President;
Alden Anderson, Vice President;
A. N. Baldwin, Secretary and Treasurer;
S. M. Smith, General Auditor;
F. W. Webster, General Manager, Stockton;
J. J. Hooper, General Superintendent, Stockton.

Business address, 9 Main street, San Francisco, California.

City Railway Company of Los Angeles.

Leased to Los Angeles Railway Corporation.

W. E. Dunn, President;
H. E. Huntington, Vice President;
C. A. Henderson, Secretary, Treasurer and Auditor.

Business address, Los Angeles Railway Building, Los Angeles, California.

Fairfax Incline Railroad Company.

G. C. F. Seidel, President, Treasurer and General Superintendent;
W. E. Gallipau, Secretary.

Business address, Fairfax, California.

Fresno City Railway Company.

Operated by Fresno Traction Company.

Wm. F. Herrin, President;
Paul Shoup, Vice President;
L. A. Lovell, Secretary and Auditor;
F. W. Webster, General Manager, Fresno.

Business address, Pacific Electric Building, Los Angeles, California.

Fresno Interurban Railway Company.

H. H. Sanborn, President;
Thos. M. Patterson, Vice President;
Geo. H. Bradner, Secretary, Treasurer and General Auditor;
W. F. Fuller, General Superintendent, Fresno.

Business address, 216 Sutter street, San Francisco, California.

Fresno Traction Company.

Wm. F. Herrin, President;
Paul Shoup, Vice President;
L. A. Lovell, Secretary and Auditor;
F. W. Webster, General Manager, Fresno;
E. A. Devereaux, General Superintendent, Fresno.

Business address, Pacific Electric Building, Los Angeles, California.

Glendale and Montrose Railway.

Wm. G. Henshaw, President;
Loren Barton, Vice President;
V. Haresnape, Secretary and Treasurer;
W. M. Mills, General Auditor;
P. L. Hatch, General Manager.

Business address, 119 East Broadway, Glendale, California.

Los Angeles Railway Corporation.

H. E. Huntington, President;
G. J. Kuhrts, Vice President;
W. E. Dunn, Vice President;
C. A. Henderson, Secretary, Treasurer and Auditor;
G. J. Kuhrts, General Manager.

Business address, 1060 South Broadway, Los Angeles, California.

Los Angeles and Mt. Washington Railway Company.

A. I. Newton, President;
H. W. Ayers, Secretary.

Business address, 200 Marsh-Strong Building, Los Angeles, California.

Market Street Railway Company.

Reorganization of United Railroads of San Francisco.

Chas. N. Black, President and General Manager;
Geo. B. Willeutt, Vice President and Secretary;
A. M. Dahler, Treasurer;
Wm. M. Abbott, General Attorney.

Business address, 58 Sutter street, San Francisco, California.

Monterey and Pacific Grove Railway Company.

F. A. Treat, Attorney;
J. D. Brown, General Manager.

Business address, Monterey, California.

Nevada County Traction Company.

R. M. Hotaling, President;
John Martin, Vice President;
F. H. Pierson, Secretary;
L. Volmer, Assistant Secretary;
C. C. Skewes, General Superintendent, Grass Valley.

Business address, 354 Pine street, San Francisco, California.

Pacific Electric Railway Company.

Paul Shoup, President;
L. A. Lovell, Secretary and Auditor;
D. W. Pontius, Vice President;
F. L. Annable, General Superintendent.

Business address, Pacific Electric Building, Los Angeles, California.

Peninsular Railway Company.

Paul Shoup, President;
L. A. Lovell, Secretary and Auditor;
F. E. Chapin, General Manager, San Jose;
C. F. Edwards, General Superintendent, San Jose.

Business address, Pacific Electric Building, Los Angeles, California.

Petaluma and Santa Rosa Railroad Company.

Thos. Maclay, President;
G. P. McNear, Vice President and Treasurer;
R. W. Wise, Secretary;
E. H. Maggard, General Manager;
H. W. Von Emster, General Auditor.

Business address, Petaluma, California.

Pacific Gas and Electric Company—Sacramento Street Railway Department.

W. E. Creed, President;
John A. Britton, Vice President and General Manager;
A. F. Hockenbeamer, Vice President and Comptroller;
D. H. Foote, Secretary;
E. W. Hodges, General Auditor.

Business address, 445 Sutter street, San Francisco.

Sacramento Northern Railroad.

G. F. Detrick, President;
Sidney M. Ehrman, Vice President;
C. H. Gardiner, Secretary and Treasurer, 469 Mills Building, San Francisco,
California;
J. B. Rowray, General Manager;
J. R. Parke, Auditor.

Business address, Greenwald Building, Sacramento, California.

San Diego Electric Railway Company.

John D. Spreckels, President;
W. Clayton, Vice President and Managing Director;
F. G. Whitehead, Secretary;
N. E. Brown, Auditor.

Business address, San Diego, California.

San Francisco, Napa and Calistoga Railway.

James Irvine, President;
Guy C. Earl, Vice President;
John T. York, Vice President;
T. V. Maxwell, Secretary and Treasurer;
F. H. Groat, General Auditor;
C. E. Brown, General Manager and Vice President.

General Manager's address, Napa, California.

Secretary's address, 820 Crocker Building, San Francisco, California.

San Francisco-Oakland Terminal Railways.

C. O. G. Miller, President;
W. R. Alberger, Vice President and General Manager;
F. W. Frost, Secretary and Treasurer;
B. W. Fernald, Auditor.

Business address, 2183 Grove street, Oakland, California.

San Jose Railroads.

Wm. F. Herrin, President;
Paul Shoup, Vice President;
L. A. Lovell, Secretary and Auditor;
F. E. Chapin, General Manager, San Jose;
C. F. Edmonds, General Superintendent, San Jose.

Business address, Pacific Electric Building, Los Angeles, California.

San Francisco-Sacramento Railroad Company.

W. Arnstein, President;
H. A. Mitchell, Vice President and General Manager;
H. J. Sutherland, Secretary and Auditor;
S. P. Westington, Treasurer;
W. T. Richards, Chief Engineer.

Business address, Fortieth street and Shafter avenue, Oakland, California.

Santa Barbara and Suburban Railway Company.

W. A. Brackenridge, President;
C. A. Edwards, Vice President;
S. M. Kennedy, Vice President;
L. J. Lee, Secretary;
W. L. Percy, Treasurer;
C. P. Staal, General Auditor;
A. N. Kemp, Comptroller;
W. E. Erwin, General Superintendent, Santa Barbara.

Business address, Third and Broadway, Los Angeles, California.

South San Francisco Railroad and Power Company.

W. J. Martin, President;
Wm. M. Abbott, Vice President;
Geo. B. Willcutt, Secretary;
A. M. Dahler, Treasurer.

President's address, South San Francisco, California.

Stockton Electric Railroad Company.

Paul Shoup, President;
L. A. Lovell, Secretary and Auditor;
M. S. Wade, Treasurer;
F. W. Webster, General Manager, Stockton;
J. J. Hooper, General Superintendent, Stockton.

Business address, Pacific Electric Building, Los Angeles, California.

Tidewater Southern Railway Company.

Charles Elsey, President;
Byron A. Bearce, Vice President;
W. G. Bruen, Secretary;
D. C. DeGraff, Auditor;
E. L. Gamble, Manager, Stockton.

Business address, 922 Mills Building, San Francisco, California.

Union Traction Company.

S. Waldo Coleman, President;
R. M. Hotaling, Vice President;
L. W. Pryor, Secretary and Treasurer;
R. L. Cardiff, Manager, Santa Cruz.

Business address, 315 Montgomery street, San Francisco, California.

Visalia Electric Railroad Company.

Paul Shoup, President;
L. A. Lovell, Secretary and Auditor;
M. S. Wade, Treasurer;
F. W. Webster, General Manager, Exeter;
W. P. Ballard, General Superintendent, Exeter.

Business address, Pacific Electric Building, Los Angeles, California.

GAS AND ELECTRIC COMPANIES.

List of Gas and Electric Companies and Their Officials.

Gas Companies, Tables 1 to 5, Inclusive.

Electric Companies, Tables 1 to 4, Inclusive.

GAS AND ELECTRIC COMPANIES.

List of Officers of Gas and Electric Companies as Reported in Annual Reports Filed with the Railroad Commission for Year Ending December 31, 1922.

Alturas Electric Power Company.

I. W. Gibbons, President and General Manager;

B. F. Lynip, Secretary and Treasurer, 2301 Cedar street, Berkeley.

President's address, Alturas, California.

Amador Electric Light and Power Company.

E. C. Voorhies, President;

W. E. Downs, Vice President;

C. R. Downs, Secretary and General Manager.

Business address, Sutter Creek, California.

Bear Valley Utility Company.

B. T. Ergenbright, President and General Manager;

E. E. Richardson, Vice President;

E. S. Goble, Secretary and Treasurer.

Business address, Pine Knot, California.

Bay Point Light and Power Company.

W. S. Van Winkle, President, Treasurer and General Manager;

F. N. Beal, Vice President;

E. N. Van Winkle, Secretary.

Business address, Bay Point, California.

Bell Electric Company.

Frank R. Bell, General Manager, Auburn, California.

Ben Lomond Light Company.

F. A. Dickinson, Manager, Ben Lomond, California.

Alex Brown Electric Plant.

Alex Brown, Owner, Walnut Grove, California.

California Electric Generating Company.

H. Fleishhacker, President;

Herbert Fleishhacker, Vice President;

Guy C. Earl, Vice President;

H. P. Wilson, Vice President and Secretary;

L. A. Reynolds, Auditor;

J. B. Black, General Manager.

Business address, 530 Bush street, San Francisco.

The California-Oregon Power Company.

Joseph D. Grant, Chairman of the Board;

John D. McKee, President;

F. G. Phelps, Secretary;

Paul B. McKee, Vice President and General Manager;

C. A. Swigart, Auditor.

Business address, Medford, Oregon.

California Telephone and Light Company.

Leonard Howarth, President;
F. P. Doyle, Vice President;
Leo H. Susman, Vice President;
W. P. Ferguson, General Manager;
H. B. Brown, General Superintendent;
A. J. Lyon, Secretary, Treasurer and Auditor.

Business address, Santa Rosa, California.

Callayoni Electric Plant.

S. H. McKinley, Lessee, Middletown, California.

Central Counties Gas Company.

John Earle Jardine, President;
F. W. Hunter, Vice President and General Manager;
Robert G. Thomas, Secretary and Treasurer;
E. L. Brandon, General Superintendent.

Business address, Visalia, California.

Central Natural Gas Company.

George Finkbohner, President and General Manager;
J. N. Furry, Vice President;
Nate E. Carpenter, Secretary.

Business address, 29 North Grant street, Stockton, California.

Coast Counties Gas and Electric Company.

S. Waldo Coleman, President;
J. D. Grant, Vice President;
L. W. Pryor, Secretary and Treasurer;
R. L. Cardiff, Manager.

Business address, 315 Montgomery street, San Francisco, California.

Coast Valleys Gas and Electric Company.

M. B. Starring, President;
Phillip S. George, Secretary;
Jas. F. Pollard, Vice President;
T. W. Snell, General Superintendent;
A. E. Costanza, Auditor.

Business address, Salinas, California.

Contra Costa Gas Company.

S. Waldo Coleman, President and General Manager;
Louis Glass, Vice President;
L. W. Pryor, Secretary.

Business address, 315 Montgomery street, San Francisco, California.

Stuart Darling.

Summerland, California.

Del Monte Light and Power Company.

D. C. Morris, President;
Carmel Martin, Vice President;
M. B. Starring, Jr., Secretary and Treasurer;
Jas. F. Pollard, General Manager;
T. W. Snell, General Superintendent;
A. E. Costanza, Auditor.

Business address, Monterey, California.

Downieville Electric Light Company.

C. J. York, Owner, Downieville, California.

Fairoaks Electric Company.

R. A. Rose, Proprietor, Fairoaks, California.

Empire Mill and Electric Company.

H. B. Stephens, President;
H. H. Peterson, Vice President;
Henry Kober, Secretary;
R. R. Baker, Auditor.

Business address, Fort Bidwell, California.

Fontana Power Company.

A. B. Miller, President;
W. D. Spalding, Secretary;
J. D. McGregor, Assistant Secretary.

Business address, Fontana, California.

Fowler Gas Company.

W. S. Ricketts, President;
Edwin Gower, Sr., Vice President;
C. A. Patton, Secretary and General Manager.

Business address, Fowler, California.

Fort Bragg Electric Company.

F. C. White, President and General Manager;
H. P. Plummer, Vice President;
M. Raschke, Secretary;
W. G. Collins, General Superintendent;
G. B. Waterman, Auditor.

Business address, Fort Bragg, California.

Great Western Power Company of California.

M. Fleishhacker, President;
Herbert Fleishhacker, Vice President;
Guy C. Earl, Vice President;
H. P. Wilson, Vice President and Secretary;
W. H. Spaulding, Assistant Secretary;
F. M. Tompkins, Treasurer and Assistant Secretary;
Chaffee E. Hall, Assistant Secretary;
L. A. Reynolds, Auditor;
J. B. Black, General Manager.

Business address, 530 Bush street, San Francisco, California.

Grizzly Electric Company.

R. B. Young, Owner, Portola, California.

Hanford Gas and Power Company.

E. E. Bush, President and General Manager;
A. W. Reynolds, Secretary and General Superintendent;
F. R. Hight, Treasurer.

Business address, 116 West Seventh street, Hanford, California.

Hazel Gold Mining Company.

I. O. Jillson, President and General Manager;

J. W. Roper, Secretary.

Business address, P.O. box 907, Chico, California.

Hotchkiss, J. M.

Care Hobbs, Wall and Company, Fife Building, San Francisco.

Holton Power Company.

A. B. West, President;

F. O. Dolson, Vice President and General Superintendent;

P. R. Ferguson, Auditor;

Herbert Dewes, Secretary;

E. B. Criddle, General Agent;

A. S. Cooper, Treasurer.

Business address, Riverside, California.

Indian Valley Light and Power Company.

D. J. McIntyre, Greenville, California.

Lake County Power and Irrigation Company.

James A. Gunn, Jr., Owner, Kelseyville, California.

Lassen Electric Company.

Willis J. Walker, President;

Fletcher L. Walker, Vice President;

L. R. Cady, General Manager;

R. F. Pray, Secretary, Westwood, California.

Business address, Susanville, California.

Lompoc Light and Power Company.

D. F. Hill, President;

Wm. Hicks, Vice President.

R. M. Moore, Secretary and General Manager;

E. A. Vaughan, General Superintendent, Lompoc, California.

Business address, 215 West Sixth street, Los Angeles, California.

Los Angeles Gas and Electric Corporation.

W. B. Cline, President;

Wm. Bauthyte, Vice President and General Manager;

C. S. Vance, Vice President;

C. A. Luckenbach, Vice President;

T. P. McCrea, Secretary;

Horace Cline, Treasurer;

A. B. Day, General Superintendent.

Business address, 645 South Hill street, Los Angeles, California.

Madera Gas Company.

Geo. W. Kitchen, President and General Superintendent;

Arthur S. Nichols, Vice President;

Helmer Decker, Secretary;

Jas. Wakefield, Treasurer and General Manager.

Business address, Madera, California.

Mendocino Electric Light and Power Company.

A. G. Stone, President;
J. S. Ross, Vice President;
A. Brown, Secretary and General Manager;
J. Grindle, Treasurer.

Business address, Mendocino, California.

Middle Yuba Hydro-Electric Power Company.

A. D. Foote, President;
C. E. Clinch, Vice President;
Frank M. Nilon, Secretary.

Business address, Grass Valley, California.

Midland Counties Public Service Corporation.

A. C. Balch, President;
Wm. G. Kerckhoff, Vice President;
L. M. Farnham, Secretary;
A. E. Peat, Treasurer and Comptroller;
A. G. Wishon, Vice President and Managing Director;
E. A. Quinn, General Superintendent;
A. E. Wishon, General Manager.

Business address, 1801 Tulare street, Fresno, California.

Midway Gas Company.

Ferdinand Reis, Jr., President;
A. C. Balch, Vice President;
S. Waldo Coleman, Vice President;
L. M. Farnham, Secretary;
A. C. Johnston, Auditor;
A. E. Peat, Treasurer and Comptroller;
A. B. Macbeth, General Manager and Vice President;
Wm. Moeller, Jr., Chief Engineer and Assistant General Manager.

Business address, 950 South Broadway, Los Angeles, California.

Modesto Gas Company.

Frank A. Cressey, Jr., President and General Manager;
A. B. Shoemaker, Vice President;
Josephine Cressey, Secretary and Treasurer.

Business address, 818 Tenth street, Modesto, California.

Mt. Shasta Power Corporation.

W. E. Creed, President;
John A. Britton, Vice President and General Manager;
A. F. Hockenbeamer, Vice President, Treasurer and Comptroller;
D. H. Foote, Secretary;
E. W. Hodges, Auditor.

Business address, 445 Sutter street, San Francisco, California.

Napa Valley Electric Company.

D. L. Beard, President;
F. M. Wyatt, Vice President;
H. J. Lewelling, Secretary;
F. W. Mielenz, General Manager.

Business address, St. Helena, California.

Needles Gas and Electric Company.

R. S. Masson, President and General Manager;

M. A. Wadsworth, Secretary;

J. W. Wadsworth, General Superintendent, Needles, California.

Business address, 1200 Citizens National Bank Building, Los Angeles, California.

Nestle's Food Company, Incorporated.

C. W. Doty, Secretary;

Ira H. Latour, General Manager.

Business address, 112 Market street, San Francisco, California.

Novato Utilities Company.

J. W. Cain, President;

R. H. Trumbull, Vice President;

A. J. Cain, Secretary and Treasurer.

Business address, Novato, California.

Oakdale Gas Company.

M. M. Anderson, President;

G. W. Anderson, Secretary-Treasurer and General Manager.

Business address, Oakdale, California.

Ojai Power Company.

John J. Burke, President;

M. W. Phillips, Vice President and General Manager;

E. L. Wiest, Secretary and Treasurer.

Business address, Ojai, California.

Ontario Power Company.

A. Podrasnik, President;

H. E. Swan, Vice President;

A. C. Reynolds, Secretary and Treasurer;

Glenn D. Smith, General Manager.

Business address, Ontario, California.

Pacific Gas and Electric Company.

W. E. Creed, President;

John A. Britton, Vice President and General Manager;

A. F. Hockenbeamer, Vice President, Treasurer and Comptroller;

D. H. Foote, Secretary;

E. W. Hodges, Auditor.

Business address, 445 Sutter street, San Francisco, California.

J. G. Peters.

Dutch Flat, California.

Pinole Light and Power Company.

E. M. Downer, President;

L. E. Hart, Secretary;

Geo. A. Dutra, General Manager.

Business address, Pinole, California.

Point Arena Electric Light Company.

C. H. Henry, Owner, Point Arena, California.

Producers Gas and Fuel Company.

Wm. G. Kerckhoff, President;
A. C. Balch, Vice President;
L. M. Farnham, Secretary;
A. E. Peat, Treasurer and Comptroller;
A. B. Macbeth, Vice President and General Manager;
A. C. Johnston, Auditor.

Business address, 950 South Broadway, Los Angeles, California.

Quincy Electric Light and Power Company.

F. G. Gansner, Owner, Quincy, California.

Riverbend Gas and Water Company.

R. K. Madsen, President;
Wm. W. Parlier, Vice President;
W. J. Lohman, Secretary and Treasurer.

Business address, Parlier, California.

Sacramento Gas Company.

George W. Peltier, President;
Andrew McCormick, Vice President;
Chas. T. Hills, Secretary and Treasurer;
J. N. Jensen, General Manager.

Business address, 914 Seventh street, Sacramento, California.

Sacramento Valley Sugar Company.

A. M. Gelston, Manager, Hamilton City, California.

San Diego Consolidated Gas and Electric Company.

H. H. Jones, President;
H. M. Byllesby, Vice President;
Arthur S. Huey, Vice President;
M. B. Fowler, Secretary and Treasurer;
Byllesby Engineering and Management Corporation, General Managers;
L. M. Klauber, General Superintendent.

Business address, 935 Sixth street, San Diego, California.

San Joaquin Light and Power Corporation.

Wm. G. Kerckhoff, President.
A. C. Balch, Vice President;
L. M. Farnham, Secretary;
A. E. Peat, Treasurer and Comptroller;
A. G. Wishon, Vice President and Managing Director;
A. E. Wishon, General Manager;
A. B. Carpenter, Auditor.

Business address, 1801 Tulare street, Fresno, California.

Santa Cruz County Utilities.

J. C. Hughes, President and General Manager;
W. H. Bissell, Vice President;
E. H. Russell, Secretary and Treasurer.

President's address, 440 Lake Shore boulevard, Oakland, California.

Santa Maria Gas Company.

James F. Goodwin, President;
Thomas B. Adam, Vice President;
R. E. Easton, Secretary and General Manager;
Paul O. Tietzen, Treasurer;
Chas. W. Hatch, Auditor;
L. F. Chandler, General Superintendent.

Business address, Santa Maria, California.

Snow Mountain Water and Power Company.

E. S. Pillsbury, President;
H. D. Pillsbury, Vice President;
R. J. Woods, Secretary;
W. S. Graham, General Manager.

Business address, 216 Pine street, San Francisco, California.

Sierra and San Francisco Power Company.

Leased to Pacific Gas and Electric Company, December 31, 1919.

M. B. Starring, President;
H. F. Jackson, Vice President;
D. C. Morris, Vice President;
Alma L. Ferguson, Secretary.

Business address, 625 Market street, San Francisco, California.

A. Sorenson.

1932 Irving avenue, Oakland, California.

Southern California Edison Company.

John B. Miller, President and Chairman;
W. M. Brackenridge, Senior Vice President;
R. H. Ballard, Vice President and General Manager;
A. N. Kemp, Vice President and Comptroller;
S. M. Kennedy, Vice President;
G. C. Ward, Vice President;
Clifton Peters, Secretary;
W. L. Percey, Treasurer;
C. P. Staal, Auditor;
D. M. Trott, Comptroller.

Business address, Third and Broadway, Los Angeles, California.

Southern California Gas Company.

Wm. G. Kerekhoff, President;
A. C. Balch, Vice President;
A. B. Macbeth, Vice President and General Manager;
L. M. Farnham, Vice President and Secretary;
A. E. Peat, Comptroller and Treasurer;
A. C. Johnston, Auditor;
C. D. Bell, General Superintendent.

Business address, 950 South Broadway, Los Angeles, California.

Southern Counties Gas Company of California.

Ferdinand R. Bain, President;
Rufus C. Dawes, Vice President;
Charles H. Dickey, Vice President;
A. S. Bradford, Vice President;
Walter S. MacFarland, Secretary and Auditor;
T. H. Dudley, Treasurer;
Franklin S. Wade, General Superintendent.

Business address, 724 South Spring street, Los Angeles, California.

Southwestern Gas Company.

J. O. Percival, Manager and Receiver.

Business address, Hemet, California.

The Southern Sierras Power Company.

G. S. Wood, President;

A. B. West, Vice President and General Manager;

W. S. Fisher, Secretary;

L. C. Phipps, Jr., Vice President and Treasurer;

P. R. Ferguson, Auditor;

F. O. Dolson, General Superintendent.

Business address, Riverside, California.

James D. Stewart.

Auburn, California.

Surprise Valley Electric Light and Power Company.

Thomas B. Sizer, President;

R. H. Stanley, Vice President;

L. L. Turner, Secretary;

C. M. Johnstone, Treasurer.

Business address, Cedarville, California.

The Truckee Electric Light and Power Company.

P. M. Doyle, President and General Manager;

J. T. Lord, Vice President;

K. E. Doyle, Secretary and Treasurer.

Business address, Dixon, California.

The Truckee River General Electric Company.

F. S. Pratt, President;

Wm. T. Crawford, Secretary;

Geo. A. Campbell, Manager.

Business address, Reno, Nevada.

Tuolumne County Electric Power and Light Company.

Mrs. A. C. Crooks, President;

F. D. Madison, Vice President;

V. W. Vincent, Secretary;

H. J. Coffill, General Manager.

Business address, Sonora, California.

Turlock Gas Company.

A. A. Caldwell, President and General Manager;

W. E. Keith, Vice President;

Mrs. A. A. Caldwell, Secretary and Treasurer.

Business address, Turlock, California.

Twin Cities Gas Company.

J. M. Berkeley, President;

Wiley Mull, Secretary and General Superintendent, Beaumont, California.

President's address, 3116 West Fifteenth street, Los Angeles, California.

Utica Mining Company.

H. G. Stevenson, Secretary.

Business address, Balfour Building, San Francisco, California.

Vacaville Water and Power Company.

T. L. Gates, President;
Mrs. S. W. English, Vice President and Treasurer;
W. Z. McBride, Secretary and General Manager.

Business address, Vacaville, California.

Vallejo Electric Light and Power Company.

George Newman, President;
J. S. Adler, Vice President;
Albert Casper, Secretary, Treasurer and General Manager.

Business address, Vallejo, California.

Valley Natural Gas Company.

A. C. Balch, President;
W. G. Kerckhoff, Vice President;
L. M. Farnham, Secretary;
A. E. Peat, Treasurer and Comptroller;
A. C. Johnston, Auditor;
A. B. Macbeth, General Manager.

Business address, 950 South Broadway, Los Angeles, California.

Weaverville Electric Company.

J. R. Blair, President;
W. A. Goetz, Secretary;
J. R. Blair, General Superintendent.

Business address, Weaverville, California.

West Side Natural Gas Company.

Jos. McDonald, President;
J. T. Ryan, Vice President;
J. I. McKean, Secretary.

Business address, Taft, California.

Western States Gas and Electric Company.

Samuel Kahn, President and General Manager;
J. J. O'Brien, Vice President;
A. L. Chickering, Vice President;
B. F. Wellington, Jr., Secretary and Treasurer;
G. N. Rooker, Manager, Richmond Division;
H. L. Jackman, Manager, Eureka Division.

Business address, 48 North Sutter street, Stockton, California.

TABLE NO. 4—Continued.
 ABSTRACT OF OPERATING EXPENSES CLASS "B" GAS COMPANIES OPERATING IN CALIFORNIA DURING THE YEAR ENDING DECEMBER 31, 1922.

	Hanford Gas and Power Company	Madera Gas Company	Needles Gas and Electric Company	Riverbend Gas and Water Company	Turlock Gas Company	Total
PRODUCTION EXPENSES.						
Superintendence	\$1,200 00			\$540 00		\$1,740 00
Natural gas plant labor and supplies						
Steam plant labor and supplies	3,812 12			3,845 48	\$1,406 67	9,064 27
Gas generation labor and supplies	4,686 00	\$12,534 05	\$6,001 31	8,220 68	2,366 53	33,808 57
Fuel for steam				25,078 45	259 62	25,338 07
Oil or coal for gas	16,129 90		7,605 52		12,236 92	35,972 34
Miscellaneous labor and supplies	910 83			139 60	1,773 85	2,824 28
Gas from other sources						
Repairs to gas wells and derricks						
Repairs to structures and holders	106 65		131 06		170 17	407 88
Repairs to furnaces, boilers and accessories	152 50		989 73	510 62	371 22	1,034 34
Repairs to gas plant equipment	1,630 77			1,945 52	254 79	4,820 81
Repairs to miscellaneous production equipment					39 93	39 93
Total production expenses	\$28,628 77	\$12,534 05	\$14,727 62	\$40,280 35	\$18,879 70	\$115,050 49
TRANSMISSION EXPENSES.						
Transmission pumping						
General labor and supplies	\$569 86			\$5,130 59		\$5,700 45
Repairs to mains and structures				44 75		44 75
Repairs to transmission equipment				263 65	\$202 08	465 73
Total transmission expenses	\$569 86			\$5,438 99	\$202 08	\$6,210 93
DISTRIBUTION EXPENSES.						
Superintendence	\$1,200 00			\$995 59		\$2,195 59
Setting and removing meters and regulators	3,735 42			560 96	\$649 19	4,945 57
Inspecting and patrolling						
Gas meter operations			\$442 00			442 00
Commercial lamp labor and supplies						
Inspection and repairs to consumers installations				1,350 26	1,368 13	2,718 39
Municipal street lamp labor and supplies				267 37		267 37
General labor and supplies		3,609 79	426 46		447 44	4,483 69
Repairs to mains and services	198 90		1,217 28	1,522 65	1,042 25	3,981 08
Repairs to gas meters and regulators	841 77	22 22	246 14	567 11	2,032 96	3,710 20
Repairs to municipal street lighting system						
Repairs to commercial arc lamps						
Repairs to miscellaneous distribution equipment	185 59			307 71		493 30
Total distribution expenses	\$6,161 68	\$3,632 01	\$2,331 88	\$5,371 65	\$5,539 97	\$23,237 19
COMMERCIAL EXPENSES.						
Promotion	\$150 00		\$83 64	\$1,430 77	\$546 83	\$2,211 24
Commercial department supplies and expenses	1,521 64	\$1,819 00		7,596 64	5,366 83	16,304 11
Total commercial expenses	\$1,671 64	\$1,819 00	\$83 64	\$9,027 41	\$5,913 66	\$18,515 35

GENERAL AND MISCELLANEOUS EXPENSES.

Salaries and expenses of general offices	\$2,668 35	\$2,400 00	\$3,640 35	\$3,040 50	\$2,400 00	\$14,149 20
Law expenses—general			88			88
Railroad commission expenses				656 03		656 03
Injuries and damages				150 00	16 40	166 40
Relief department and expenses						
Gas franchise requirements				20 00		20 00
Other general expenses		3,079 33				3,079 33
Insurance	479 27	263 50	484 34	1,427 55	451 43	3,106 09
Repairs to miscellaneous equipment		259 80		2,323 71	138 82	2,722 33
Gas expenses transferred—Cr.						
Joint operating expenses—Cr.						
Undistributed adjustments—balance				1,116 32	482 31	1,598 63
Extraordinary repairs						
Repairs charged to reserves—Cr.						
Total general and miscellaneous expenses	\$3,147 62	\$6,002 63	\$4,125 57	\$8,734 11	\$3,488 96	\$25,498 89
OTHER OPERATING EXPENSES.						
Other expenses					\$37 00	\$37 00
Taxes	\$5,624 46	\$3,285 93	\$2,428 28	\$11,461 18	\$6,361 12	\$29,160 97
GENERAL AMORTIZATION OF CAPITAL.						
Amortization of franchises and patents					\$26 62	\$26 62
Depreciation of plant and equipment	\$7,714 20	\$4,031 44	\$2,333 69	\$7,820 40	5,389 84	27,289 57

TELEPHONE AND TELEGRAPH COMPANIES.

List of Telephone and Telegraph Companies and Their Officials.

Tables 1 to 4, Inclusive.

TELEPHONE AND TELEGRAPH COMPANIES.

List of Officers of Telephone and Telegraph Companies, as Reported in Annual Reports filed with the Railroad Commission for the Year Ending December 31, 1922.

Adelaide Rural Telephone Company.

Jas. W. Lemen, General Manager;
Mrs. Hettie Lemen, Secretary, Adelaide, California.

Alpaugh Telephone and Telegraph Company.

John H. Callister, Secretary, Alpaugh, California.

Anderson and Bear Creek Telephone Line.

L. C. Smith, Owner, Millville, California.

Antelope Valley Telephone Company.

O. F. Goodrich, Owner;
Ernest Irwin, Auditor, Lancaster, California.

Associated Telephone Company.

Geo. B. Ellis, President;
J. E. Fishburn, Vice President;
John E. Marble, Vice President;
B. O. Johnson, Secretary;
Sam R. Heffley, Auditor and General Manager, Long Beach, California.

G. W. Bandy.

Kernville, California.

Bass Telephone Line.

Geo. W. Johnstone, Manager, Montgomery Creek, California.

The Bear Valley Utility Company.

B. T. Ergenbright, President and Manager, Pine Knot, California.

Lily Berg Telephone Line.

Lily Berg, Owner, Llanada, California.

Bigelow Telephone Company.

H. E. Bigelow, Owner, O'Neals, California.

Bridgeport Telephone and Telegraph Company.

A. S. Bryant, Owner, Bridgeport, California.

Butte Valley Telephone Company.

Jos. Hessig, President and Manager;
J. H. Hessig, Secretary.
Fort Klamath, Oregon.

California Telephone and Light Company.

Leonard Howarth, President;
Frank P. Doyle, Vice President;
Leo. H. Susman, Vice President;
W. P. Ferguson, General Manager;
A. J. Lyon, Secretary, Treasurer and Auditor;
H. B. Brown, General Superintendent.
Santa Rosa, California.

Calaveras Telephone Company.

J. A. Tower, Owner, Felix, California.

Cambria Telephone Company.

Mrs. G. Guerra, Owner, Cambria, California.

Campbell Telephone Company.

F. M. Richter, President;
Ed Howes, Vice President;
A. C. Keesling, Secretary.

Campbell, California.

Capay Valley Telephone Company.

L. N. Wood, Owner, Gunda, California.

Chileno Valley Telephone Company.

J. L. Goatley, President;
Chas. G. Martin, Vice President;
Americo J. Bloom, Secretary and Treasurer.

R.D. 2, Petaluma.

Coachella Valley Home Telephone and Telegraph Company.

J. W. Newman, President;
J. A. Gordon, Vice President;
W. D. Gibbs, Secretary and General Manager.

Thermal, California.

Colfax Suburban Telephone Company.

Mrs. Edith M. Kennedy, Secretary, Weimar, California.

Colusa County Telephone Company.

J. F. Campbell, President;
F. H. Crosby, Secretary and Treasurer;
P. R. Roller, Auditor;
N. C. Steele, General Superintendent, Colusa, California.

576-578 Sacramento street, San Francisco, California.

Colorado River Telephone Company.

Mae I. Kamrar, President;
D. J. Kamrar, Vice President;
S. D. Kamrar, Secretary, Treasurer and General Manager.

Blythe, California.

Colfax Telephone Exchange.

Mrs. S. K. Morrison, Owner;
Carl G. Bell, Manager.

Colfax, California.

Corona Home Telephone and Telegraph Company.

Joy G. Jameson, President;
W. S. Clayson, Vice President;
Jas. S. Campbell, Secretary and General Manager.

Corona, California.

Coos and Curry Telephone.

Chas. Hall, President and General Manager;
C. E. Hickman, Secretary;
Ernest C. Smith, Vice President;
E. W. Gates, General Superintendent.

Marshfield, Oregon.

Corcoran Telephone Exchange.

W. Cronlie, Owner, Corcoran, California.

Consolidated Utilities Company.

Lon Dunn, President and General Manager;
Lee Sprague, Vice President;
Estella Wilson, Secretary and Auditor.
Compton, California.

Dalidio, Tognini and Ghezzi Telephone Company.

A. B. Tognini, G. Ghezzi and T. Dalidio, Owners, Cayucos, California.

Del Norte Peoples Telephone Company.

W. T. Breen, President;
Geo. M. Keller, Vice President;
G. W. Manley, Secretary and General Manager.
Crescent City, California.

Delta Telephone and Telegraph Company.

P. J. Huth, President;
H. T. Isham, Vice President;
H. D. Kercheval, Secretary and General Manager.
Courtland, California.

Dos Palos Telephone Company.

D. A. Leonard, President;
J. E. McClelland, Vice President;
E. W. Heston, Secretary and General Manager.
Dos Palos, California.

Downey Home Telephone and Telegraph Company.

Arthur L. Darby, President;
Orrin Gallup, Vice President and Superintendent;
A. Wardman, Secretary and General Manager;
E. A. Carter, Auditor.
Whittier, California.

Ducor-California Hot Springs Telephone and Telegraph Company.

L. S. Wingrove, President and General Manager;
F. M. Carlisle, Vice President;
H. C. Carr, Secretary and Treasurer;
Hot Springs, California.

Eel River and Southern Telephone Company.

H. D. Smith, President;
F. Calanchini, Vice President;
E. M. Loveland, Secretary and General Manager.
Ferndale, California.

Elk Grove Mutual Telephone Association.

H. D. Owens, President;
Edw. L. Gerrish, Secretary.
Elk Grove, California.

The Evans Telephone Company.

J. H. Evans, Owner, Patterson, California.

Exeter Telephone and Telegraph Company.

Wm. DeCarteret, Owner, Exeter, California.

Federal Telegraph Company.

R. P. Schwerin, President;
Leon Bocqueraz, Vice President;
Augustus Taylor, Secretary;
J. E. Godcharles, Treasurer and Auditor.

812 Hobart Building, San Francisco, California.

Forest Hill Telephone Exchange.

M. C. Langstaff, Manager, Forest Hill, California.

Fowler Independent Telephone Company.

J. S. Manley, President;
C. V. Peterson, Vice President;
J. H. Weinberg, Secretary and Treasurer;
J. D. Magill, General Manager and Superintendent.

Fowler, California.

Gilroy Telephone Company.

H. R. Chesbro, President;
E. J. Chesbro, Vice President;
C. R. Willson, Secretary;
C. W. Schemel, Manager;
W. E. Hills, Auditor.

Gilroy, California.

C. F. Green.

Ripon, California.

The Guglielmetti Telephone Company.

W. J. Guglielmetti, General Manager, Petaluma, California.

Happy Valley Telephone Company.

Geo. W. Stowell, President;
A. L. Walker, Vice President;
L. D. Walker, Secretary.

Olinda, California.

The Home Telephone Company.

O. H. Price, President;
John Scott, Secretary;

Etiwanda, California.

The Home Telephone Company.

W. H. Buster, President and General Manager;
Oscar Robinson, Secretary.

Sycamore, California.

Home Telephone Company of Covina.

J. O. Houser, President;
A. P. Kerckhoff, Vice President;
Mrs. L. M. LaFetra, Vice President;
F. H. Wright, Secretary and General Manager.

Covina, California.

Home Telephone and Telegraph Company of Pasadena.

G. E. McFarland, President;
H. D. Pillsbury, Vice President;
J. C. Nowell, Vice President and General Manager;
T. V. Halsey, Secretary;
Geo. J. Petty, Treasurer;
F. C. Phelps, General Auditor.

140 New Montgomery street, San Francisco, California.

Honey Lake Mutual Telephone Association.

F. B. Hoffman, President;
Elmer E. DeForest, Vice President, Secretary and Manager.
Lassen, California.

Huntington Beach Telephone Company.

E. H. Cookingham, President;
Ben H. Snowdon, Secretary, Treasurer and General Manager.
474 Ocean avenue, Huntington Beach, California.

Interstate Telegraph Company.

A. B. West, President;
A. S. Cooper, Vice President;
W. E. Porter, Secretary;
P. R. Ferguson, Auditor;
A. B. West, General Manager;
Vernon Wilder, General Superintendent, Bishop, California.
Riverside, California.

Keeler-Darwin Telephone Line.

Fred M. Hess, Owner, Bishop, California.

Kenwood Rural Telephone Company.

S. A. Whipple, President;
Geo. K. Moyle, Secretary, Treasurer and General Manager.
Kenwood, California.

Kerman Telephone Company.

J. V. Conley, President and General Manager;
Jacob Mansar, Vice President;
Mrs. Mary R. Sandell, Secretary.
Kerman, California.

Kern Mutual Telephone Company.

J. T. Maguire, President and General Manager;
T. F. Delury, Vice President;
Phil Blankenship, Vice President;
T. A. Brooks, Secretary;
A. R. Young, Auditor;
N. L. Ball, General Superintendent.
Taft, California.

Kingsburg Telephone Company.

A. L. Peterson, Secretary, Kingsburg, California.

Klamath Telephone and Telegraph Company.

J. H. Hessig, Manager, Fort Klamath, Oregon.

Knights Landing Telephone Exchange.

J. V. Leithold, Owner, Woodland, California.

Lindsay Home Telephone and Telegraph Company.

G. V. Reed, President;
F. F. Hostetter, Vice President;
Chas. H. Button, Secretary, Treasurer and General Manager.
Lindsay, California.

Livingston Telephone Company.

C. H. Lentz and A. A. Harrington, Owners, Livingston, California.

Los Gatos Telephone Company.

George W. Turner, President;
J. D. Farwell, Vice President;
F. F. Watkins, Secretary and General Manager.
Los Gatos, California.

Lemon Cove Telephone Exchange.

Paul Huneke, Owner, Lemon Cove, California.

Macdoel Telephone Company.

S. K. Adams, President and General Manager;
E. O. Bissell, Secretary and Treasurer.
Macdoel, California.

McFarland Telephone Company.

J. A. Green, President and General Manager;
Mrs. J. A. Green, Secretary.
McFarland, California.

Manteca Telephone and Telegraph Company.

M. A. Forbes, Owner;
C. W. Forbes, Manager.
Manteca, California.

Monrovia Telephone and Telegraph Company.

John H. Bartle, President;
J. M. Baldwin, Vice President and General Manager;
Walter F. Dunn, Secretary;
H. F. Booth, Auditor.
Monrovia, California.

Morgan Hill Telephone Company.

T. H. Dassel, Owner, Morgan Hill, California.

Needles Gas and Electric Company.

R. S. Masson, President;
Edw. G. Otis, Vice President;
M. A. Wadsworth, Secretary;
R. S. Masson, General Manager;
J. M. Wadsworth, Superintendent, Needles, California.
1200 Citizens National Bank Building, Los Angeles, California.

Nevada, California and Oregon Telegraph and Telephone Company.

Scott Hendricks, President;
A. J. Mathews, Vice President and General Manager;
A. A. Rosenshine, Vice President;
W. E. Hills, Secretary and Treasurer.
1039 Mills Building, San Francisco, California.

Northern Trinity Telephone and Telegraph Company.

Mrs. May Carr, President;
Mrs. G. McDonald, Vice President;
M. H. MacIlwaine, Secretary.

Trinity Center, California.

Novato Utilities Company.

J. W. Cain, President;
R. H. Trumbull, Vice President;
A. J. Cain, Secretary and Treasurer.

Novato, California.

Ontario and Upland Telephone Company.

G. E. McFarland, President;
J. C. Nowell, Vice President and General Manager;
T. V. Halsey, Secretary;
F. C. Phelps, General Auditor.

140 New Montgomery street, San Francisco, California.

Oxnard Home Telephone Company.

F. H. Crosby, President;
P. R. Roller, Secretary and Auditor;
Edward Wedekind, General Manager.

576-578 Sacramento street, San Francisco, California.

Owens Lake Telephone Company.

A. T. Smith, Manager, Keeler, California.

The Pacific Telephone and Telegraph Company.

H. T. Scott, Chairman of Board of Directors;
G. E. McFarland, President;

E. C. Phelps, General Auditor.

Shreve Building, San Francisco, California.

Paso Robles and Shandon Telephone Company.

Mat Iverson, President and General Manager;
George F. Bell, Vice President;
Paul Pfister, Secretary and Treasurer.

Paso Robles, California.

Petaluma Rural Telephone Company.

John R. Denman, President;
Geo. W. Gaston, Secretary.

Petaluma, California.

Petrolia Telephone Company.

M. M. Langdon, Manager, Petrolia, California.

Pine Knot Telephone Line.

J. H. Fisher, President;
T. C. Skinner, General Manager.

14 Citrus avenue, Redlands, California.

Pomona Valley Telephone and Telegraph Union.

J. A. Dole, President;
R. K. Pitzer, Vice President;
A. M. Dole, Secretary;
Carl H. Lorbeer, General Manager.

Pomona, California.

Postal Telegraph Cable Company.

A. B. Richards, President;
Edward Reynolds, Vice President;
H. C. Shaw, Vice President;
A. B. Richards, General Superintendent;
G. W. Holt, Secretary and Treasurer.

Bush and Battery streets, San Francisco, California.

Raymond Telephone Company.

A. C. Shaw, Owner, Raymond, California.

Redondo Home Telephone Company.

T. A. Gould, President and General Manager;
J. H. Cavanah, Vice President;
E. M. Gould, Secretary.

Redondo Beach, California.

Reedley Telephone Company.

A. Terkel, President and General Manager;
Dr. G. A. Therkof, Vice President;
Just Justesen, Secretary and Treasurer.

Reedley, California.

Red Hill Telephone Company.

Achille Ricioli, President;
R. L. Mazza, Secretary.

R.F.D. 5, box 121A, Petaluma, California.

Rio Vista Telephone and Telegraph Company.

J. M. Sullivan, President;
Peter Hamilton, Vice President;
Ethel Valente, Secretary and Treasurer;
J. E. Sullivan, General Manager.

Rio Vista, California.

Roseville Telephone Company.

W. J. Doyle, President;
C. T. McCracken, Vice President;
C. A. Baker, Secretary;
W. Hanisch, General Manager.

Roseville, California.

Sacramento Valley Telephone Company.

G. E. McFarland, Vice President;
H. D. Pillsbury, Vice President;
J. C. Nowell, Vice President and General Manager;
T. V. Halsey, Secretary;
Geo. J. Petty, Treasurer and Assistant Secretary;
F. C. Phelps, General Auditor.

Shreve Building, San Francisco, California.

Sanger Telephone Company.

H. F. Knapp, Owner, Sanger, California.

San Antonio Home Telephone Company.

Wm. F. Buttle, President;
F. J. Merritt, Secretary and General Manager.
King City, California.

San Fernando Telephone and Telegraph Company.

Walter F. Dunn, President;
J. M. Baldwin, Vice President and General Manager;
R. J. McHugh, Secretary and Treasurer;
H. T. Booth, Auditor.
San Fernando, California.

San Joaquin Valley Telephone Company.

Will E. Keller, President;
W. L. Valentine, Vice President;
J. M. O'Brien, Secretary;
Herman Janss, General Manager.
817 H. W. Hellman Building, Los Angeles, California.

San Miguel Interurban Telephone Company.

H. H. Durham, President;
G. McConnell, Vice President;
W. A. Wilmar, Secretary.
San Miguel, California.

Santa Barbara Telephone Company.

Alfred Edwards, President;
R. E. Easton, Vice President, Secretary and Treasurer.
D. A. Sattler, General Manager.
Santa Barbara, California.

Santa Monica Bay Home Telephone Company.

L. C. Torrance, President;
L. C. Torrance, Jr., Vice President;
Brian Welsh, Secretary and Treasurer.
Ocean Park, California.

Santa Paula Home Telephone Company.

F. H. Crosby, President;
P. R. Roller, Secretary and Auditor;
Edw. Wedekind, General Manager.
576-578 Sacramento street, San Francisco, California.

Sierra Madre Telephone and Telegraph Company.

O. E. Emley, President and General Manager;
J. M. Baldwin, Vice President;
Walter F. Dunn, Secretary and Treasurer;
H. F. Booth, Auditor.
Sierra Madre, California.

Siskiyou Telephone Company.

A. Dannerbrink, President and General Manager.
H. Dannerbrink, Vice President;
M. C. Beem, Secretary.
Etna Mills, California.

Smeltzer Home Telephone and Telegraph Company.

R. E. Larter, President;
Geo. W. Moore, Vice President;
Chas. C. Johnson, Secretary.

R.F.D. 3, Santa Ana, California.

Southern California Telephone Company.

G. E. McFarland, Chairman of the Board;
A. B. Cass, President;
H. D. Pillsbury, Vice President;
J. C. Nowell, Vice President and General Manager;
T. V. Halsey, Secretary;
F. C. Phelps, Auditor.

Shreve Building, San Francisco, California.

Southwestern Home Telephone Company.

Charles A. Rolfe, President and General Manager;
J. H. Logie, Vice President;
Carl D. Rolfe, Secretary, Treasurer and General Superintendent.

Redlands, California.

Sunland Rural Telephone Company.

S. D. Percey, President;
A. F. Wells, Vice President;
F. L. Ballinger, Secretary;
A. Adams, Jr., Treasurer and General Manager;
Ernest Irwin, Auditor.

Sunland, California.

Suisun and Green Valley Telephone Company.

F. A. Chadbourne, President;
J. L. Neitzel, Vice President;
C. E. Roberts, Secretary and Treasurer.

Suisun, California.

Robt. L. Swanson Telephone System.

Robt. L. Swanson, Owner, Red Bluff, California.

J. P. Thomas.

Garberville, California.

Tuolumne Telephone Exchange.

George H. Jones, Owner, Tuolumne, California.

Turlock Home Telephone and Telegraph Company.

J. L. Randolph, General Manager, Turlock, California.

United States Long Distance Telephone and Telegraph Company.

G. E. McFarland, President;
H. D. Pillsbury, Vice President;
J. C. Nowell, Vice President;
Arthur Wright, Vice President and Attorney;

Business address, 1120 Trust and Savings Building, Los Angeles, California.

Associated Water Company.

Paul Shoup, President;
P. G. Williams, Secretary and Auditor;
W. A. Sloan, Treasurer;
L. J. King, General Superintendent.

Business address, 79 New Montgomery street, San Francisco, California.

Avila Water Works.

A. E. Ruda, Avila, California.

August Oil Company.

F. A. Homan, President and General Manager;
F. D. Prescott, Vice President;
A. W. Burdick, Secretary;
J. R. Peters, Superintendent.

Business address, Fresno, California.

Bakersfield Water Works.

J. R. Williams, President;
Thos. C. Williams, General Manager;
Fairfax Williams, Secretary and Treasurer.

Business address, 1012 Baker street, Bakersfield, California.

Bay Point Utilities Company.

F. A. Warner, President and General Manager;
A. H. Paulsen, Vice President and Treasurer;
C. B. Johnson, General Superintendent.

Business address, 1000 Balfour Building, 351 California street, San Francisco, California.

Beachland Water System.

A. I. Smith, Agent, 637 Consolidated Building, Sixth and Hill streets, Los Angeles, California.

Baldwin Park Domestic Water Company.

S. M. Walker, President and General Manager;

T. H. Wygant, Secretary;

Jeannette Walker, Treasurer.

Business address, Baldwin Park, California.

Jacob Bean Estate.

Eugene E. Bean, Agent, Alhambra, California.

Bear Gulch Water Company.

Guy C. Earl, President;

J. K. Moffitt, Vice President;

E. Britton, General Superintendent;

R. G. Sproul, Secretary;

Ralph P. Merritt, General Manager.

Business address, 351 California street, San Francisco.

Bell Water Company.

W. H. King, President;

J. H. Clewett, Vice President;

Alva H. Pearson, Secretary and Treasurer;

A. B. Shaub, General Manager.

Business address, Bell, California.

Belvedere Water Company.

H. H. Braly, President;

Edwin Janss, Vice President;

Harold Janss, Secretary;

R. T. Frank, General Manager;

A. L. Page, General Superintendent.

Business address, 404 Metropolitan Building, Fifth and Broadway, Los Angeles, California.

R. A. Blackburn.

331 El Bonita street, Glendale, California.

Benicia Water Company.

Ansley K. Salz, President;

Alexander Hamilton, Vice President;

H. D. Allen, Secretary;

Kullman Salz and Company, Treasurer;

M. K. Salz, General Superintendent, Benicia.

Business address, 603 Wells Fargo Building, San Francisco, California.

Bond and Jones Water Company.

R. W. Jones, Manager, P.O. box 611, Orange, California.

Beverly Hills Utilities Company.

Burton E. Green, President;

W. E. Dunn, First Vice President;

M. H. Whittier, Second Vice President;

F. B. Sutton, Secretary;

H. L. Westbrook, Treasurer and Auditor.

Business address, 617 Merritt Building, Los Angeles, California.

Boyes Spring Park Company.

James Baines, Owner, Boyes Springs, California.

The Buena Vista Canal Company.

H. A. Jastro, President and General Manager;
W. W. Frazier, Vice President;
F. G. Munzer, Secretary;
Kern County Canal and Water Company, Treasurer.

Business address, 1704 Nineteenth street, Bakersfield, California.

The California Company.

R. G. Cann, Manager, Peoples Bank Building, Santa Cruz, California.

The Campbell Water Company.

Ralph H. Hyde, President and General Manager;
George E. Hyde, Vice President;
W. B. Jones, Secretary;
Wm. F. Mason, General Superintendent.

Business address, Campbell, California.

California-Michigan Land and Water Company.

Richard C. Goodspeed, Secretary, 410 Central Building, Los Angeles, California.

California Vineyard and Improvement Company.

Nelson M. Van Fleet, Owner, Cucamonga, California.

The Capitola Company.

H. A. Rispin, President;
Harry Bickell, Treasurer, Auditor and General Superintendent.

Capitola, California.

Centerville Water Company.

M. S. Pires, Jr., President;
Rose L. Pires, Secretary;
F. E. McGurrin, Treasurer.

Business address, Station "G", Oakland, California.

The Central Canal Company.

H. A. Jastro, President;
R. F. Haines, Vice President;
F. G. Munzer, Secretary;
Kern County Canal and Water Company, Treasurer.

Business address, 1704 Nineteenth street, Bakersfield, California.

Chowchilla Land Company.

Wm. A. Anderson, Manager, Chowchilla, California.

Ceres Water Works.

J. M. Vincent, Proprietor, Ceres, California.

Chico Vecino Water Company.

B. H. Steffen, P.O. box 56, Chico, California.

Chico Water Supply Company.

Ed Harkness, President;
S. L. Sproul, Vice President;
A. G. Simpson, Secretary, Manager and Superintendent;
Butte County National Bank, Treasurer.

Business address, 133 Broadway, Chico, California.

Citizens Land and Water Company of Upland.

Charles Ruedy, President;
A. P. Harwood, Vice President;
C. P. Fuller, Secretary and Treasurer.

Business address, P.O. box 578, Upland, California.

Citizens Water Company of Niles.

F. V. Jones, President;
W. V. Eberly, Vice President;
E. A. Ellsworth, Secretary and General Manager.

Business address, Niles, California.

City Water Company of Banning.

C. O. Barker, President;
M. F. Gilman, Vice President;
Chas. S. Hill, Secretary.

Business address, Banning, California.

City Water Company of Ocean Park.

G. M. Jones, President and General Manager;
T. H. Dudley, Vice President;
A. Hammer, Secretary;
Ocean Park Bank, Treasurer;
W. W. Albin, General Superintendent, Santa Monica;
E. R. Jillson, Auditor.

Business address, Ocean Park, California.

Claremont Domestic Water Company.

L. T. Gillett, President;
G. S. Sumner, Vice President;
J. D. Johnson, Secretary;
H. E. Mead, Treasurer;
W. White, General Manager.

Business address, Claremont, California.

Clyde Company.

D. C. Seagrave, President;
W. H. Seagrave, Secretary.

1006 Santa Fe Building, San Francisco, California.

Coalinga Consolidated Water Company.

W. L. Winans, President;
W. H. Bueneman, Vice President;
C. H. Dickinson, Secretary and Auditor.

Secretary's address, Merritt Building, Los Angeles, California.

President's address, P.O. box "D", Tulare, California.

Compton Water and Lighting Company.

J. L. Shepard, President and General Manager;
A. J. Shepard, Vice President;
M. E. Shepard, Secretary.

Business address, 3631 Temple avenue, Long Beach, California.

Conservative Water Company.

W. W. Pedder, President and General Manager;
J. L. Brown, Vice President;
A. B. Pedder, Secretary.

Business address, 8619 Fir street, Los Angeles, California.

Consolidated Canal Company.

L. A. Nares, President;
R. M. Bostwick, Secretary;
I. Teilman, Chief Engineer.

Business address, Fresno, California.

Consolidated Water Company of Pomona.

E. B. Gridley, President;
F. L. Lathrop, Vice President;
G. A. Lathrop, Secretary and General Manager.

Business address, Pomona, California.

The Coram Water Company.

S. A. Holman, President;
M. G. Holman, Secretary.

Business address, 830 Mandana boulevard, Oakland, California.

Corona City Water Company.

R. L. Willits, President;
C. M. Scoville, Secretary;
First National Bank, Treasurer;
H. R. Case, General Manager.

Business address, Corona, California.

Coronado Water Company.

J. D. Spreckels, President;
W. Clayton, Vice President and Managing Director;
F. G. Whitehead, Secretary;
A. Ervast, Manager;
N. E. Brown, Auditor.

Business address, San Diego, California.

Cosumnes Irrigation Company.

R. T. McKisick, Secretary.

Business address, 33 State Capitol Building, Sacramento, California.

Cottonwood Irrigation and Mining Company.

E. J. Fowler, President and General Manager;
D. C. Earhart, Secretary and Treasurer.

Business address, Hornbrook, California.

The Cove Water Company.

E. M. Sheridan, President;
Lenna A. Sheridan, Vice President;
Dale A. Frane, Secretary.

Business address, Orange Cove, California.

Crown Water Company.

G. E. Campbell, President;
C. A. Thomas, Secretary;
C. D. Sutliff, Treasurer;
Wm. Barber, Chief Engineer.

Business address, 515 Slavin Building, Pasadena, California.

Crystal Springs Water Company.

J. M. Pruden, President and General Superintendent;
Ruth Pruden, Vice President;
Mrs. Grace Edwards, Secretary and Treasurer.

Business address, 254 Massachusetts avenue, Sawtelle, California.

Cucamonga Water Company.

W. J. Kincaid, President;
W. C. Belden, Secretary.

Business address, Cucamonga, California.

Cuyamaca Water Company.

Owned by James A. Murray, Ed Fletcher and Wm. G. Henshaw.

Lou B. Mathews, Secretary;
Ed Fletcher, General Manager;
C. Harritt, General Superintendent.

Business address, 916 Eighth street, San Diego, California.

Davis Water Company.

T. G. Schmeiser, President and General Manager;
Mrs. C. L. Schmeiser, Secretary.

Business address, Davis, California.

Del Mar Water, Light and Power Company.

Wm. G. Kerckhoff, President;
Henry Kressman, Secretary;
F. H. Tolle, General Manager.

Business address, 910 Garland Building, 740 South Broadway, Los Angeles, California.

Diamond Ridge Water Company.

O. Scribner, President and General Manager;
Chas. B. Bills, Vice President;
M. B. Downing, Secretary and Treasurer.

Business address, 528 California Commercial Union Building, San Francisco, California.

The Doherty Company.

E. L. Doherty, President, P.O. box 41, Bakersfield, California.

Dutch Flat Water Works.

A. W. Nicholls, Owner, 1430 Hawthorne terrace, Berkeley, California.

East Bay Water Company.

Edwin O. Edgerton, President;
J. Y. Eccleston, First Vice President;
R. M. Fitzgerald, Second Vice President;
S. M. Marks, Secretary and Treasurer;
George H. Wilhelm, Vice President and General Manager.

Business address, 510 Sixteenth street, Oakland.

East Gardena Water Company.

F. W. Sutter, President and General Manager;
E. H. Hammond, Secretary and Treasurer.

Business address, Gardena, California.

East Highlands Domestic Water Company.

C. S. Hamilton, President;
F. B. Erichsen, Secretary.

East Highlands, California.

Elmhurst Water Supply.

Peter Zingg, Owner, 5000 Folsom boulevard, Sacramento.

The East Side Canal Company.

A. K. Warren, President;
F. G. Munzer, Secretary and Auditor;
Kern County Canal and Water Company, Treasurer;
H. A. Jastro, General Manager.

Business address, 1704 Nineteenth street, Bakersfield, California.

East Side Water Distributing System.

S. H. Finley, Owner, Santa Ana, California.

East Side Canal and Irrigation Company.

George J. Hatfield, President and General Manager;
Judith B. Hatfield, Vice President;

LETTER OF TRANSMITTAL.

*To His Excellency, FRIEND WM. RICHARDSON,
Governor of California,
Sacramento, California.*

In conformity with the provisions of section 12 of the Public Utilities Act, herewith is transmitted the report of the Railroad Commission of the State of California for the fiscal period beginning July 1, 1923, and ending June 30, 1924.

Public utilities of California continued during this period, without material let up, the remarkable expansion that began immediately after the World War, with a resulting heavy demand upon the resources of the Railroad Commission in every department of its activities.

The number of utilities filing reports, and coming under the direct jurisdiction of the Commission increased from 1669 to 1775, despite many consolidations, and retirements of companies and individuals from the utility field. There were 1061 formal applications, and 88 formal complaints filed, involving rates, service or other matters. The Commission itself instituted 11 proceedings on its own motion, some of which were of far-reaching importance.

In passing upon this great volume of business the Commission held 725 hearings throughout the state, and 278 meetings in its offices at San Francisco, as well as innumerable conferences. It rendered 1450 decisions, the largest number recorded in any year of its history, with the exception of the fiscal period of 1922-23.

Transcripts of testimony and exhibits in the formal proceedings covered 72,594 folios, or a total of 7,259,400 words transcribed, which will convey an adequate idea of the work performed by the Reporting Department in reporting these proceedings.

There was a marked increase in the informal complaints handled during the fiscal year, there being 6315, as against 5493 for the preceding fiscal period, indicating an increased appreciation by the public of the valuable service rendered by the Commission in adjusting informally the numerous matters of difference between utility companies and their patrons. In addition to these informal complaints 301 disputed bills for public utility service, where the amount in question was deposited with the Commission, were adjusted. The Commission is pleased to report increased cooperation on the part of public utilities in the adjustment of these informal complaints.

RATE REDUCTIONS.

Rate reductions during the fiscal year aggregated in the vicinity of \$5,000,000 in certain specific rate proceedings. The actual expense of operating the Commission during the fiscal year ending June 30, 1924, amounted to \$384,718.66.

The largest single reduction was that applying to the Southern California Edison Company, resulting in a reduction of approximately \$2,000,000 a year.

In addition to those proceedings handled by the Commission within the state solely, it has taken an active part in a number of important

proceedings before the Interstate Commerce Commission, and litigation before the California State Supreme Court and the United States Supreme Court of far-reaching benefit to public utility patrons, not only within the State of California but throughout the United States.

Extension of the principle of automatic rate fixing based on fluctuations in the price of fuel oil to steam heating utilities resulted beneficially, and this practice has made possible rate adjustments for gas utilities in *ex parte* orders, thereby eliminating many expensive rate hearings. This automatic rate adjustment has also served to stabilize rates on the most equitable basis.

SECURITY ISSUES.

During the twelve months ending June 30, 1924, the Department of Finance and Accounts of the Commission passed upon applications involving the issue of \$245,884,653.07 of stocks, bonds, notes or other evidences of indebtedness by public utilities. It authorized the issue of \$243,869,746.29, and dismissed requests involving \$2,014,906.78 of securities. The amount authorized was nearly \$100,000,000 greater than during the preceding fiscal period.

Gas and electric companies applied for authority to issue the largest amount of securities of any class of utility, or \$124,008,650. Telephone and telegraph companies asked for the next greatest amount, \$55,952,250. Electric railways were third on the list with applications aggregating \$42,059,092.88. It is worthy of note that the tremendous amount of \$192,920,725.41 of securities were authorized for the purpose of financing additions and betterments.

In no other way is it possible to visualize so accurately the phenomenal growth of California utilities than by a review of these figures.

FINANCIAL CONDITION OF UTILITIES.

Although the year was not a favorable one from some standpoints for certain public utilities, their earnings showed a substantial increase, despite rate reductions ordered by the Commission during the fiscal period in question and the one prior thereto. Net operating revenues for corporations operating within the State of California increased \$36,634,757.12 during the calendar year 1923. These figures include the complete earnings of steam railroads and telephone and telegraph companies, which operate outside as well as within the State of California.

Gross earnings of all utilities operating in California, including interstate business of those utilities operating outside of the state, aggregated \$890,351,740.52 during 1923, as against \$818,244,553.28 for the calendar year of 1922, an increase of \$72,107,187.24. The gross revenues of these utilities on purely California business during 1923 amounted to \$485,192,470.40 as compared with \$453,500,000 in 1922, or an increase of nearly \$32,000,000.

Operating expenses of these utilities, including interstate business of those utilities operating outside of California, were \$638,448,890.42 in 1923, as against \$602,976,460.30 in 1922, an increase of \$35,472,430.12. The net operating revenues increased \$36,634,757.12 during 1923, the total figure being \$251,902,850.10, as against \$215,268,092.98 in 1922, and \$192,176,416.16 in 1921. The comparison with the 1920 net operating revenues is even more striking, the figure for that year being \$136,033,206.65.

Railroad companies operating within the State of California showed gross revenues from business within the state during 1923 of \$188,650,210.26; expenses of \$135,595,090.37, and net operating revenues of \$54,056,119.80, as compared with net operating revenues of \$46,722,508.57 for 1922, and \$42,199,000 for 1921, and \$29,945,000 for 1920.

While the earnings of steam railroads during the first six months of 1924, which are included in the fiscal year under review, showed a marked falling off, as compared with their earnings during 1923, it is believed that their aggregate earning in 1924 will come close to their aggregate earnings in 1923. However, the earnings of all other utilities will show a marked increase, bringing up the grand total of revenues for California utilities to a point where they will maintain the same ratio of increase shown during the last four years.

VALUATION WORK.

The work of valuation of public utility property is worthy of mention. Such valuations are proceeding in connection with the street railway survey in Los Angeles, involving property exceeding \$50,000,000, and in condemnation proceedings of gas and electric properties in both San Francisco and Los Angeles, involving property worth many millions of dollars. It is also being carried out in analyses of railroad valuations submitted by the Interstate Commerce Commission. As the result of analyses made by this Commission of the Federal Bureau of Valuations' tentative report on The Atchison, Topeka and Santa Fe System, reductions in excess of \$7,000,000 in that body's estimate of the cost of reproduction new, and of the cost of reproduction less depreciation, have been allowed.

WORK OF ENGINEERING DEPARTMENT.

Due to curtailment of the engineering staff, approximately 40 per cent effective at the beginning of the fiscal year, the amount of work handled by the Engineering Department necessarily was reduced materially in scope and effectiveness, but not in volume.

The outstanding problem confronting the Engineering Department has been the water shortage with consequent reduction in available supply of both water and hydro-electric power, and the imposing of serious burdens upon these utilities, not encountered during normal years.

As the fiscal year drew to a close the state was faced by an economic problem of hitherto unsurpassed seriousness due to the power shortage, making necessary a radical curtailment in the consumption of power, and the taking of steps to appoint a power supervisor to enforce this reduction in power consumption. The Commission was fortunate in being able to obtain the services of Mr. H. G. Butler, who acted as power administrator for the Commission during the period of power shortage, during the World War, and also during the shortage in the northern part of the state in 1920. A splendid spirit of cooperation is being manifest by the utilities and large and small users of industrial and commercial power in making the work of the power administrator a success.

GAS AND ELECTRIC DIVISION.

Many special problems are being handled by the Gas and Electric Division of the Engineering Department, not the least of which is the inspection of overhead electric facilities as to compliance with statutes regulating such construction. The net result of this work has been to render safer for workmen and the public all overhead electric lines throughout the state and their modernization. Some idea of the scope of this work may be gained when it is stated that during a period of one and one-half years a total of 401,450 infractions of the statutes were recorded, and on the second inspection the number found was but 11,358, a reduction of the number of infractions per mile of line inspected from 4.82 infractions per mile, to .46 infractions per mile.

The manufacture of artificial gas has been standardized and stabilized through the enforcement of the Commission's General Order No. 58, fixing such standards. The Commission was also instrumental in the organization of the California Gas Research Council which is engaged in the study of major problems confronting California gas industries.

• HYDRAULIC DIVISION.

There are in excess of 450 public utility water systems in California subject to regulation by the Commission, and while the number is decreasing from year to year, due to consolidations, and retirements from business, through entrance of municipal water departments into the territory of water utilities, the number of consumers served by water companies is larger than ever.

Decisions involving water utilities were rendered in 209 formal proceedings during the fiscal year, and 200 formal proceedings were filed. The Division also investigated 540 informal water complaints.

Drought conditions naturally resulted in a flood of water complaints, as compared with ordinary years, but there were in addition a number of extremely important formal proceedings. Most important of these was the determination of rates of the East Bay Water Company on complaint of the city of Berkeley. The Division conducted 28 appraisals of water companies totaling in excess of \$24,000,000, and special inspections and surveys were made of water service in connection with the Berkeley fire, with recommendations for preventing a recurrence of that disaster. The Hydraulic Division also made a survey and prepared recommendations in connection with a proceeding instituted by the Commission to prescribe adequate facilities for the service of water to municipalities in the East Bay district.

Much difficult work was thrown on the Hydraulic Division by the water shortage and resultant reduction in power consumption. Regulations controlling the reduced consumption of water were prepared in a general order directed to companies operating in Los Angeles and Orange counties.

TELEPHONE AND TELEGRAPH DIVISION.

Work of the Telephone and Telegraph Division covered a wide range of subjects during the fiscal year ending June 30, 1924, including investigations in connection with formal proceedings, informal complaints, and inductive interference. Studies were also made to determine the adequacy of the service of these utilities throughout the state.

but particularly telephone service in Los Angeles, Santa Monica, Long Beach, San Francisco and the East Bay cities. Numerous public meetings and conferences were held throughout the state, at which members of the Division discussed telephone conditions and operation with representatives of communities and the companies.

There are approximately 200 telephone and telegraph companies operating in California under the jurisdiction of the Commission.

In addition to the major investigations the Commission rendered helpful service to the smaller telephone utilities in solving problems of operation.

As the outgrowth of extensive investigation by the Commission a complete set of rules and regulations governing the operations of telephone utilities has been compiled and these rules and regulations have been placed in effect, with marked improvement in the service of the larger utilities serving the great bulk of telephone subscribers in California.

The Division disposed of 37 formal applications and 13 formal complaints involving telephone and telegraph matters.

There was a marked reduction in the number of complaints involving telephone service in southern California, due to installation of new facilities in Los Angeles and vicinity, and a heavy reduction in the number of complaints in regard to delayed installations is anticipated during the ensuing fiscal year.

Valuations were made in five telephone proceedings involving property valued at approximately \$58,000,000. At the end of the fiscal year there were pending before the Commission 15 proceedings involving telephone and telegraph utilities, exclusive of applications for authorization of stocks and bonds.

Approximately 3800 informal complaints were received during the year, of which 74.2 per cent originated in Los Angeles. The Commission disposed of 3952 telephone complaints during the year, of which 96.6 per cent were adjusted in favor of the complainant. Telephone development for Los Angeles anticipates a population of 1,700,000 by 1929.

In this connection it may be stated that California ranks high among the states of the union in the number of telephones per 1000 population, and that the United States leads all nations by a wide margin in the number of telephones per 1000 population. The ratio throughout the United States is estimated at 132 telephones to each 1000 people, while in San Francisco the number is 252 and in Los Angeles 227.

TRANSPORTATION DIVISION.

Decisions involving transportation studies during the last fiscal year numbered 360, the great bulk of which had to do with the establishment of new spur tracks and grade crossings.

Other matters handled by this Division related to new depot facilities, realignments of tracks, protection of grade crossings, separation of grades, and abandonment of unprofitable branch lines and stations. Routine work not included in the formal decisions included 56 miscellaneous complaints, the inspection of 17 interlocking plants, analysis of steam carrier valuations of the Bureau of Valuations of the Interstate Commerce Commission, and the preparation of protests thereon for the

attention of the interstate body. A number of studies were also made into the growth and development of interurban transportation systems, rearrangement of interurban arteries, and service surveys of streetcar and interurban railway systems. Twelve grade separations involving large construction expenditures, and resulting in elimination of a large number of traffic intersections were ordered during the year. A total of 56 informal complaints were investigated, the great bulk of which had to do with grade crossings. Much work has been done also in connection with the construction of viaducts across steam and electric railroad tracks in Los Angeles and vicinity, and the apportionment of construction costs.

A comprehensive survey of the two local street railway systems in Los Angeles has been conducted jointly by the Commission, the Board of Public Utilities of the city of Los Angeles and representatives of the street railway systems, with the view to reaching conclusions, if possible, relative to consolidation of local street railway properties and a plan of unified operation. Considerable work has also been done, upon request of the city of Los Angeles, and civic organizations on the investigation of transportation development of the Los Angeles harbor. Four recommendations were made as the result of this investigation looking toward unification of railroad facilities, establishment of a classification yard, zoning of the entire district and elimination of grade crossings.

Following the rendering of a decision by the United States Supreme Court upholding the opinion of the California Supreme Court that jurisdiction in the matter of establishing a union passenger terminal is vested in the Interstate Commerce Commission under the Transportation Act of 1920, the Transportation Division prepared a definite plan of constructing a suitable union terminal in the general area selected by the commission. This plan, together with summaries of cost estimates and other engineering data, was submitted at hearings before the Interstate Commerce Commission, and the matter is now under submission by that body.

Due to financial limitations on the Commission the general grade crossing survey, undertaken in 1916, was suspended at the end of the last fiscal year and the only field work done during the year under review has been the resurvey of grade crossings in Mill Valley and Berkeley upon request of the municipalities. The Division has cooperated, however, in the organization of the Northern California Grade Crossing Committee, a body similar to that now in existence in southern California.

It was a matter of satisfaction to the Commission that the Commission's order of 1916, directing Southern Pacific Company to construct a new passenger station at Sacramento, and which was delayed due to the war and uncertainty of the railroad's ownership of the property involved in Sacramento, has been brought to a successful culmination.

RATE DEPARTMENT.

The Rate Department has handled a greatly increased volume of business during the fiscal year ending June 30, 1924, owing to changed commercial conditions, making necessary many rate adjustments. The Commission was in a position to authorize a large number of these adjustments without holding prolonged formal hearings.

Files of the Rate Department now contain copies of every tariff and supplement thereto filed since the statute of 1909, requiring public utilities to publish tariffs and to file them with the Commission, became effective. Authorizations were issued informally by the Rate Department for 1563 rate adjustments applying to 1284 public utilities subject to the jurisdiction of this department of the Commission. There are now on file approximately 150,000 freight and passenger tariffs of these utilities. Tariffs of 111 carriers on the inland waters of the state, 319 warehousemen, 41 food warehousemen and 33 wharfingers are also on file.

The important part played by the Rate Department of the Railroad Commission in preparing the data, upon which the Commission combatted successfully the raises in the rates of the American Railway Express Company, has been described in previous Annual Reports, but the Commission is gratified to report that the Interstate Commerce Commission on May 17, 1924, ordered commodity rates on foodstuffs, effective June 21, 1924, eliminating the $13\frac{1}{2}$ per cent increase heretofore ordered, which restored those rates to the basis of October 12, 1920. Another order placed in effect a new class rate structure, January 1, 1925, which will bring about a reduction of approximately 10 per cent in the gross revenue of the express company.

It is estimated that California shippers and receivers of express matter have saved approximately \$1,000,000 yearly since 1920 through the action of the Railroad Commission in resisting the last increase of $13\frac{1}{2}$ per cent ordered by the Interstate Commerce Commission. The Commission also took an active part in the action brought by the California Growers and Shippers Protective League before the Interstate Commerce Commission for a reduction of the rates on deciduous fruits in carloads from California points to destinations throughout the United States. The Commission in this proceeding seeks a reduction of this rate from \$1.73 per 100 pounds to \$1.44 per 100 pounds, or to the basis authorized by the Director General of Railroads, January 25, 1918. This proceeding is now under submission.

Rate reductions, ordered either by the California Commission or the Interstate Commerce Commission, through the active participation of the California Commission in many instances, will result in a reduction of the gross system revenue of the California carriers during the years 1923 and 1924 of over \$15,000,000 per annum, as compared with the revenue under the higher schedule of rates during the peak of their activities between 1920 and 1922.

An important milestone in regulation of utilities was marked by the first joint hearings conducted by the Interstate Commerce Commission and the California Commission in cases involving the rates on lumber between points in California, and in connection with movement from points outside of California for consumption within the state. Acting under authorization of the Transportation Act of 1920 these hearings were held by Commissioner B. H. Meyer and Examiner Joseph F. Eshelman of the Interstate Commerce Commission, and President Clyde L. Seavey and Examiner W. P. Geary of the California Commission. The proceeding is now being briefed, and is one of vast importance to the lumber producer and consumer in the State of California.

Other important proceedings where action was taken before the Interstate Commerce Commission were those involving the Pullman Sleeping Car surcharge, the Express Rates, Grain and Grain Products rates, the Western Coal Rate Case, and the proceeding involving the interstate rates on fresh deciduous fruits forwarded in refrigerator cars from points within the State of California to destinations throughout the United States. The California Commission took an active part in all of these proceedings. In the surcharge case an order was issued eliminating the increased rate, but upon application from the interested carriers the case has been reopened for further consideration.

In connection with rate matters it is worthy of note that the California Supreme Court in September, 1923, upheld the action of the Railroad Commission in fixing interurban railway fares upon a different basis from local passenger fares for streetcar service. This decision was rendered in connection with litigation involving fares fixed by the Commission on the Pacific Electric Railway between Los Angeles and Pasadena, South Pasadena, Alhambra and Glendale. It is of statewide importance as it clearly establishes the correctness of the theory used by the Commission in fixing interurban fares on a mileage basis, as distinguished from local streetcar fares, which are fixed on the basis of the ride per passenger without regard to the distance traveled by the individual passenger within the local fare zone. The court pointed out also the distinction between interurban service, operated on separate tracks from the local service, by means of larger and heavier cars operated at higher speed, and with a greater number of, and more comfortable seats than the local service provided. The court held that the interurban passenger service can not be classified the same as the local passenger service.

During the year the weekly-pass method of transportation was extended with excellent results to the San Diego Street Railway. This system is expected to produce a marked improvement in street railway finances in many cities throughout the state. Discrimination in the matter of school children reduced fare tickets on street railways in the cities of Oakland, Berkeley and Piedmont, as compared with Richmond and Alameda, were eliminated, the fares being equalized in all those cities. A satisfactory adjustment was ordered during the year of the complaint of the city of Piedmont and the Piedmont Civic Association against the San Francisco-Oakland Terminal Railways (Key System Transit Company) in which discrimination in the matter of one-way and commutation fares between San Francisco and the city of Piedmont was alleged. The Commission ordered this discrimination removed and through conference between the principals an agreement was reached whereby the Piedmont line is being extended from the present terminus at Fortieth street and Piedmont avenue, Oakland, into the city of Piedmont.

Through negotiations conducted by the Commission informally, the discrimination against the city of Oakland by the Southern Pacific and the Western Pacific railroads in favor of San Francisco, in the matter of the absorption of unloading charges on earload shipments originating in the Sacramento Valley, was removed by the extension of the absorption of these unloading charges to the city of Oakland. Reparations on account of excessive charges by steam carriers on

returned empty fruit and vegetable containers during the "Federal Guaranty Period" were ordered by the Commission, amounting to approximately \$30,000 in a proceeding brought by the principal canning companies of northern California. The Commission held that it had jurisdiction during this period (March 1 to August 31, 1920) and ordered the refunds, but its order has not been complied with pending action in the civil courts. Reductions were ordered in the rates on crude salt in earload lots from Trona to Bakersfield, and on sugar beets from southern California points to Anaheim refineries. A reduction of 30 cents per ton in the rates on crushed rock shipped to Exchequer, a point located on the Yosemite Valley Railroad, in order to facilitate construction work on the Merced Irrigation District, was also ordered by the Commission. A decision was rendered settling the controversy between the four cement producing mills in northern California in the matter of the differential existing between competing mills. Special low rates to facilitate the movement of starving cattle to new feeding grounds throughout the state were authorized owing to the unusual drought conditions. Additional duties were placed upon the Rate Department by the enactment of chapter 387 by the legislature of 1923, which requires owners of vessels desiring to operate exclusively on the inland waters of California to procure a certificate from the Railroad Commission before beginning operations.

SERVICE DEPARTMENT.

The Service Department devoted a large portion of its activities during the last fiscal year to inspections on applications by rail carriers for authority to discontinue nonprofitable stations or to abandon non-paying branch lines. Inspections were also made in connection with 56 accidents on the rail lines, and, as the result of the investigations by the Commission's inspectors, valuable recommendations were made for the removal of obstructions to clear vision at dangerous highway crossings, or for the correction of unsafe practices of operation.

Due to the continuous inspection of methods of operation it may be said that the operation of the smaller lines in California has been brought up to a satisfactory standard. There were 574 automobile inspections during the year to observe the compliance of auto stage and freight transportation utilities with the operating regulations and safety rules prescribed by the Commission.

The inroads made upon the passenger traffic, formerly enjoyed by the steam and electric interurban railroads, through the advent of privately owned automobiles and auto stage lines and truck lines, have been increasedly apparent. The Railroad Commission has required a full and satisfactory showing before consenting to elimination of passenger train service when requested by carriers, and many such requests have been denied.

LEGAL DEPARTMENT.

The fiscal period 1923-24 was a busy one for the Legal Department, as litigation involving the Railroad Commission has been increasing rapidly during the last three or four years. The increase in the general work of the Commission has also thrown a heavy volume of work on the Legal Department which is limited to an attorney and an assistant attorney.

At the end of the fiscal year there were three cases pending in the United States Supreme Court, six in the California Supreme Court, one in the District Court of Appeals and three in the Superior Courts of California. There were also pending six cases before the Interstate Commerce Commission.

An important change in the personnel of the Legal Department was announced at the close of the fiscal year, Mr. Hugh Gordon, attorney for the Commission, tendering his resignation, effective July 1, 1924, and Mr. Carl I. Wheat, his assistant, being named in his place, effective on the same date.

One important decision was rendered by the United States Supreme Court during the fiscal year in litigation conducted by the Railroad Commission. This was in the consolidated cases involving the question of jurisdiction of the Railroad Commission to order Southern Pacific Company, The Atchison, Topeka and Santa Fe Railway Company, and the Los Angeles and Salt Lake Railroad Company (Union Pacific), to construct a union passenger terminal within a specified area in Los Angeles. This was brought to the United States Supreme Court by the Railroad Commission on a petition for a writ of *certiorari* for a review of the decision of the California Supreme Court annulling the order of the Railroad Commission directing the railroads to file plans for the erection of such a union passenger terminal. The United States Supreme Court affirmed the California Supreme Court's decision, holding that the Interstate Commerce Commission had jurisdiction in the premises under the provisions of the Transportation Act of 1920. This matter is now pending before the Interstate Commerce Commission upon complaint of the city of Los Angeles, joined in by the Railroad Commission.

Two important decisions in which the California Supreme Court upheld the action of the Commission were those involving the validity of interurban electric car fares between Los Angeles and suburban cities, which the Commission fixed upon a different basis from local railway fares, and that affirming the order of the Commission fixing rates for Sutter-Butte Canal Company, and reversing the former decision of the court in which the Commission's order had been annulled.

This matter is now pending before the United States Supreme Court on writ of error.

In *Williamson vs. Railroad Commission* the Supreme Court upheld the action of the Railroad Commission in fixing rates for water service different from those heretofore effective under certain contracts.

The attorney of the Railroad Commission appeared before the Interstate Commerce Commission in the successful effort of this Commission to obtain a nation-wide revision of express rates and a reduction of trans-continental express rates affecting California particularly. Attorney Gordon was honored by western states, appearing in this proceeding, by being designated to represent all those states and to prepare the briefs in their behalf. The successful culmination of this proceeding will result in saving California shippers and receivers of express matters many millions of dollars.

The California Commission continued during the fiscal period to maintain its high average in sustaining its decisions and orders when questioned in the courts. Since the reorganization of the Commission

in 1911 it has made 13,748 formal orders and decisions, and has been a party to 136 court proceedings. The courts have reversed the Commission in but 11 instances, or considerably less than one-tenth of one per cent.

CARRIERS ON INLAND WATERS.

Due to the enactment of chapter 387, Statutes of 1923, owners of vessels, operating exclusively between points on the inland waters of California, were placed under the jurisdiction of the Railroad Commission, and those persons desiring to enter this business are required to obtain a certificate from the Commission. Carriers who operated vessels in good faith on the inland waters of the state prior to August 17, 1923, are not required by this statute to obtain certificates from the Commission but come under the provision requiring the filing of proper tariffs conforming to the rules and regulations of the Commission.

The detail of regulating these carriers was assigned by the Commission to the Rate Department and Auto Stage and Truck Department. The Rate Department has jurisdiction over the rates, and the Auto Stage and Truck Department has jurisdiction over operations. Approximately 95 per cent of these carriers are operating on San Francisco Bay and waters tributary thereto. There are 111 of these carriers, with tariffs on file with the Commission. The addition of this class of utilities to the jurisdiction of the Commission placed a considerable amount of work upon the Commission without adequate provisions for caring therefor.

MOTOR TRANSPORTATION.

Motor transportation of persons and property has reached a stage in its development that makes its regulation one of the most important of the Commission's functions. The Auto Stage and Truck Department, established by the Commission in 1921, in chapter XIV of this report, to which you are respectfully referred, tells of its activities in the regulation of the 670 auto stage and truck lines operating under the jurisdiction of the Commission.

Nearly 30,000,000 passengers were transported during the year 1923 by authorized motor carriers, a gain of approximately 8,000,000 over the number transported in 1922. In 1923, auto trucks operating under the jurisdiction of the Commission transported 833,245 tons of freight.

The operating revenues of all motor carriers, both freight and passenger, reporting to the Commission, aggregated \$17,554,980.86, and operating expenses totaled \$16,237,160.31. The number of pieces of auto equipment used in common carrier service is given as 1665 passenger cars, 1276 trucks, and 355 trailers. The plant and equipment investment of these auto lines is reported as \$13,557,975.82.

Figures compiled from the annual reports of auto carriers tell graphically the extent of the operations of the motor vehicle in the common carrier field. Literally, a network of auto lines covers the state, bringing within range of accessibility points remote from centers of population.

In the year covered by this report the trend towards enlargement of the field of service by the larger companies is marked. This is indicated by the transfer, with the approval of the Commission, by small, or purely local operators, of their operating rights to large companies.

The Commission is of the opinion that under certain conditions such mergers make for the best interests of the traveling public. The combined operations lend to a better understanding of the transportation needs of the public, and to better financing ability, which makes possible provision for equipment and service of a higher type than that offered by the operator of a purely local auto line forming a link in a through service. This is particularly true of the passenger lines.

The auto lines, as indicated by their many requests for authority to establish joint or through rates, involving two or more systems, are rapidly learning the value of cooperative effort. While joint rates do not of themselves enlarge the territory served by any particular operator they do permit the sale of tickets by one line to points served by another, thus adding to the convenience of those who seek the auto stage as a means of travel.

GRADE SEPARATION FINANCES.

One of the most serious problems confronting the state, and one which the Railroad Commission believes should be stressed at this time, is that of financing the separation of grades, and the abolishment of dangerous grade crossings throughout California.

The public interest demands that measures be taken for relief from this growing hazard to traffic, with its resulting toll of life and property. The Railroad Commission has devoted a great deal of time and attention to the grade crossing problem, and has ordered numerous separations of grades at the more important grade crossings, where conditions demanded immediate relief, but despite the efforts of the Commission the number of grade crossings has grown steadily.

Two causes have contributed in recent years to render the grade crossing problem acute, namely, the rapid growth in population of the state, and the extraordinary development in automobile transportation.

The demands of business, due to the development of the state, have necessitated the building of many new crossings of the public highways and the railroads. Before the tremendous increase in automobile transportation made itself felt, the grade crossing was a local problem. Traffic was largely local on the highways, and it was agreed that where separation of grades between a highway and a railroad was necessary it was a local improvement, and that portion of the expense of such grade separation that would normally be borne by the public should be assessed locally. That the carrier should bear a large portion of the cost of grade separations was also conceded.

Conditions of traffic have now changed radically, and where formerly most of the traffic on the highways was strictly local, or at most was confined to the particular county in which the grade crossing was located, now the highway traffic is of a statewide nature. The development of automobile traffic has rendered the matter of grade crossing elimination an improvement in which the entire state has an interest.

It would no longer be fair to assess against a given community all of the public's share of the cost of separating grades on a much traveled highway. The automobile and truck owner throughout the length and breadth of the state has a direct interest in making every crossing on the state highways safe.

The changed conditions of traffic due to the development of automobile travel and truck transportation have also served to render every highway crossing a menace of state-wide importance, instead of a menace to merely local traffic.

It has been possible for the Railroad Commission to render relief through grade separations at certain crossings, outside of incorporated cities and towns, where state funds are available for use. Unfortunately, however, many of the most dangerous grade crossings, which are a menace to through traffic, are located in incorporated cities and towns, and state funds are not available for use in paying the public's portion of the expense of separating the grades.

It would be manifestly unfair to impose upon these communities all of the expense to be borne by the public in separating these grades, and in fact it would be impossible for the communities themselves to raise sufficient money to meet this expense, were it thrown upon them.

The Railroad Commission recommends strongly that the next legislature provide some means of furnishing the funds for expenditure by the State Highway Commission, or some other agency, for the elimination of grade crossings, not only upon state highways, but upon county or municipal streets or roads, where such grade crossings impose a serious hazard on through, or state-wide traffic, and the community is unable to meet the heavy cost of such construction.

The report is in one volume of two parts. Part one is devoted to a description of the work of the Commission from a statistical and departmental standpoint. Part two contains tables compiled from the annual reports of utilities filed with the Commission, in conformity with the provisions of the Public Utilities Act and the rules of the Commission.

Respectfully submitted.

CLYDE L. SEAVEY,
HARLEY W. BRUNDIGE,
IRVING MARTIN,
EGERTON SHORE,
J. T. WHITTLESEY,

Commissioners.

October 20, 1924.

PART ONE

THE BUSINESS OF THE YEAR

CHAPTER I.

JURISDICTION—HISTORY—LEGISLATION
ORGANIZATION.

Although created under the provisions of section 22 of article XII, of the constitution of 1879, the Railroad Commission derives its principal powers from Assembly Constitutional Amendments Nos. 6 and 50, and Senate Constitutional Amendment No. 47, adopted at a special election on constitutional amendments held October 10, 1911, and the Public Utilities Act enacted by the legislature in 1911, and approved by the Governor, December 23, 1911, and becoming effective March 23, 1912.

The Public Utilities Act and amendments thereto, and the various constitutional and legislative provisions prescribing and enlarging the powers of the Railroad Commission and defining public utilities subject to its jurisdiction are listed briefly as follows:

Public Utilities Act enacted 1911, approved December 23, 1911; in effect March 23, 1912. (Statutes 1911, extra session, chapter 14, page 18.) Reenacted 1915; Statutes 1915, chapter 91, page 115. Amended: Statutes 1917, chapter 120, page 168; chapter 137, page 199; chapter 176, page 261; chapter 176, page 269; chapter 209, page 320; chapter 707, page 1329. Statutes 1919, chapter 304, page 488; chapter 304, page 493; chapter 304, page 497; Statutes 1921, chapter 776, page 1355; Statutes 1923, chapter 387, page 834; chapter 388, page 837. Constitutional provisions, article XII, sections 20 to 23a. Food Warehousemen Act, Statutes 1919, chapter 215, page 314. Act for regulation of auto stage and truck transportation, Statutes 1917, chapter 213, page 330; amended, Statutes 1919, chapter 280, page 457; Statutes 1921, chapter 840, page 1609; Statutes 1923, chapter 310, page 644. Act for regulation of water companies, Statutes 1913, chapter 80, page 84, and Statutes 1923, chapter 172, page 413.

There have been no changes in the constitutional or statutory provisions affecting the Railroad Commission since publication of the last annual report of the Railroad Commission, in which a complete history of the Commission, its legislation and organization was given, chapter I, page 15. It is not necessary, in view of the fact that there have been no changes in, or additional laws enacted, to repeat this portion of the Commission's report. Those who are interested are referred to chapter I of the annual report for 1922-23. The ensuing chapters will give a comprehensive account of the Commission's activities.

CHAPTER II.

THE YEAR'S WORK.—STATISTICAL REPORT.

Both formal and informal activities of the Railroad Commission continued at a high average during the fiscal year, July 1, 1923, to June 30, 1924, as compared with previous years, according to the records of the secretary's department.

FORMAL PROCEEDINGS.

With 1775 public utilities filing reports under the jurisdiction of the Commission, as against 1669 the previous year, there were 1061 formal applications, 88 formal complaints received, and 1450 decisions were rendered in formal proceedings.

Informal complaints received numbered 6315, as against 5493 for the preceding fiscal period, indicating an increased appreciation by the general public of the valuable service rendered by the Commission in adjusting informally the numerous matters of difference with utility companies. In addition to the purely informal complaints the Commission adjusted 301 disputed bills for public utility service, where the amount in question was deposited with the Commission, pending the adjustment of the complaint. While these cases are practically informal complaints, few of them involving a formal proceeding, they are given numbers apart from the informal complaints where no money is deposited.

INFORMAL PROCEEDINGS.

Informal complaints were received at the San Francisco office of the Commission to the number of 2788, and at the Los Angeles office to the number of 3527. The excess in the number of complaints received at the Los Angeles office is accounted for by the heavy proportion of telephone complaints in the southern city, where the tremendous growth in population has necessitated the virtual reconstruction of the telephone system in the last few years.

HEARINGS HELD.

Due to the fact that the Commission has been obliged to handle an increasing number of matters in *ex-parte* fashion the number of hearings during the last fiscal period showed a marked decrease, there being 725, as against 1074 the previous year. Of these hearings 132 original hearings were held in the courtrooms of the Commission in San Francisco, 190 in the courtrooms at the Los Angeles office, and 188 at other cities and towns throughout the state. In addition to these original hearings there were 215 adjourned, further, or rehearings.

The Commission held 278 meetings in its office at San Francisco for the consideration of pending matters and regular business, as well as a large number of conferences and business sessions.

FORMAL COMPLAINTS.

Table No. 1 shows the number of formal complaints filed with the Commission every year since January 1, 1911, the date of the reorganization of the Commission in its present form:

TABLE NO. 1.

Formal Complaints Filed with the Railroad Commission During the Fiscal Years Ending June 30, 1912, to June 30, 1924.

January 1, 1911, to June 30, 1912, inclusive	168
July 1, 1912, to June 30, 1913, inclusive	138
July 1, 1913, to June 30, 1914, inclusive	209
July 1, 1914, to June 30, 1915, inclusive	194
July 1, 1915, to June 30, 1916, inclusive	145
July 1, 1916, to June 30, 1917, inclusive	136
July 1, 1917, to June 30, 1918, inclusive	150
July 1, 1918, to June 30, 1919, inclusive	80
July 1, 1919, to June 30, 1920, inclusive	131
July 1, 1920, to June 30, 1921, inclusive	170
July 1, 1921, to June 30, 1922, inclusive	146
July 1, 1922, to June 30, 1923, inclusive	148
July 1, 1923, to June 30, 1924, inclusive	88

Formal complaints, segregated as to subject matter and utility, are shown in the following table:

TABLE NO. 2.

Complaints Filed from July 1, 1923, to June 30, 1924.

	Steam railroads	Electric railroads	Water carriers	Electric companies	Gas companies	Telephone and telegraph companies	Water companies	Auto stage companies	Warehouse companies	Apartment houses	Total
Rates and fares	10	4	2	2	2	1	2	1			24
Service and facilities	1			4		6	20	1			31
Illegal operation, abandonment and transfer		1	3				2	17			23
Grade crossing, protection	7	2									9
Classification of accounts					1						1
Through rates—joint rates											
Totals	18	7	5	6	3	7	24	19			88

FORMAL APPLICATIONS.

Formal applications totaled 1061, or 109 less than during the previous year. The number of formal applications filed by years is shown by Table No. 3, as follows:

TABLE NO. 3.

Formal Applications Filed with the Railroad Commission During the Fiscal Years Ending June 30, 1912, to June 30, 1924.

March 23, 1912, to June 30, 1912, inclusive	126
July 1, 1912, to June 30, 1913, inclusive	501
July 1, 1913, to June 30, 1914, inclusive	583
July 1, 1914, to June 30, 1915, inclusive	544
July 1, 1915, to June 30, 1916, inclusive	632
July 1, 1916, to June 30, 1917, inclusive	632
July 1, 1917, to June 30, 1918, inclusive	893
July 1, 1918, to June 30, 1919, inclusive	803
July 1, 1919, to June 30, 1920, inclusive	1,159
July 1, 1920, to June 30, 1921, inclusive	1,099
July 1, 1921, to June 30, 1922, inclusive	1,034
July 1, 1922, to June 30, 1923, inclusive	1,170
July 1, 1923, to June 30, 1924, inclusive	1,061

Classified as to subject and utility, the year's applications are grouped in Table No. 4, as follows:

TABLE NO. 4.
Applications Filed from July 1, 1923, to June 30, 1924.

	Steam railroads	Electric railroads	Water carriers	Electric companies	Gas companies	Telephone and telegraph companies	Water companies	Warehouse companies	Wharf companies	Auto stage companies	Total
Grade crossings	266	57									323

DECISIONS.

Decisions rendered by the Commission for the fiscal year ending June 30, 1924, numbered 1450, or 203 less than for the previous year.

Decisions rendered each year by the Commission since 1911 are shown in Table No. 5, as follows:

TABLE NO. 5.
Summary of Decisions in Formal Proceedings, January 1, 1911, to June 30, 1924.

January 1, 1911, to June 30, 1912, inclusive	97
July 1, 1912, to June 30, 1913, inclusive	644
July 1, 1913, to June 30, 1914, inclusive	876
July 1, 1914, to June 30, 1915, inclusive	915
July 1, 1915, to June 30, 1916, inclusive	930
July 1, 1916, to June 30, 1917, inclusive	952
July 1, 1917, to June 30, 1918, inclusive	1,092
July 1, 1918, to June 30, 1919, inclusive	943

ANNUAL REPORTS FILED.

The Department of Finance and Accounts reports that during the year ending December 31, 1923, annual reports were received from 1775 public utilities as compared with 1669 for the preceding year. Reports were filed for the first time by 242 utilities, while 136 utilities ceased

filing them. Nineteen companies submitted reports concerning hospital service. The tables follow:

TABLE NO. 7.

CHAPTER III.

INFORMAL COMPLAINTS—DISPUTED BILLS.

Public utility patrons availed themselves in increasing numbers of the service rendered freely by the Railroad Commission through its handling of informal complaints during the last fiscal period. Not only has there been an increased appreciation by the public of this service, but the utility companies have shown an increased desire to cooperate with the Commission's experts in a satisfactory adjustment of these complaints.

More than ever the utilities are realizing that a satisfied clientele is much more desirable than the last cent of a disputed bill, or a too technical adherence to inflexible rules and regulations in their dealings with the individual consumer, who considers he, or she, has a grievance, warranting an appeal to the Railroad Commission.

It is a matter of considerable satisfaction to the Commission to record that 6315 informal complaints were received during the last fiscal period, and that more than 75 per cent of these were settled in favor of the consumer, and virtually every one was adjusted to the satisfaction of both parties to the complaint.

Many of the informal complaints were due to the drouth conditions prevailing throughout California, or to the extraordinary telephone situation in Los Angeles county. A marked decrease on complaints in regard to delayed installation of service is predicted by the engineers of the Telephone and Telegraph Division of the Commission, as the result of the efforts of the Commission to expedite construction of new telephone facilities in Los Angeles and surrounding territory.

METHOD OF PROCEDURE.

Informal complaints may be made by telephone, letter, postal card or personal interview, it being the design of the Commission to make this department readily accessible to the public and free of technical procedure. The procedure is defined as follows:

Whenever an informal or correspondence complaint is filed, the matter is at once referred to the appropriate department, which takes up the matter with the utility affected, either by letter or in person, to see whether an adjustment can not be made voluntarily. If necessary a representative of the Railroad Commission travels to the locality affected to secure first-hand information and an adjustment, if possible. While the Commission can not without the formal hearing, at which the public utility has its day in court, compel a public utility to take action on any complaint, the Commission has been successful in a large majority of informal complaints in securing an adjustment without the necessity of formal proceedings.

INFORMAL COMPLAINTS BY YEARS.

Since the handling of informal complaints was made a departmental function on January 1, 1912, such complaints, including 6315 for the

year under review, reached a total of 42,054, distributed according to fiscal years, as follows:

January 1, 1912, to June 30, 1912, inclusive	245
July 1, 1912, to June 30, 1913, inclusive	1,381
July 1, 1913, to June 30, 1914, inclusive	2,288
July 1, 1914, to June 30, 1915, inclusive	2,382
July 1, 1915, to June 30, 1916, inclusive	3,039
July 1, 1916, to June 30, 1917, inclusive	2,644
July 1, 1917, to June 30, 1918, inclusive	2,423
July 1, 1918, to June 30, 1919, inclusive	2,342
July 1, 1919, to June 30, 1920, inclusive	2,663
July 1, 1920, to June 30, 1921, inclusive	4,888
July 1, 1921, to June 30, 1922, inclusive	4,950
July 1, 1922, to June 30, 1923, inclusive	5,493
July 1, 1923, to June 30, 1924, inclusive	6,315
Total	42,054

SEGREGATION OF COMPLAINTS.

Segregated according to subject and utility, complaints for the period from July 1, 1923, to June 30, 1924, are shown in the following tabulation:

INFORMAL COMPLAINTS FILED WITH THE RAILROAD COMMISSION, YEAR ENDING JUNE 30, 1924.

DISPUTED BILLS.

The Railroad Commission performs another valuable service to public utility patrons through the adjustment of disputed bills. Since 1916 the Commission has discontinued the practice of public utilities of discontinuing service to a consumer on account of nonpayment of a disputed account for service rendered. Under the rules of the Railroad Commission the consumer may deposit the amount of the disputed bill with the Commission, pending an adjustment of the claim. The Commission's experts make a painstaking investigation into all such accounts, and after determining the equitable amount to which the utility is entitled, distributes the deposit in conformity with this finding. This prevents injustice to the consumer, and assures the public utility receiving proper remuneration for the service actually

rendered. Since this procedure was inaugurated in 1916 many thousands of dollars have been refunded to consumers who were found by the Commission to be entitled to receive the same.

Following is a statement showing the number of deposits received for disputed bills by years since May 23, 1916:

May 23, 1916, to June 30, 1916, inclusive	76
July 1, 1916, to June 30, 1917, inclusive	173
July 1, 1917, to June 30, 1918, inclusive	157
July 1, 1918, to June 30, 1919, inclusive	347
July 1, 1919, to June 30, 1920, inclusive	253
July 1, 1920, to June 30, 1921, inclusive	330
July 1, 1921, to June 30, 1922, inclusive	476
July 1, 1922, to June 30, 1923, inclusive	340
July 1, 1923, to June 30, 1924, inclusive	301
Total	2,473

Deposits received for the period of July 1, 1923, to June 30, 1924, inclusive, tabulation as to class of utilities and amounts as follows:

Class of utility	Number of deposits	Amount
Gas and electric	16	\$584 99
Electric	54	3,100 30
Gas	77	1,243 68
Water	87	1,360 28
Telephone	67	2,977 00
Totals	301	\$8,266 25

Informal complaints handled by the different departments of the Commission are treated in the chapters devoted to those departments in this report.

CHAPTER IV.

ISSUE OF SECURITIES.

The jurisdiction of the Railroad Commission over the issue by public utilities of stocks, bonds, notes and other evidences of indebtedness, payable at a period of more than one year after date of issue, has been established and is defined by section 52 of the Public Utilities Act and section 6 of the Auto Stage and Truck Transportation Act. Section 52 reads in part as follows:

The power of public utilities to issue stocks and stock certificates, and bonds, notes and other evidences of indebtedness and to create liens on their property situated within this state is a special privilege, the right of supervision, regulation, restriction and control of which is and shall continue to be vested in the state, and such power shall be exercised as provided by law and under such rules and regulations as the Commission may prescribe.

PERIOD OF SUPERVISION.

From March 23, 1912, the effective date of the Public Utilities Act, to and including June 30, 1924, public utilities filed with the Commission applications involving the issue of \$1,925,637,857.19 of securities. During the same period the Commission has passed on applications involving the issue of \$1,911,763,607.19, leaving \$13,874,250 pending on June 30, 1924.

The applications passed upon by the Commission were disposed of as follows:

Granted	\$1,747,149,641 37
Denied	81,663,220 04
Dismissed	82,950,745 78
Total	\$1,911,763,607 19

The securities authorized consist of the following:

Stock	\$699,003,741 60
Bonds	884,045,529 81
Notes	132,264,530 96
Certificates—equipment trust, etc.	31,835,839 00
Total	\$1,747,149,641 37

The amount of securities which the various classes of utilities have been authorized to issue is shown in the following tabulation:

Steam railroads	\$352,728,014 89
Electric railways	177,858,649 88
Gas and electric companies	838,709,308 90
Water companies	152,532,966 88
Telephone and telegraph companies	135,854,435 82
Warehousemen	11,708,325 00
Car companies	160,000 00
Pipe lines	59,753,433 00
Carriers by water	10,993,034 00
Automotive companies	6,851,473 00
Total	\$1,747,149,641 37

Section 52 of the Public Utilities Act defines the purpose for which public utilities may be authorized to issue securities. It appears that of the \$1,747,149,641.37 the Commission has authorized \$1,015,901,-

766.74 for extensions, additions and betterments; \$287,908,065.36 for refunding of obligations; \$137,136,592.70 for collateral; \$295,381,551.57 for reorganization, and \$10,821,665 for miscellaneous purposes.

APPLICATIONS PENDING JUNE 30, 1924.

In the applications pending before the Commission on June 30, 1924, public utilities ask permission to issue \$13,874,250 of securities. The relation of the securities pending on June 30, 1924, to those pending on June 30, 1923, is shown as follows:

Pending June 30, 1923-----	\$6,840,109 79
Filed during year ending June 30, 1924-----	252,918,793 28
Subtotal-----	\$259,758,903 07
Acted upon during the year-----	245,884,653 07
Pending June 30, 1924-----	\$13,874,250 00

Of the \$13,874,250 approximately 94 per cent is represented by applications filed during the month of June.

AUTHORIZATION DURING THE LAST TWO YEARS.

During the twelve months ending June 30, 1924, the Commission passed upon applications involving the issue of \$245,884,653.07 of stock, bonds, notes and other evidences of indebtedness. It authorized the issue of \$243,869,746.29 and dismissed requests involving \$2,014,906.78. The action taken by the Commission compared with the action taken during the preceding twelve months is shown in the following tabulation:

	Year ending June 30, 1923	Year ending June 30, 1924
Applications granted-----	\$144,860,030 91	\$243,869,746 29
Applications denied-----	206,150 00	
Applications dismissed-----	5,979,375 00	2,014,906 78
Totals-----	\$151,045,555 91	\$245,884,653 07

The amounts authorized during the two years, segregated to various classes of utilities, are as follows:

Class	Year ending June 30, 1923	Year ending June 30, 1924
Steam railroads-----	\$13,959,100 00	\$5,500,800 00
Electric railways-----	475,000 00	42,059,092 88
Gas and electric companies-----	95,935,157 91	124,008,650 00
Water companies-----	24,494,163 00	12,318,910 41
Telephone and telegraph companies-----	935,495 00	55,952,250 00
Warehousemen-----	5,714,010 00	279,000 00
Carriers by water-----	1,144,000 00	1,977,900 00
Automotive companies-----	2,203,105 00	1,773,143 00
Totals-----	\$144,860,030 91	\$243,869,746 29

The purposes for which these various classes of utilities were authorized to issue securities and the amounts for each purpose are shown in the following tabulation:

Class	Year ending June 30, 1923	Year ending June 30, 1924
Additions and betterments-----	\$88,677,609 00	\$192,920,725 41
Refunding-----	39,796,618 00	9,050,528 00
Collateral-----	14,670,000 00	11,599,000 00
Reorganization-----	1,715,803 91	30,299,492 88
Totals-----	\$144,860,030 91	\$243,869,746 29

Reducing the foregoing figures to a percentage basis, one arrives at the following:

Class	Year ending June 30, 1923 per cent	Year ending June 30, 1924 per cent
Additions and betterments-----	61.22	79.11
Refunding -----	27.47	3.71
Collateral -----	10.13	4.76
Reorganization -----	1.18	12.42
Totals-----	100.00	100.00

TABULATION OF ISSUE OF SECURITIES.

The tables following show the Commission's action during the year and the names of the utilities who have been authorized to issue stock, bonds, notes and other evidences of indebtedness:

Table No. 1 shows the total amount of stock, bonds, notes and other evidences of indebtedness applied for, authorized and dismissed during the year ending June 30, 1924, and the amount pending on June 30, 1924, segregated as to classes of utilities.

Table No. 2 sets forth the same information segregated as to purpose of issue and class of security.

Table No. 3 shows the amount of stock, bonds, notes and certificates of indebtedness of steam railroad companies applied for, authorized and dismissed during the year ending June 30, 1924.

Table No. 4 shows the amount of stock, bonds, notes and certificates of indebtedness of electric railways applied for, authorized and dismissed during the year ending June 30, 1924.

Table No. 5 shows the amount of stock, bonds and notes of gas and electric companies applied for, authorized and dismissed during the year ending June 30, 1924, and pending on June 30, 1924.

Table No. 6 shows the amount of stock, bonds and notes of water companies applied for, authorized and dismissed during the year ending June 30, 1924, and pending on June 30, 1924.

Table No. 7 shows the amount of stock, bonds and notes of telephone and telegraph companies applied for, authorized and dismissed during the year ending June 30, 1924, and pending on June 30, 1924.

Table No. 8 shows the amount of stock, and notes, of carriers by water applied for, authorized and dismissed during the year ending June 30, 1924.

Table No. 9 shows the amount of stock and notes of warehousemen applied for and authorized during the year ending June 30, 1924, and pending on June 30, 1924.

Table No. 10 shows the amount of stock, notes and certificates of indebtedness of automotive companies applied for, authorized and dismissed during the year ending June 30, 1924, and pending on June 30, 1924.

TABLE NO. 1.
